Block A Roof Garden

BLOCK A 6TH FLOOR ROOF GARDEN

The roof terraces form a series of garden rooms allowing for socializing, contemplation and even growing your own plants in small 'allotment in the sky' sections.

All planting is provided in raised planters to allow for sufficient levels of topsoil. The planting consists of draught tolerant small trees and specimen shrubs, perennials herbaceous and grasses and are highly ornamental. The planting provides interest as well as shelter from the wind and is in line with the wind mitigation strategy of the wider scheme.

Arbours and pergolas provide a sense of shelter and add further structure to the garden layout as well as interest especially with climbing plants trailing across them.

- KEY:
- 1. Resin bound gravel surface
 - 2. Concrete flag paving to seating area and allotment
 - 3. Composite timber decking to lounge area
 - 4. Astro-turf to central lawn area
 - 5. Small specimen tree planting
 - 6. Raised planters with ornamental planting
 - 7. Ornamental flowerbed
 - 8. Arbour
 - 9. Pergola
 - 10. Raised planter with integrated timber seating
 - 11. Raised planters to growing garden

Block B Roof Garden 2

BLOCK B 8TH FLOOR ROOF GARDEN

The roof garden on the Block B 8th floor terrace continues the design choices made for the other roof terraces and therefore allows in the same manner for ample socializing and green space whilst enjoying views into the wider landscape.

KEY:

- 1. Resin bound gravel surface
- 2. Concrete flag paving to allotment area
- 3. Composite timber decking to lounge area
- 4. Astro-turf to central lawn area
- 5. Small specimen tree planting
- 6. Raised planters with ornamental planting
- 7. Ornamental flowerbed
- 8. Arbour
- 9. Pergola
- 10. Raised planter with integrated timber seating
- 11. Raised planterbeds to growing garden
- 12. Central feature to Lawn (Astro turf) area

Block B Roof Garden

BLOCK B 6TH FLOOR ROOF GARDEN

The roof garden on the Block B 6th floor terrace are coherent with the design principles, language and layout choices that have been established for the roof terraces at Block A to create a cohesive overall landscape design and environment.

KEY:

- 1. Resin bound gravel surface
- 2. Concrete flag paving to allotment area
- 3. Composite timber decking to lounge area
- 4. Astro-turf to central lawn area
- 5. Small specimen tree planting
- 6. Raised planters with ornamental planting
- 7. Ornamental flowerbed
- 8. Arbour
- 9. Pergola
- 10. Raised planter with integrated timber seating
- 11. Raised planterbeds to growing garden
- 12. Central feature to Lawn (Astro turf) area

Courtyard Garden

GROUND FLOOR COURTYARD GARDEN

The landscape garden within the courtyard is for residents, staff and visitors to enjoy. It will provide a beautiful setting to look out on to and use as an informal recreational area allowing for the creation of a small sanctuary garden within. The theme of the rear landscape is an English Countryside Garden with a contemporary twist, where formal gardens and terraces are offset by serpentine routes with more naturalistic planting and the inclusion of follies. The communal terraces are surfaced with high quality concrete paving and are an extension of the Village Hall & Residents Lounge and restaurant and will be used for small scale outdoor seating and dining looking outwards onto highly ornamental flowerbeds and a formal lawn area including a small central feature/ sculpture. A series of small formal garden rooms alongside the outdoor terraces invite for rest and contemplation as well as socializing. The garden rooms are framed and separated by low height clipped hedges whilst a formal axial route connects the rooms towards a semi-circular pergola and curved benches as well as a meandering path which invites for a stroll. A smaller more intimate repetition of the semi-circular seating arrangement is found near the Western boundary along the meandering path, inviting for a private chat whilst looking at a beautiful flower bed. The wider lawn area of the garden is framed by decorative shrub, herbaceous and tree planting. Our design allows for a good pedestrian flow of movement whilst creating smaller areas where people can sit back and relax on a bench, alone or together enjoying ornamental planting beds from close up. Together the landscape composition provides both a lush green setting and a garden to look out on to and/or explore throughout the seasons.

- KEY:
- 1. Concrete flag paving to terraces with seating and outdoor dining
 - 2. Pergola structures with partial full cover
 - 3. Resin bound gravel surface
 - 4. Unbound gravel surface
 - 5. Formal lawn area
 - 6. Ornamental flowerbeds
 - 7. Low clipped evergreen hedge planting
 - 8. Timber and stainless steel benches
 - 9. Arbour to formal garden entrance
 - 10. Curved pergola with seating
 - 11. Ornamental shrub planting
 - 12. Specimen tree planting
 - 13. Proposed retaining wall with metal balustrade
 - 14. Zen viewing garden to be enjoyed from interior pool area

Elevation Treatment 2

The Proposal: Elevational Treatment - Detail Studies

With a relatively simple approach to the elevational treatment the details of material interface and relationships become particularly important. The studies on this page represent our exploration of the design language and how it can be adapted for particular elements of the building

Elevation Treatment A

The Proposal: Elevational Treatment—Block A

The design of the elevations is about the rhythm of the repeated elements, the shadows created by the bold modelling and highlighting the presence of the communal spaces where they are visible from the street or garden

Elevation Treatment B

The Proposal: Elevational Treatment—Block A

The design of the elevations is about the rhythm of the repeated elements, the shadows created by the bold modelling and highlighting the presence of the communal spaces where they are visible from the street or garden
