

KEY:

Proposed Features

1

Flagship Feature - key features include:

Objective - to create a large unit reflecting characteristics of the oak woodland

- The Central tower unit is 13m high
- 12m long Wooden bridge and tunnel bridge
- The highest access point to the unit at 5m in height
- A spiral stainless steel tube slide will be installed at the slide's highest platform totalling 7m in height. The slide is 12 metres long
- A second stainless steel tube slide totalling 12m in length will provide a rapid exit from the second highest platform totalling 6m in height
- Large rope nest providing opportunities to access the central tower with a vertical tunnel rope. This feature provides opportunities to relax and socialise.

2
