

7.1.4 Church Road Junction

“The proposal, though its taller parts may be visible from some positions in the conservation area, will be largely invisible from the greater part of the conservation area to the south. When it is visible from within this main part of the conservation area and from the location of the Grade II St Andrew’s Church or locally listed buildings, the view may be of the taller elements of the site alone, with the lower parts of the development concealed by intervening townscape.”
