Executive Summary

Authorities' Monitoring Reports ('AMRs') are required to outline the progress made on the local plan timetable and assess the effectiveness of planning policies against various targets and indicators to see whether local planning authorities are achieving local plan objectives.

The AMR must be prepared and published at least once a year in accordance with planning regulations, and Watford's Monitoring Report has been delivered annually since such regulations came into force in 2005.

Watford's Monitoring Report 2015 covers the period 1 April 2014 to 31 March 2015. Additional information that has subsequently become known with regard to more recent developments is supplied within the commentary where it is practical to do so, in order to provide as up to date a picture as possible.

Key results on the delivery of the Local Plan Part 2 and impacts being made on the Core Strategy key objectives are supplied here in the Executive Summary.

Planning Policy Delivery

- A second consultation on the Local Plan Part 2 took place 17 December 2014 to 4 February 2015; a further focussed consultation on proposals for a primary school on land off Bedford Street was undertaken from 24 June to 22 July 2015. Following these consultations, changes are being made to some policies, and additional evidence is being commissioned to support the plan prior to publication. Some additional policies are proposed which are subject to consultation from December 2015 to February 2016, ahead of publication stage. This means that the original publication, submission and adoption dates are delayed and a revision to the LDS will be required.
- After being found sound by an independent Examiner, the council adopted the Watford Community Infrastructure Levy (CIL) Charging Schedule on the 19 November 2014, for implementation from the 1 April 2015. Planning applications determined on or after the 1 April 2015 may therefore be subject to CIL.
- The conservation area Character Appraisal document for Oxhey was adopted by the council in July 2014, following designation as a conservation area in 2013. The council has committed to updating the Character Appraisals for the conservation areas every five years and four draft revised Character Appraisals on the Civic Core, Estcourt, Nascot and St Mary's Conservation Areas have been produced. A four week consultation was undertaken from 6 November until 4 December 2015.

A family-friendly town centre

- Major improvement works were carried out to the town centre and completed in the summer of 2014. These included new street furniture, lighting, trees and paving, with enhancements to the pond and a new events space, which has succeeded in hosting all kinds of events such as the Imagine festivals, the Big Skate – the outdoor ice rink, the Big Beach and the Big Screen. The Parade is also hosting a German Christmas market for the first time in 2015.
- Works are taking place on a major improvement project at Cassiobury Park, with completion estimated spring 2017. Plans include: a revamped pools facility; a new sustainable park hub building, which will include catering facilities, park management office, changing facilities, toilets, visitor centre and education/community room; improving the Cha café tea pavilion and providing an on site park manager, community park ranger and education officer.
- The project to transform Charter Place project in Watford town centre began in November 2015. In addition to about 16 shops and 10 restaurants, a nine-screen IMAX cinema and leisure offer will be created. Part of the scheme includes a public square that will host a diverse events programme, such as street art and music shows.

Sustainable neighbourhoods

- **The net figure of 246 housing completions for 2014-15 is slightly less** than the annual average target of 260 additional homes but this is more than compensated for by delivery in previous years. Watford has delivered a total of 3,615 new homes between 2006/07 and 2014/15, an average of 402 per annum.
- A small number of housing completions, 11 homes over 3 sites, resulted from permitted development termed as prior approvals, equating to 4.5% of the total net completions. These prior approvals were changes of use from offices. A larger impact of the revised permitted development rights is expected in later years; all known permitted development for residential use not yet implemented in Watford is included in the housing trajectory and currently amount to 175 homes, 4.2% of the total housing commitments of 4,141 units at 31 March 2015.
- Watford can demonstrate a 5 year housing land supply of 199%, which is almost twice the National Planning Policy Framework requirement of 105%. The number of projected completions between 2016/17-2020/21 has been identified as 1,791 (x) and the five year supply is **(1,791/900)*100=199%**; this takes previous delivery into account in order to check if we are on target to reach the minimum 6,500 additional dwellings by 2031. We also have a sufficient supply to cover the annual average target of 260 homes (260*5=1300) for more than five years.

- There were 79 affordable dwelling completions in total during 2014/15, forming part of developments where the number of affordable homes achieved varied between 30% and 100% of the total residential units on each site; all conformed to the policy that applied at the time of permission.
- 90.8% of all homes completed this year were on previously developed land, above our local target of 80%.
- The council is guided in granting planning permission by recommendations from the Environment Agency (EA), including advice on flood risk and water quality. There was one initial objection received on the grounds of flood risk but the scheme was subsequently amended and received positive comments from the Environment Agency at a later stage.
- 100% of employment development took place on previously developed land, exceeding the Core Strategy target of 90%. No greenfield land has been used for any employment development in the district during the period monitored since 2006/07.

Enhance Watford's regional economic and transportation role

- The planning permission incorporating both outline and detailed elements for the mixed-use Watford Health Campus was issued by the council on the 6 January 2015. Work has started on the building of the new road to improve access to Watford Hospital and the surrounding areas. Additionally, works started on the Charter Place project in November 2015, which will ultimately create a 1.4 million sq.ft. single retail and leisure destination.
- Watford's Core Strategy seeks a minimum of 7,000 additional jobs in the district between 2006-2031. The latest published data from the EEFM, (dated 8 January 2015) suggest a scale of job growth in Watford of 10,200 from 2006 to 2015; the EEFM projections imply total job growth of 18,100 for the period 2006 to 2031. It is considered that the redevelopment of Charter Place should create about 1,900 new jobs and that the Watford Health Campus project should create a further 1,000 jobs.
- Unemployment rates across most of the county have been steadily decreasing since 2011, dropping more markedly since 2013. Watford's claimant count has decreased by 45.3% between July 2013 and 2015 to 919, a proportion of 1.5%, the lowest it has been since pre-recession in 2008.

- There were minimal gains to employment floorspace in the B use classes during 2014/15. A net loss of 10,620 sq.m. of employment floorspace has occurred during the past year, with over 91% of the reduction in office space. Most of the loss of office floorspace was due to 3 changes of use in situations where exceptions to policy were considered justified - to a hotel in Clarendon Road, where it would support the wider business function, and to a gym and health facility in premises which had been vacant for some time. In response to the higher employment projections and the preparation of up to date evidence on the need for employment space in future, we expect to seek additional office space to replace such losses and provide for expected increases in the demand for office space. This need is a material consideration in determining planning applications now, and is being addressed through the emerging policies and allocations in Local Plan Part 2.
- Most of the office redevelopment overall had planning permission rather than taking place under the prior approvals procedure associated with permitted development rights, which only accounted for around 450 sq.m. loss of office floorspace. However, a larger impact of the revised permitted development rights is expected in later years from the prior approvals not yet implemented. Just over half of the total proposed (with planning permission, not yet implemented) gross loss of employment floorspace of almost 34,200 sq.m. is to office floorspace, nearly 17,500 sq.m. The majority of the proposed gross loss to office floorspace, 55%, is due to the revised permitted development rights which came into effect in May 2013, termed as prior approvals, most of which are changes of use to residential.
- Latest figures on the count of active enterprises in Watford show a mostly increasing trend, and business starts in Watford have increased significantly to 17.1% (750) of total active enterprises (4390) recorded, up from 11.9% the previous year and the number of business closures decreased to 10.8% (475) of active enterprises (2013 figures). This indicates greater confidence in and a healthier economy, which is reflected in figures nationally. However, the high percentage of business starts in Watford indicates that business activity is particularly buoyant here.
- At the end of October 2015, businesses voted to say yes to setting up a Business Improvement District (BID). A BID is a business-led partnership which enables coordinated investment in the management and marketing of a commercial area. It is set to deliver around £3 million of investment in a range of exciting town centre projects over the next five years and provide a coordinating voice to unite its businesses and communities.
- Final funding approval on the Metropolitan Line Extension (formerly known as the Croxley Rail Link) was agreed by the Government in March 2015. Preliminary works on the scheme will continue and it's expected that construction work will start during 2016.

Enhance Watford's regional health, recreational, educational, cultural and social role

- The sites proposed for primary school expansion/provision in the Local Plan Part 2 first consultation in 2013, have all been delivered: Lanchester Community Free School, Hempstead Road - an additional two-form entry school, opened in September 2014; Orchard School - the school has been expanded to a two-form entry primary school - a new 2 storey extension to the school was opened in March 2015; Ascot Road Community Free School - a new two-form entry primary school opened in September 2014 in the Lanchester Building, Hempstead Road and moved into the new purpose built site in Ascot Road in June 2015. Ascot Road is part of Special Policy Area 6: Western Gateway. The council will continue to work with landowners and developers of the Ascot Road site in order to deliver further employment opportunities and other aspirations of Policy SPA 6.
- Watford Health Campus is a major regeneration project to improve the area surrounding Watford Hospital and to provide an opportunity for hospital improvements on the site. Over the next 15-20 years about 750 homes, local retail, leisure and play facilities and public open space will be provided. The approved S106 planning agreement will provide monies for education provision, new and better bus services, local traffic calming, road improvement and junction works; it also requires 35% affordable housing on site.
- Carbon Dioxide emissions reduced in 2013 and there has been a mostly reducing trend in emissions in Watford since 2006, in line with policy objectives. There was an increase in emissions in 2012 but this was the same in 92% of local authorities across the country, due to the colder year.
- The council monitors air quality at several locations across the borough. On Rickmansworth Road site, close to the Town Hall, continuous 'real-time' monitoring of nitrogen dioxide and PM₁₀ particulates is undertaken. NO₂ concentrations have remained fairly constant and the annual mean objective of 40 g/m³ has not been exceeded during this time at this site.

Enhance Watford's environment, green infrastructure and heritage assets

- The amount of open space managed to Green flag Award standard has increased to 115.67 hectares in 2015, which represents 37% of Watford's total open space managed (311.31 hectares). Watford now has six award-winning parks, with Green Flags awarded in 2015 to St. Mary's Churchyard and Callowland Recreation Ground for the first time, following on from the addition of Oxhey Park in 2014. It is the seventh consecutive year that Woodside Playing Fields and Cheslyn Gardens have been awarded the Green Flag and the ninth year for Cassiobury Park. Cassiobury Park has also been named the 10th top park out of over 1500 in the 'Keep Britain Tidy People's Choice Awards'.

- The council successfully bid for external funding from the Heritage Lottery Funding/BIG Lottery funding for Cassiobury Park; grants totalling £5million have been received, alongside WBC funding of up to £2 million, using monies collected from S106 planning agreements. The project includes reintroducing the historic and Grade II listed bandstand from outside the Town Hall, so it can be brought back into more use for arts, music and events in the park and the restoration of the historic 18th century Lime Avenue.
- The importance of open space and the Green Belt to Watford's predominantly urban environment is recognised and protected by Core Strategy Policy GI1: Green Infrastructure and GI2: Green Belt and additional saved policies from the Watford District Plan 2000. The Green Belt currently measures 407 hectares, equating to 19% of Watford's total area, and remains unchanged from last year.
- Watford Borough Council negotiates developers' contributions towards site specific infrastructure including affordable housing, open space and children's play space. In 2014/15, the amount of Section 106 contributions administered by Watford Borough Council that was used to fund schemes was £1,321,572. There is a programme of works using S106 funds and a large number of improvements have been implemented across the town, including the Colne River Project, Cherry Tree Allotments, Oxhey Park, Cassiobury Park and other local parks, play areas, recreation grounds and open spaces.

1. Introduction

Authorities' Monitoring Reports have an important purpose in the ongoing management of planning policy by identifying changing circumstances and providing the context against which to consider the need for any review of the planning policies in place at the time. This Monitoring Report covers the period 1 April 2014 to 31 March 2015. Additional information that has subsequently become known with regard to more recent developments is supplied within the commentary where it is practical to do so, in order to provide as up to date a picture as possible.

The National Planning Policy Framework (NPPF) was published on 27 March 2012 and came into force with immediate effect, superseding previous planning guidance, and on the 6 April 2012 'The Town and Country Planning (Local Planning) (England) Regulations 2012' were published. For reference, Part 8, Section 34 of these new regulations deals with Authorities' Monitoring Reports in full, but in summary, this includes that they should:

- Report progress on the timetable for the preparation of documents set out in the local development scheme including the stages that each document has met or the reasons where they are not being met
- Identify where a local planning authority are not implementing a policy specified in a local plan together with the steps (if any) that the local planning authority intend to take to secure that the policy is implemented
- Include information on net additional dwellings and net additional affordable dwellings
- Report where a local planning authority have made a neighbourhood development order or a neighbourhood development plan
- Where a local planning authority has prepared a report in accordance with regulation 62 of the Community Infrastructure Levy Regulations 2010(b), the local planning authority's monitoring report must contain the information specified in regulation 62(4) of those Regulations i.e. details of CIL expenditure and receipts
- Any action taken during the monitoring period where a local planning authority have co-operated with another local planning authority, county council, or relevant body
- A local planning authority must make any up-to-date information, which they have collected for monitoring purposes, available in accordance with regulation 35 as soon as possible after the information becomes available

Watford's Local Plan Core Strategy was formally adopted on the 30 January 2013 and the development plan for Watford currently consists of:

- Watford Local Plan Part 1 – Core Strategy 2006 - 2031
- Remaining saved policies of the Watford District Plan 2000, until replaced
- the Waste Core Strategy and Development Management policies 2011-2026 within the Minerals and Waste Local Plan, prepared by Hertfordshire County Council.

This means that the Core Strategy forms part of the development plan and is being used in determining planning applications. The council will continue to have regard to the remaining saved policies of the Watford District Plan 2000 and the Local Plan Part 2 policy documents that are currently being progressed; a second consultation took place from 17 December 2014 to 4 February 2015. Some additional policies are proposed which are subject to consultation from December 2015 to February 2016, ahead of publication stage.

Neighbourhood planning legislation and regulations, which are intended to allow communities to have a greater say over the planning of places in which they live and work, are now mostly in place. There are currently no neighbourhood development orders nor a neighbourhood development plan in Watford. The neighbourhood planning process should be led by communities although communities are not required to have a neighbourhood plan - the district council's local plan will still be used to determine planning applications. The government has given funding to four organisations, which will provide communities with assistance for neighbourhood planning. Please click on the organisation's name below to visit their website:

- [Planning Aid](#)
- [Locality](#)
- [CPRE](#)
- [The Prince's Foundation](#)

District councils will be able to provide some assistance – mainly with technical and procedural issues.

This monitoring report includes indicators which measure the effects of planning policies that the indicators can be directly related to: other indicators used in the document provide a wider context on such aspects as the economy and environment.

The requirement to submit the monitoring report to the Secretary of State was removed in 2011 but it is still required to be published as soon as reasonably practicable on the council's website at www.watford.gov.uk
We welcome views on the AMR's format and content so that we can make improvements on future reports and request that any comments be sent to the address below, or alternatively, you can email comments to strategy@watford.gov.uk

2. Duty to Co-operate

In order to effectively meet the requirements of the Duty to Cooperate introduced in the Localism Act 2011, a partnership of all the planning authorities in the county - the Hertfordshire Infrastructure and Planning Partnership (HIPP) - agreed a Memorandum of Understanding in May 2013. This set out a commitment to joint working on planning matters on an ongoing basis with each other and other public bodies and private sector interests such as the Hertfordshire Local Enterprise Partnership (LEP), Hertfordshire Local Nature Partnership and infrastructure providers. A proposal was also agreed to create a Local Strategic Statement (LSS) for the County, providing an overarching strategic planning vision and objectives.

The first stage of the LSS included identifying and mapping major housing, employment and mixed use development proposals contained in adopted and emerging local plans; key major transport schemes for the period 2015 to 2019; key strategic proposals of the Hertfordshire Green Infrastructure Plan and a spatial representation of the Local Enterprise Partnership's key economic assets and opportunities in the county as defined in the LEP's growth strategy, their Strategic Economic Plan, called 'Perfectly Placed for Business'. The LSS proposals map provided a spatial planning baseline for the preparation of the LEP's Strategic Economic Plan, which was submitted to Government at the end of March 2014. This sets out their priorities for delivering growth across the county.

The next step would be to turn this into a Spatial Planning Framework for the county – Hertfordshire authorities are currently still discussing the appropriate scope of this document.

Herts Planning Group (HPG) involves the county council and 10 districts in Hertfordshire who have agreed to work together on strategic planning issues, but were looking at what might be the most suitable governance arrangements. The districts are considering ways to allocate housing numbers and meet the Localism Act's duty to cooperate, which legally requires councils to continuously engage with neighbours on strategic planning issues.

In addition Watford Borough Council ensures that Duty to Cooperate meetings are carried out with neighbouring authorities at regular intervals, to discuss cross boundary issues and often jointly commission studies together where necessary. The council also participates in the Hertfordshire County/District Information Liaison Group quarterly meetings, in which issues concerning monitoring, data collection and provision, often arising from changes in planning regulations, can be raised and examined.

Over the last year work has begun on preparing a shared evidence base to inform the next Local Plan Review. Watford, Dacorum, Three Rivers and Hertsmere have jointly commissioned a study to establish the housing market area, the functional economic market area and to assess likely future housing and employment needs for the relevant area. St Albans District Council were also invited to join the study but preferred to undertake a separate assessment. This information, along with future joint evidence to be prepared, will inform plan review of the various authorities.

3. Local Development Scheme

The timetable setting out the programme for production of Local Plan Documents is known as the Local Development Scheme ('LDS'). Authorities' Monitoring Reports set out how progress with preparing local plan documents during the monitoring year meets targets set in the LDS, and whether changes to the LDS are required.

3.1. Local Development Scheme

Watford's Local Plan Part 1 - Core Strategy was adopted in January 2013 and sets out the council's vision for development and conservation in Watford to 2031. The current LDS, covering the period 2013-16 was published in April 2013. This recognises the change from the previous Local Development Framework approach to producing a Local Plan and the timetable is detailed below:

Table 3-1: Local Development Scheme Timetable 2013-16

Title	Local Plan Part 2
Subject Matter	This will contain site allocation policies, development management policies, and town centre policies.
Status	Local Plan Document:
Geographic coverage	Watford Borough
Timetable	
Notification	November 2012
<i>Informal consultation (likely to comprise 2 stages within this period)</i>	<i>Autumn 2013 – Summer 2014</i>
Publication (for consultation)	October 2014
Submission	March 2015
Examination	March – November 2015
Adoption	January 2016

Compiled by Planning Policy, WBC.

3.2. Local Plan Part 2

- We wrote to stakeholders in November 2012 to ask what the Local Plan Part 2 should contain, and used the responses to help prepare draft policies.
- An initial consultation on the Local Plan Part 2 began on the 4 November 2013, between the notification and publication stages, as part of the plan preparation process. This contained initial site allocation proposals, draft development management policies, and draft town centre policies.
- A second consultation on revised policies took place from 17 December 2014 to 4 February 2015.
- A further focussed consultation on proposals for a primary school on land off Bedford Street was undertaken from 24 June to 22 July 2015.

- Following these consultations, changes are being made to some policies, and additional evidence is being commissioned to support the plan prior to publication. Some additional policies are proposed which are subject to consultation from December 2015 to February 2016, ahead of publication stage.
- This means that the publication, submission and adoption dates will also slip and a revision to the LDS will be required.

Table 3-2: Local Plan Part 2 - target dates and progress under the 2013 LDS

Timetable	2013 LDS		Comments
	Target Date	Actual Date	
Notification	Nov 2012	Nov 2012	
Informal consultation (likely to comprise 2 stages within this period)	Autumn 2013 – Summer 2014		<p>First consultation took place from 4 November to the 16 December 2013.</p> <p>A second consultation took place from 17 December 2014 to 4 February 2015.</p> <p>Consultation on Bedford Street proposals took place from 24 June to 22 July 2015.</p> <p>Further consultation to take place on new policies from December 2015 to February 2016</p>
Publication (for consultation)	Oct 2014		Under revision
Submission	Mar 2015		Under revision
Adoption	Jan 2016		Under revision

Compiled by Planning Policy, WBC.

3.3. Policies Map

Strategic sites have been identified by the Core Strategy (maps provided within the Core Strategy document) but boundaries will be identified in Local Plan Part 2. The Policies Map (previously called the Proposals Map) will be updated once Local Plan Part 2 is adopted.

3.4. Evidence Base

A comprehensive evidence base was published on our website www.watford.gov.uk to accompany the Local Plan Core Strategy. The evidence will be kept under review to ensure it is appropriately comprehensive and that it remains up to date.

3.5. Risks

The published LDS identifies risks, their potential impacts and possible mitigation measures.

4. Contextual Characteristics of Watford

Watford is an urban borough in South West Hertfordshire, on the edge of the East of England region to the north-west of London. It covers an area of 2,142 hectares (8.3 square miles), and is the only non-metropolitan borough wholly contained within the M25. However, about 20% of the Borough forms part of the Metropolitan Green Belt and this is supplemented by a variety of open spaces. The Rivers Colne and Gade and the Grand Union Canal give structure to the main open areas, which include the Colne Valley Linear Park/Watling Chase Community Forest and Cassiobury Park, one of six parks with a Green Flag award, the national standard for quality parks and green spaces.

The Borough has excellent transport links with mainline rail connections to London, Gatwick Airport, the Midlands and the North; Metropolitan tube line connections to London, its north-west suburbs and the rural Chilterns; community rail connections to St Albans, coach services to Heathrow airport, bus services to Luton airport and convenient road connections via the M1, M25 and A41.

A long established urban centre, with a market charter dating to the 12th century, Watford expanded rapidly from its linear layout along the historic High Street during the nineteenth century with the coming of the railway line. Much of the character of the area is formed by the streets of terraced Victorian housing, which were followed by an extensive variety of planned housing estates during the twentieth century. These estates, along with their associated employment areas, reflect the styles of design that predominated at the time of their construction, with the resulting diversity of urban character visible across the Borough.

Watford is the centre of a sub-region serving around 500,000 people, living within a 20 minute traveling time catchment. Known for traditional industries including printing, the town has successfully diversified into an attractive and popular regional shopping and business centre and a focus for culture and recreation. As part of the London commuter belt, Watford is strongly influenced by London; and whilst this brings the benefits of a buoyant economy, it also brings significant environmental pressures such as high levels of traffic congestion, high house prices and, with limited land available for development, pressure on all land, including the green belt.

People in Watford are among the top 10 of those happier with where they live than people anywhere else in Britain. Watford came ninth in the survey by Rightmove, reported in August 2015, which asked 24,000 people to rate how content they are with where they live. Participants of the poll were asked to consider 12 aspects including decor, space, contentment, value, community, area upkeep, pride, costs, safety, amenities, recreation, and neighbourliness. Harrogate topped the poll, while Shrewsbury ranked second, Ipswich third and York and Chester completed the top five.

However, the results for Watford were not all good - when asked to respond to the statement "I have enough living space to live comfortably" Watford came out 82nd.

4.1. Demographic Structure and migration

The 2011 Census showed that Watford's resident population was composed of 89,600 household residents and 700 residents of communal establishments. The number of households in Watford with at least one usual resident provided by the 2011 Census was 36,700. The household definition has been updated from the 2001 Census so is not directly comparable. The latest 2015 estimate for registered households from our council tax department is around 38,500.

The resident population estimate for Watford on Census Day 2011 was 90,300. This was an increase of 13.3% compared to the figure of 79,726 from the 2001 Census.

Figure 4-1: Age pyramid for Watford – 2001 Census and 2011 Census

Source: Office for National Statistics 2011 Census and 2001 Census population estimates

49.6% of Watford's resident population are male, as compared to 49.2% in 2001 and 50.4% are female, as compared to 50.8% in 2001, so the sexes have evened out slightly.

By 5 year age band, the largest amount of residents in Watford is in the 30-34 (8,100) and the 25-29 (8,000) age groups. The largest increases since 2001 can be seen within the infants' age band (0-4) and people in their forties, clearly apparent from the Age Pyramid provided.

Watford has a high population density, which has risen to 42 persons per hectare from 37 persons per hectare in 2001, compared with an average of 7 persons per hectare in Hertfordshire and 4 persons per hectare in England overall. It is the most densely populated local authority in Hertfordshire, with Stevenage being the next most densely populated (32 persons per hectare). To put this into perspective, the

19 most densely populated local and unitary authorities in England and Wales were all London boroughs and the only non-London area in the top 20 was Portsmouth, with the top 20 ranging from 50 to 138 persons per hectare.

Table 4-1: Age of Population (number of people)

WATFORD	Total Resident Population 2011 Census	Total Resident Population 2001 Census
All Ages	90,300	79,726
0-4	6,700	5,117
5-9	5,400	5,305
10-14	5,300	5,053
15-19	5,300	4,380
20-24	5,700	5,004
25-29	8,000	7,206
30-34	8,100	7,528
35-39	7,300	7,093
40-44	7,000	5,783
45-49	6,400	4,807
50-54	5,400	4,781
55-59	4,400	3,871
60-64	4,000	3,249
65-69	3,100	2,866
70-74	2,600	2,587
75-79	2,200	2,177
80-84	1,700	1,480
85-89	1,000	936
90 and over	600	506

Source: Office for National Statistics 2011 Census and 2001 Census (2011 Census figures are rounded to nearest hundred; figures may not sum due to rounding)

The 2011 census included detailed results on the year of arrival (for those not born in the U.K) and country of birth. Those born in the U.K. (67,993 persons) account for 75.3% of Watford's resident population, as compared to the 86.2% born in the U.K. recorded in the 2001 Census. Of those Watford residents not born in the U.K. (22,308 persons), more than half state their year of arrival within the last 10 years, summarized below:

- Born in the U.K – 75.3%
- Arrived between 2001 and 2011 – 12.9%
- Arrived between 1991 and 2000 – 3.9%
- Arrived between 1981 and 1990 – 2.1%
- Arrived between 1971 and 1980 - 2.2%
- Arrived between 1961 and 1970 – 2.2%
- Arrived between 1951 and 1960 – 0.9%
- Arrived between 1941 and 1950 – 0.3%
- Arrived before 1941 – 0.11%

The following table provides a summary of the percentage of Watford residents born in the UK, and where the remaining residents were born, together with comparative figures for the county, the region and England.

Table 4-2: 2011 Census: Country of birth – percentage of residents (summary)

	U.K.	Europe (inc. U.K.)	Africa	Middle East and Asia	Americas and the Caribbean	Antarctica and Oceania (inc. Australia and Australasia)	Other country
Watford	75.30	83.64	4.80	9.74	1.49	0.33	0.001
Herts	86.59	91.94	2.75	3.90	1.04	0.37	0.000
East Region	89.02	93.81	1.76	3.08	1.10	0.26	0.000
England	86.16	91.21	2.43	4.77	1.25	0.34	0.000

Source: ONS, 2011 Census, extracted from Table QS203EW (detailed classifications amount to 20 pages). Crown Copyright. Compiled by WBC Planning Policy.

Watford's population has grown more diverse, with the non-white proportion of Watford's population increasing from 10% in 1991 to 14% in 2001, and 28% in 2011, which is more than twice the county average of 12.4% and almost double the national average of 14.6%.

Extremely detailed ethnic categories are available in the 2011 Census, unlike previous years. Within the broader groupings, the proportion of Watford's total Asian or Asian British population has increased the most from 8.8% in 2001 to 17.9% in 2011, as compared with 6.6% overall in Hertfordshire. People identifying as Black or Black British amount to 5.8% from 2.7% in 2001 in Watford as compared with 2.9% in Hertfordshire as a whole (see Table 4-3).

Table 4-3: Ethnic Composition of Resident Population in percentages

	Total Res. Pop.	Census year	White	Mixed	Asian	Black	Other
HERTS	1,116,062	2011	977,495 87.6%	27,497 2.5%	72,581 6.6%	31,401 2.9%	7,088 0.6%
	1,033,977	2001	93.7%	1.4%	3.5%	1.1%	0.3%
WATFORD	90,301	2011	64,946 71.9%	3,104 3.4%	16,170 17.9%	5,229 5.8%	852 0.9%
	79,726	2001	85.9%	2.1%	8.8%	2.7%	0.5%

Source: Compiled by WBC, Planning Policy. Data sourced from ONS 2011 and 2001 Census.

On the 25 June 2015, ONS released the mid-2014 population estimate, (MYE 2014 - as at the 30 June 2014) and Watford's estimate is 95,500, up by 1,800 from the mid-2013 population estimate of 93,700. Watford's overall population increase as a percentage is 1.9%, and unlike last year, (when Watford's estimated change in population as a percentage - 2.18% - was the 4th highest of all local authorities in the

country) it does not appear in the top 10 of UK local authorities with the greatest percentage increase.

The total population has grown in 357 out of the 391 local authorities in the UK in the year to mid-2014. In total, 13 local authorities had growth of more than 2% in their population; all are in England and 6 of these are London boroughs; the top three are the City of London (5.54%), Tower Hamlets (4.08%) and Westminster (2.84%).

The components of change MYE 2013 to MYE 2014 show that:

- 49% of Watford's estimated population increase is from natural change (births minus deaths (up from the 39% of the previous year)
- International migration makes up 33% of the increase (up from the 8% of the previous year)
- Internal migration (within the UK) makes up 18% of the increase (less than the 53% of the previous year)

4.2. Projected population growth

Revised population projections were released by ONS on 29th May 2014. These give a 25 year projection of the usual resident population based on the mid-2012 sub-national population estimates and supersede previous projections.

Comparison of change tables are compiled below for the new 2012-based population projections over a 10 year and a 25 year period, with the interim 2011-based population projections, which were provided for a ten year period only and the previous 2010-based population projections.

Table 4-4: Comparison of change in population over 10 years

	ONS 2010-based				ONS Interim 2011-based				ONS 2012-based			
	2010 based estimate	2020 projected figure	Increase over 10 years 2010-2020	Change 2010-2020 % increase	2011 based estimate	2021 projected figure	Increase over 10 years 2011-2021	Change 2011-2021 % increase	2012 based estimate	2022 projected figure	Increase over 10 years 2012-2022	Change 2012-2022 % increase
Watford	81,900	90,100	8,200	10.0%	90,700	95,300	4,600	5.1%	91,700	103,800	12,100	13.2%
Herts	1,099,000	1,212,100	113,100	10.3%	1,119,800	1,234,100	114,300	10.2%	1,129,100	1,246,600	117,500	10.4%

Compiled by WBC, Planning Policy. Data source: Crown Copyright. Office for National Statistics. Published 29 May 2014. N.B. all figures are rounded to the nearest 100 in accordance with ONS guidelines

It can be seen that Watford's estimated growth of 12,100 people over the ten years 2012 to 2022 in the 2012-based population projections equates to 13.2% (similar to London), higher than the interim 2011-based population projections which estimated Watford's growth to be 4,600 people over the 10 years 2011 to 2021, equivalent to 5.1%, and the previous 2010-based estimated growth of 8,200, equivalent to 10.0% over the same period.

Hertfordshire's average estimated growth over 10 years in the 2012-based population projections is 10.4%, similar to the 2011-based estimated growth rate of 10.2% and the 2010-based growth rate of 10.3%.

Table 4-5: Comparison of change in population over 25 years

	ONS 2010-based				ONS Interim 2011-based				ONS 2012-based			
	2010 based estimate	2035 projected figure	Increase over 25 years 2010-2035	Change 2010-2035 % increase	2011 based estimate	Produced for period of 10 years only	Increase over 25 years 2011-2036	Change 2011-2036 % increase	2012 based estimate	2037 projected figure	Increase over 25 years 2012-2037	Change 2012-2037 % increase
Watford	81,900	100,100	18,200	22.2%	90,700	N/A	N/A	N/A	91,700	117,900	26,200	28.6%
Herts	1,099,000	1,363,900	264,900	24.1%	1,119,800	N/A	N/A	N/A	1,129,100	1,400,700	271,600	24.1%

Compiled by WBC, Planning Policy. Data source: Crown Copyright. Office for National Statistics. Published 29 May 2014. N.B. all figures are rounded to the nearest 100 in accordance with ONS guidelines

As can be seen in the table above, the 2012-based population projections for Watford, equate to a 25 year growth of 28.6%, higher than the 25 year growth of 22.2% estimated in the 2010-based population projections, whereas the projections for Hertfordshire overall equate to growth of 24.1% in both sets of projections.

It is important to note that the projections are not forecasts and do not take any account of future government policies, changing economic circumstances or the capacity of an area to accommodate the change in population. They provide an indication of the future size and age structure of the population if recent demographic trends continued. Population projections become increasingly uncertain the further they are carried forward, and particularly so for smaller geographic areas and detailed age and sex breakdowns.

Population projections are trend-based projections, which mean assumptions for future levels of births, deaths and migration are based on observed levels mainly over the previous five years.

Data has been published showing what makes up the components of change for the 2012-based population projections and these figures (to the nearest thousand) show that the bulk of the estimated increase for Watford over the period is expected to stem from natural change i.e. 19,000 more births than deaths, as opposed to migration (7,000, which results from more inward than outward internal (within the country) migration; there is expected to be almost as much outward as inward international migration).

The level of natural change can be attributed to the relatively young age structure of the current population, with a high proportion of child bearing age.

The 2012 age structure and expected age structure in 2037 is illustrated in the following age pyramid.

Figure 4-2: Age pyramid 2012 and 2037 – Watford

Source: Office for National Statistics, 2012-based population projections. Crown copyright.

4.3. Projected Household Growth, household size and composition

The 2012-based household projections were published by Communities and Local Government on 27 February 2015 and are linked to the 2012-based population projections published by ONS on 29 May 2014. The projections are a 25 year projection (2012 to 2037) and supersede the interim 2011-based household projections.

Table 4-6: CLG 2012-based household projections to 2037, percentage growth and average household size

Area	Watford		Herts		England	
	2012	2037	2012	2037	2012	2037
No. of households	37,000	51,000	460,000	603,000	22.3 million	27.5 million
Percentage growth between 2012 and 2037	36%		31%		24%	
Average household size	2.44	2.30	2.42	2.29	2.36	2.21

Data source: Compiled by WBC, Planning Policy from DCLG 2012-based interim household projections
 N.B. From October 2011 DCLG does not publish data at regional level

The household projections are an indication of the likely increase in households given the continuation of recent demographic trends, making assumptions on future levels of fertility, mortality, net migration and household formation. They are not an assessment of housing need nor do they take into account the effect of future government policies. Household projections are acknowledged to be more uncertain at district level.

Comparison of 2012-based household projections with 2011-based interim household projections and 2008-based household projections

- Over the 25 year period, the DCLG 2012-based household projections estimate growth of 36% (around 14,000 households) for Watford, from 37,000 households to 51,000 households in 2037; they supersede the previous 2008 based household projections over 25 years, which estimated growth of 30% (around 10,000 households) from a base of 34,000 to 44,000 in 2033.
- Over a 10 year period, the DCLG 2012-based household projections equate to growth of 14 % (around 6,000 households) for Watford, from a base of 37,000 households to 43,000 in 2022; they update the 2011-based interim household projections (projections over 10 years only to 2021), which estimated growth of about 6% (around 2,000 households) from a base of 37,000 to 39,000 in 2021; the 2008-based projections estimated 13% growth over 10 years.
- From a national perspective, the 2012-based household projections have a very similar rate of household growth to the 2011-based interim projections for the comparable period from 2012 to 2022 of around 15% and generally, the 2011 based projections showed a lower growth in households compared with the 2008-based projections.

Table 4-7: Total change, average change and percentage change in household projections for local authority districts 2012-2037

	hhs_2012 (000s)	hhs_2017 (000s)	hhs_2022 (000s)	hhs_2027 (000s)	hhs_2032 (000s)	hhs_2037 (000s)	Total Change (000s)	Average Change (000s)	Percentage Change

Data

Source: DCLG Table 425 - <https://www.gov.uk/government/statistical-data-sets/live-tables-on-household-projections>

Watford has the highest estimated percentage growth (together with Hertsmere) of the Hertfordshire districts.

Household size

The 2012-based projections estimate that, between 2012 and 2037:

- Watford's average household size will decrease from 2.44 to 2.3
- Hertfordshire's average household size will decrease from 2.42 to 2.29
- England's average household size will decrease from 2.36 to 2.21

Household composition (or households by type) data from the 2012-based household projections has not yet been released (as at November 2015) and will be released at a later date. The following information is taken from the previous 2011-based interim household projections.

On a national basis, couple households (both with and without other adults, or dependent children) represent 40% of the total increase in households between 2011 and 2021.

Over a quarter (28%) of the increase in households in England is accounted for by one person households, and by 2021, 13% of the private household population is projected to be living alone – this proportion of the population is unchanged from 2011.

Lone parent households (with or without another adult living in the accommodation) represent 18% of the total projected increase in households. 15% of the growth in total households is due to 'other' households, including multi person households such as student households and adults sharing accommodation.

Two thirds (67%) of the increase in households in England is projected for households without any dependent children. This reflects both the growth in one person households and multi-person households.

Table 4-8 shows the household projections for Watford by household type.

These show:

- Lone parent households are projected to grow the most by 32.3%, accounting for 38.3% of the total increase in households for Watford
- Couple households, with or without dependent children, with other adults are projected to increase at a rate of 12.1%, representing 23.4% of the total increase in households for Watford, faster than single family households, which only account for 3% of the total change

- One person households are projected to increase at a rate of 6.6%, although this makes up 32.8% of the total change for Watford
- The average household size is projected to decrease from 2.44 in 2011 to 2.41 by 2021 – this is a higher starting average household size than was previously estimated prior to the 2011 census results, and decreases at a slower rate.

Table 4-8: DCLG 2011-based interim household projections by household type

Watford					
Household types	2011	2021	Change 2011-21	% Change 2011-21	% of total change
One person	11.7	12.5	0.8	6.6%	32.8%
Couple and no other adult (single family, a married or cohabiting couple, with or without dependent children)	14.9	15.0	0.1	0.5%	3.0%
Couple with other adults (one or more married or cohabiting couple families with one or more other adults present, with or without dependent children)	4.6	5.1	0.6	12.1%	23.4%
Lone parent (one or more lone parent families, with dependent children, no married or cohabiting couple families)	2.8	3.7	0.9	32.3%	38.3%
Other (multi-person household e.g. lone parents with only non-dependent children, non-cohabiting adults sharing a dwelling)	2.9	3.0	0.1	2.1%	2.6%
All households	36.8	39.2	2.4	6.4%	100.0%

Data source: Compiled by WBC, Planning Policy from DCLG 2011-based interim household projections
N.B. Household numbers are in thousands

4.4. Crime

There was a rise in the police figures nationally, with violence against the person up by 23% compared with the previous year and sexual offences up by 37%; some of these increases reflect changes in recording practices and a greater willingness of victims to come forward to report such crimes. By contrast the latest estimates for violent crime nationally from the Crime Survey for England and Wales (CSEW) showed no change compared with the previous year's survey, following decreases over the past 4 years and no significant change in sexual offences.

Watford is a densely populated urban town and a key centre for shopping and entertainment and so, has generally higher levels of crime proportionally, than other districts in Hertfordshire; unsurprisingly, the crime rate in Watford was higher than average for the Hertfordshire force area in the year ending March 2015 although it is known from analysis by the police that the night time economy is not the significant contributing factor to the borough's crime rates. However, the crime rate in Watford was about the same as the average crime rate across areas assessed to be similar to Watford (see www.police.uk).

Increases in offences recorded in Watford since last year include recordings of violence against the person (up 48%), sexual offences (up 36%) and domestic burglary offences (up 21%).

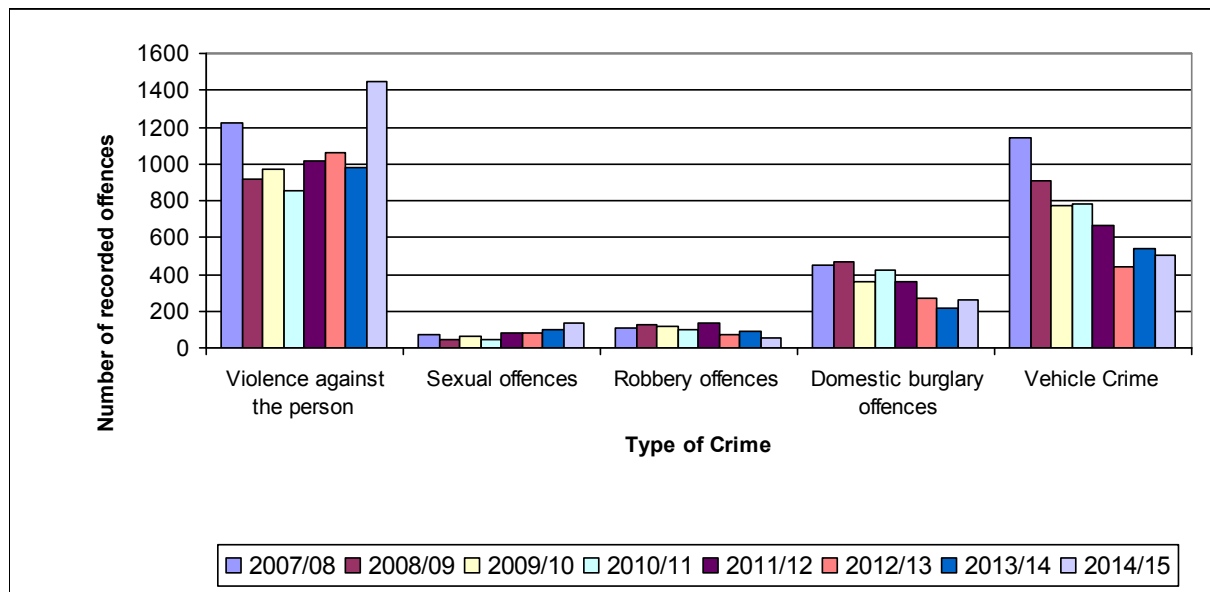

Table 4-9: Number of recorded offences in Watford

	2007/08	2008/09	2009/10	2010/11	2011/12	2012/13	2013/14	2014/15	% increase or - decrease between 13/14 and 14/15
Violence against the person	1224	919	973	851	1018	1062	976	1,448	48.4%
Sexual offences	72	48	66	49	82	78	97	132	36.1%
Robbery offences	111	126	114	95	135	76	89	52	-41.6%
Domestic burglary offences	445	465	357	421	361	272	216	261	20.8%
Vehicle Crime	1144	911	771	779	662	437	539	500	-7.2%

Source: <http://www.ons.gov.uk> Compiled by WBC, Planning Policy

Recordings of robbery offences (down 42%) and vehicle crime offences (down 7%) decreased from last year, and are less than half those recorded in 2007/08. There has been a trend of reducing crime levels in most offences over previous years as illustrated in the accompanying graph.

Figure 4-3: Key Crime Statistics in Watford 2007/08 to 2014/15

Source: Compiled by WBC, Planning Policy – source data from <http://www.ons.gov.uk>

Watford Borough Council is one of the members of the Watford Community Safety Partnership, known as 'Safer Watford' whose aim is to reduce crime, address issues of vulnerability of crime (including anti-social behaviour) and to keep the local community informed about crime related issues. Other members of the partnership include Herts Constabulary, Herts Fire & Rescue, Herts County Council, Herts Valleys Clinical Commissioning Group and the Probation Service. Watford is proud to have achieved the Purple Flag accreditation which recognizes excellence in the management of town centres at night, scoring 'above average' for safety.

4.5. Deprivation

The English Indices of Deprivation 2015 was published by the Government on the 30 September 2015, and updates the previous 2010 Indices, published in March 2011.

The Indices of Multiple Deprivation (IMD) 2015 uses 37 separate indicators, grouped into seven domains (three of which contain sub-domains); the domains are Income; Employment; Health and Disability; Education, Skills and Training; Crime; Barriers to Housing and Services; and Living Environment. In addition to the domains and their sub-domains there are two supplementary income deprivation Indices: Income Deprivation Affecting Children Index (IDACI) and Income Deprivation Affecting Older People Index (IDAOPI).

All the Lower Layer Super Output Areas (LSOAs) in England, as produced for the 2011 Census (as opposed to the 2001 Census), have been ranked according to each of the index or domain scores and these are combined to produce an Index of Multiple Deprivation (IMD). This summary concentrates on the overall Index of Multiple Deprivation and does not include detailed information on individual domain scores (e.g. Income, Employment) which can identify pockets of particular deprivation.

LSOAs are small areas or neighbourhoods of relatively even size (around 1,500 people); there are now 32,844 LSOAs in England (32,482 in IMD 2010) and a rank of '1' equates to the most deprived and '32,844' equates to the least deprived; there are now 690 LSOAs in Hertfordshire (683 in IMD 2010) and 53 LSOAs remain in Watford.

There is no definitive point on the scale below which areas are considered to be deprived and above which they are not. Not all deprived people live in deprived areas and conversely, not everyone living in a deprived area is deprived. Also, a lack of deprivation does not necessarily equate to affluence. The IMD is a relative measure of deprivation and therefore it cannot be used to determine 'how much' more deprived one LSOA is than another. For example, it is not possible to say that LSOA x, ranked 20 is twice as deprived as LSOA y, which is ranked 40. However, it is possible to say that x is more deprived than y.

Users often take the most deprived 10 per cent or 20 per cent of neighbourhoods (or local authority (LA) districts) as the group of highly deprived areas but other thresholds can be used. The IMD 2015 refers to the most deprived LSOAs as those that are amongst the 10 per cent most deprived in England.

The most deprived LSOA in England is Tendring 18a, a neighbourhood to the east of the Jaywick area of Clacton on Sea, the same as in the IMD 2010, and the least deprived is the LSOA Wokingham 020E.

Some of the key results for England are that:

- The majority (83 per cent) of neighbourhoods that are the most deprived according to the 2015 Index of Multiple Deprivation were also the most deprived according to the 2010 Index.
- 61 per cent of LA districts contain at least one of the most deprived neighbourhoods in England (this was 56% in the IMD 2010, 52% in the IMD 2007 and 49% in the IMD 2004).
- The five LAs with the highest proportions of their neighbourhoods in the most deprived 10 per cent in England are the same five as in the 2010 Index, although in a different order (Liverpool was ranked most deprived in the 2010 Index, with 51%):
 1. Middlesbrough – 48.8%
 2. Knowsley – 45.9%
 3. Kingston upon Hull – 45.2%
 4. Liverpool – 45.0%
 5. Manchester – 40.8%
- The 20 most deprived LAs are largely the same as found for the 2010 Index, but the London Boroughs of Hackney, Tower Hamlets, Newham and Haringey have become relatively less deprived and no longer feature in this list (no London boroughs feature, most of the 20 LAs are in northern England, apart from no.13 Hastings – 30.2% and no. 20 Great Yarmouth – 26.2%).

Overall, Watford is not an area with significant deprivation issues and the majority of the LSOAs within the town are in the bottom 50% of LSOAs nationally for deprivation; the borough's position has improved relative to that of 2010.

However, the very local nature of LSOAs means that pockets can be identified where deprivation is potentially more of an issue.

It is important to note that none of the LSOAs in Watford rank among the most deprived 10% in England. However, one LSOA in Watford does rank in the most deprived 20% in England, whereas no Watford LSOA did so in the IMD 2010.

The most deprived LSOA in the borough is Watford 009B, a neighbourhood of Central ward, which is ranked 5,005 in the national rankings, and has moved up from 7,683 in the 2010 national rankings (becoming relatively more deprived), now within the most deprived 20% of LSOAs in England, where there were none in 2010. The most deprived LSOA in Watford in the IMD 2010, 003D, a neighbourhood in Meriden ward, has moved in the rankings from 7,539 to 7,590 (relatively slightly less deprived) and is now second.

Of the 690 LSOAs in Hertfordshire, two are in the 10% most deprived in England (one LSOA in Hertsmere and one LSOA in Three Rivers) and seven are in the 20% most deprived; two LSOAs from Broxbourne, and one LSOA from Dacorum, North Herts, St. Albans, Stevenage and Watford (as above). Neither East Herts nor Welwyn Hatfield have any LSOAs in the most deprived 10% or 20% in England.

Similarly, the LSOAs can be ranked within county and district level, and we have compiled these figures for Watford, together with the national rankings, in Appendix 2; we have also shown by the shaded areas, those Watford LSOAs that come within the most deprived 10% and 20% of each geographical level considered.

There are a total of thirteen LSOAs in Watford which rank in the most deprived 10% in Hertfordshire (the same amount as in the IMD 2010). Most of these LSOAs are the same as in the IMD 2010 (although not in the same order of ranking), apart from Watford 010A, a neighbourhood in Vicarage ward has moved into the most deprived 10% in Hertfordshire with Watford 003E, a neighbourhood in Meriden, no longer in the 10% most deprived.

There are a further four LSOAs which rank in the most deprived 20% in Hertfordshire (less than the six LSOAs in the IMD 2010). All the four LSOAs in Central ward come within the most deprived 20% in Hertfordshire (with three of them in the most deprived 10%), although LSOAs in this category can be found all over Watford, not just around the centre, including LSOAs in most wards in Watford. Only Nascot, Tudor and Park wards do not have any LSOAs within the most deprived 20% in the county.

Figure 4-4: Variation of Percentile of IMD Rank of Average Rank in Hertfordshire Districts 2004-2015

Chart produced by HCC, Community Information and Intelligence Unit. www.hertslis.org

Local authority summaries have also been produced, which have been ranked on the same lines as the LSOAs. There are 326 LAs in England that have been ranked in each of the domain scores and combined to produce an overall IMD ranking; a rank of '1' equates to the most deprived and '326' equates to the least deprived in the LA summaries. The change over time in the relative rankings of the Hertfordshire districts, from the IMD 2004 to the IMD 2015, is illustrated in Figure 4-4.

Watford is the third most deprived district overall in Hertfordshire, ranking 194 in the rank of average ranks for LAs (becoming relatively less deprived by 5 places, as Watford was second and ranked 189 in 2010), following Stevenage, ranked 137 (ranked 158 in 2010, becoming relatively more deprived by 21 places), and Broxbourne, ranked 171, (ranked 205 in 2010, becoming relatively more deprived by 34 places). Watford remains within the 50% least deprived LAs in England, as are all the districts in Hertfordshire, apart from Stevenage.

There are three Hertfordshire districts ranked in the 10% least deprived LAs in England – Three Rivers, East Hertfordshire and St Albans, with St. Albans being the least deprived, ranked at 319 (316 in 2010), placing it in the top ten least deprived LAs in England. Of all the Hertfordshire LAs, Hertsmere has improved its ranking the most, ranked at 247, by 25 places (ranked at 222 in 2010). However, both Hertsmere and Three Rivers have one LSOA in the most deprived 10% nationally.

Further information on The English Indices of Deprivation 2015, can be found in the full report which can be located at:

<https://www.gov.uk/government/statistics/english-indices-of-deprivation-2015>

4.6. Health

32 indicators make up the health summary in the NHS Health Profile, which is comprised of such factors as disease, poor health and life expectancy as well as deprivation, lifestyle, education and other social indicators; 30 of these indicators compare the health of the people in the local area to the rest of England.

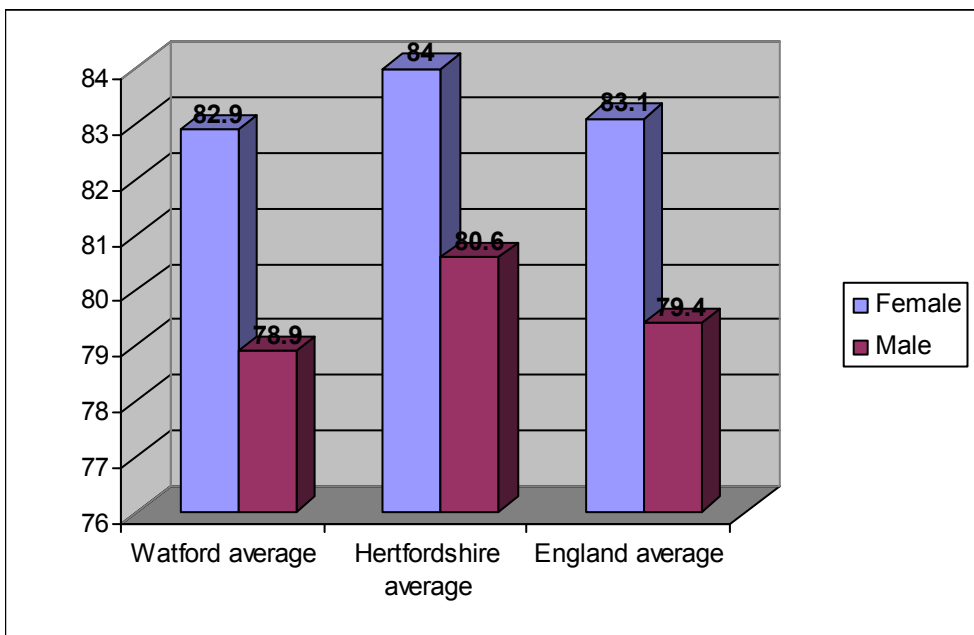

The 2015 NHS Health Profile's conclusion is very similar to that of the previous year in that the health of people in Watford is deemed 'varied compared with the England average' (©Crown Copyright, source: Public Health England 2014).

As a very broad summary, fifteen indicators have been measured as 'not significantly different from England average' and twelve indicators have been measured as 'significantly better than England average' (which may still indicate an important public health problem). The profile shows three different indicators for Watford which have been categorised as 'significantly worse than the England average': sexually transmitted infections, statutory homelessness and excess winter deaths (which has increased from the previous ratio of 28.9 to 34.3 and is significantly worse than the England average of 17.4. Violent crime in Watford (the figures used are reported crimes against the person for 2013/14) previously categorised as 'significantly worse than the England average' now compare as 'not significantly different to England average'.

Life expectancy at birth is an important indicator of health; life expectancy for both men and women is similar to the England average. However, female life expectancy has decreased to 82.9 from the previous year's 82.3 years (England average 83.1). Male life expectancy has decreased to 78.9 from the previous year's 79.2 years (England average 79.4). Also, the life expectancy gap for men can be 8.3 years for men and 8.2 years for women between the most deprived areas of Watford and the least deprived areas.

Over the last ten years, the average early death rate (in people over 75) from all causes has fallen and is similar to the England average; however, the early death rate is worse than the England average in the most deprived quintile (fifth) in Watford and better in the least deprived quintile in Watford.

Figure 4-5: Life expectancy (years) at birth, 2011-2013

Source of data: Department of Health NHS Health Profile 2015
 Chart compiled by WBC, Planning Policy

Similarly to the NHS profiles for 2012 and 2013, it is indicated that local priorities include reducing the prevalence of smoking, reducing obesity and increasing physical activity, and helping older people maintain their health.

There is a drop shown in the percentage of adults smoking, now 14.1% from 14.3% and 16.6% in previous years. There has been a drop in physically active adults, (which showed an improvement the previous year), from 58.9% to 56.6%, not significantly different from the England average of 56%. No update has been provided on the proportion of obese adults at 20.9%, (better than the England average of 23%) or obese children in Year 6 (aged 10-11) at 18.5% (England average 19.1%).

Statutory public health responsibilities transferred from the NHS Primary Care Trust and Strategic Health Authority to Hertfordshire County Council from April 2013. Watford Borough Council has been involved in developing the local Health and Wellbeing Strategy that identifies the priorities to be addressed across the County,

and in the council's Corporate Plan 2015-19, the first priority is making Watford a better place to live in, work and visit.

Ensuring the quality of our town's environment by delivering high quality leisure centres, well-maintained streets, parks and public spaces all contribute to health and wellbeing. Improvements have been made to the top of the town, including the pond, with great new areas for entertainment and events; a diverse range of activities, from the Imagine Watford festival to ice-skating have been delivered through the Big Events programme, encouraging the community to increase participation in sports and leisure activities - this has a positive impact on issues such as obesity, diabetes and heart disease.

4.7. Street Cleaning and Recycling

Street cleansing and waste and recycling (along with Parks and Open Spaces) is one of the services that are managed for Watford Borough Council by the contractor, Veolia; this change was made in the summer of 2013.

Street cleansing litter performance was good in quarter 4 whilst there is scope for improvement in tackling detritus (grit, mud, decaying leaves etc), graffiti and fly posting. There has been an increase in incidents of graffiti and flyposting with one tagger and flyposter being particularly troublesome. Action has been taken to address specific problem areas with the aim of improving performance going forward.

The last quarter's results for 2014/15 compared to the same time last year are as follows - low results are better:

- Levels of litter – 2.98% (improved from 5.06%)
- Levels of detritus – 8.74% (increased from 6.76%)
- Levels of graffiti – 4.17% (increased from 1.49%)
- Levels of fly posting – 1.79% (increased from 0.3%)

Recycling performance and residual waste collected has improved since 2013/14, (when it was 40.6%) to an overall result of 42.04%.

The services remain very important to local people and satisfaction with waste and recycling services remains high (over 90% of local people are satisfied with the service) and street cleansing satisfaction (which historically never scores as highly as waste for satisfaction across all authorities) is now over 70% (Watford Community Survey 2015).

5. Housing

5.1. H1: Plan Period and Housing Targets

The **Core Strategy** (adopted January 2013) states that we are seeking a minimum total target of 6,500 homes from 2006 to 2031, an average delivery rate of 260 dwellings per annum. The housing supply figures are reviewed at least annually, in light of new evidence and joint working with neighbouring authorities and other partners.

5.2. H2: Housing Trajectory

The housing trajectory demonstrates housing provision by providing the actual numbers of net annual completions in the past and projected numbers of completions in the future, and compares these to the targets for new housing.

The main purpose of the trajectory is to support forward planning by monitoring housing performance and supply. This highlights whether any action is necessary in amending planning policy or other means of support to the housing market.

Figure 5-1 illustrates the housing trajectory graphically and Table 5-1 shows the figures in chart form – separate figures are provided for private and affordable housing completions.

H2a: Net additional dwellings – in previous years

Watford has delivered a total of 3,615 new homes between 2006/07 and 2014/15, an average of 402 per annum.

This total is well above the combined annual average required for the years 2006/07 to 2014/15 ($9 \times 260 = 2,340$), making 180 the revised annual rate necessary in order to achieve the minimum target of 6,500 by 2031 ($6,500 - 3,615 = 2,885/16 = 180$). If development continues in line with the projections calculated, we estimate that Watford will have achieved in excess of the minimum target by 2031.

H2b: Net additional dwellings – for the reporting year (the past year of 1 April 2014 to 31 March 2015) and net additional care home bedrooms

- **The net figure of 246 completions for 2014-15 is slightly less** than the annual target of an average 260 homes but more than compensated for by delivery in previous years. It is also more than the revised annual rate of 184 which was required last year to remain on target for 6,500 additional dwellings by 2031.

27% (66 units) of the total completions was on housing sites allocated in the Watford District Plan 2000, with the majority of the completions from windfall sites, as can be

seen in more detail in Table 5-2. Most allocated housing sites came forward for development in earlier years and a summary of all the Housing Sites allocated in the WDP 2000 and their current status is provided in Appendix 6. Further site allocations are being considered within the Local Plan Part 2 process.

A small number of housing completions, 11 homes over 3 sites, resulted from permitted development termed as prior approvals¹, equating to 4.5% of the total net completions. These prior approvals were changes of use from offices. A larger impact of the revised permitted development rights is expected in later years (see H2c).

Taking into account the 246 net housing completions to 2014-15, Watford's dwelling stock is currently estimated to be 39,010 (to nearest 10) as at the 31 March 2015.

- Government guidance states that 'Local planning authorities should count housing provided for older people, including residential institutions in Use Class C2, against their housing requirement'. Separate from the 246 net housing completions completed this year, there were **6 extra care home bedrooms completed during 2014/15** – a 38 bedroom care home was demolished and a new 44 ensuite bedroom care home was erected as a replacement. Prior to this year, there were 210 additional care home bedrooms completed since 2006.

H2(c): Net additional dwellings – in future years

Local Planning Authorities are required to identify a fifteen year supply of deliverable sites and Table 5-1 and Figure 5-1 show the estimated projections for 2015/16 to 2030/31.

All known prior approvals for residential development not yet implemented in Watford are included in the housing trajectory and currently amount to 175 homes, 4.2% of the total housing commitments of 4,141 units at 31 March 2015.

The method used for assessing when deliverability of each permission/prior approval or site is likely to come forward is based on the criteria in the NPPF, also taking into account such factors as to whether:

- the development has started
- planning permissions are full or outline and when they will expire
- discussions with Development Management or developers on progress or when/if likely to proceed.

Also provided separately in Appendix 5 is a list of the outstanding allocated sites without planning permission as at 31 March 2015, which shows the estimated

¹ From 30 May 2013, the Town and Country Planning (General Permitted Development) Order 1995 was amended to allow greater flexibility under permitted development for the change of use of commercial premises, subject to a notification procedure with the local planning authority, termed as prior approvals.

likelihood of whether development will proceed and when figures for these sites are included in the projections.

Planning applications will be considered and determined having regard to the NPPF, Development Plan policies and other material considerations. Further sites for housing and other uses have been assessed and published for consultation as part of the Site Allocations process, contained within the Local Plan Part 2.

N.B. Annual completions affordable portrayed in the table are only those identified as a component part of a planning application and form part of the net annual completions totals. Affordable acquisitions, if any, are not included within these figures.

(Affordable totals delivered including housing completions and acquisitions were 224 for 2009/10 and 356 for 2010/11)

Figure 5-1: H2: Housing Trajectory 2015

Source: Compiled by Planning Policy, WBC

N.B. Annual completions affordable portrayed in the chart are only those identified as a component part of a planning application and form part of the net annual completions totals. Affordable acquisitions, if any, are not included within these figures.

(Affordable totals delivered including housing completions and acquisitions were 224 for 2009/10 and 356 for 2010/11)

H2 (d): Managed delivery target

The purpose of the managed delivery target is to keep track of our housing delivery performance. We calculate the delivery rate necessary to achieve the housing requirement by the end of the relevant plan period, showing how levels of future housing are expected to come forward and taking into account the number of homes provided since the start of the relevant plan period.

The managed delivery target for each year is illustrated as 'Revised Annual Rate' within Table 5-1 and the corresponding Housing Trajectory graph, Figure 5-1.

- Taking into account the total completions of 3,615 units between 2006/07 and 2014/15, this equates to 2,885 units remaining to be achieved and a residual annual rate requirement or 'managed delivery target' of 180 dwellings for the remaining period ($6,500 - 3,615 = 2,885/16 = 180$) in order to achieve the minimum target of 6,500 by 2031.

As each future year's estimated completions vary, so does the annual rate required to reach the target, and is thus revised each year as shown. This enables us to monitor housing delivery performance over the relevant plan period, identify any shortfall and plan accordingly.

5.3. H3: Five Year Housing Land Supply Assessment

A more detailed assessment is required for the first five years; a summary is given below and further details are provided in Appendix 7.

- The **Core Strategy** covers the period 2006-07 to 2030-31, where we are seeking 6,500 dwellings over 25 years.
- Taking into account the total completions of 3,615 units between 2006/07 and 2014/15, this equates to 2,885 units remaining to be achieved and a residual annual requirement of 180 dwellings for the remaining period ($6,500 - 3,615 = 2,885/16 = 180$). This corresponds to a five year housing requirement of 900 (y) dwellings ($180 * 5 = 900$).
- The number of projected completions between 2016/17-2020/21 has been identified as 1,791 (x).
- **The five year housing land supply is calculated as $(x/y) * 100$. Watford's 5 year land supply is $(1,791/900) * 100 = 199.0\%$, which is above the National Planning Policy Framework requirement of 105%.**

We also have a sufficient supply to cover the annual average target of 260 homes ($260 * 5 = 1300$) for more than five years.

The five year assessment is updated on an annual basis to reflect changes identified in the housing supply and the next assessment will follow the collection and analysis of data over the period 1 April 2015 to 31 March 2016.

The larger sites (10 units and over) are detailed individually in the five year assessment listing (prior approvals can be located by searching for application references ending in PD), and summary totals are provided for the smaller sites (under 10 units) in order to reduce the volume of paperwork.

A summary of the five year assessment listing is available at Appendix 7 and is also available separately to download from our website.

The full trajectory listing detailing all housing commitments is available from the Planning Policy team by e-mailing strategy@watford.gov.uk or writing to us at our address on the back page of this document.

5.4. H4: Total Net Housing Completions by Allocation or Windfall Type

Table 5-2: H4: Total Net Housing Completions by Allocated Housing Site or Windfall Type 2001-15

Year	No. of Allocated Housing Site Units Completed	Allocated Housing Site Units as % of Total Net Completions	No. of Large Windfall Site Units Completed	Large Windfall Site Units as % of Total Net Completions	No. of Small Windfall Site Units Completed	Small Windfall Site Units as % of Total Net Completions	Total Net Housing Completions	Total Windfall Site Units (large & small)	Total Windfall Site Units as % of Total Net Completions

Avg.p.a.	75	21%	217	61%	66	19%	359	284	79%

Source: Compiled by Planning Policy, WBC

Windfall sites refer to development proposals that come forward that have not been previously identified as available in the Local Plan process. Large windfall sites are developments where there are at least 10 dwellings or more, and small windfall sites are developments of less than 10 dwellings. Watford has a history of a substantial windfall delivery rate as can be seen in Table 5-2. Windfall sites (both large and small) comprise 79% of the total net housing completions since 2001.

A conservative allowance has been made within the housing trajectory from year 6 onwards of 66 units per annum in respect of windfalls. This allowance is calculated from the average windfall delivery rate for the period 2001-2015 on 'small' sites only ($930/14 = 66$). Although Watford does have a history of large windfall sites, we are not relying on past figures in this respect as this number of 'large' sites may not be repeated. We have also chosen not to include any windfall allowance in years 1 to 5 of the trajectory, to ensure that there is no double counting of sites with planning permission.

Slippage

Monitoring data shows that, historically, non-implementation rates, known as slippage, of planning permissions has been very low. However, there are a number of factors, including economic, which could mean that housing completions will not follow the projections outlined; for those under construction, building works may take

longer than currently scheduled; not all planning permissions are implemented and new developments may come forward. Factors such as these are outside local authority control, as are downturns in the housing market.

The estimated figure contained in our 2014 trajectory for net completions during 2014-15 was 232 units, whereas the actual net completions figure was 246 units. The main difference in the amount of actual and anticipated completions results from the large development at Blackwell House, Aldenham Road, where all of the 50 units were completed during this monitoring year rather than the 22 which we estimated; there were other smaller developments which were estimated to complete by the end of March 2015 that are still under construction and others that were not expected to be fully completed during 2014/15 that have completed earlier.

Furthermore, there were three developments which resulted in a total of 11 flats completed during 2014/15 which did not form part of the 2014 trajectory; the applications were received during 2014/15 and were proposals under the permitted development rights as set out by the Town and Country Planning Order (General Permitted Development) (Amendment) (England) Order 2013); the council having determined that prior approval was not required, these flats were constructed during the same monitoring year.

5.5. H5: New and converted dwellings – on previously developed land ('PDL')

In 2014/15, there were 271 gross dwellings completed in total during the year, of which 90.80% (246 units) were on previously developed land.

As can be seen in the table below, the percentage of housing completions on previously developed land remains well above our target of 80%.

The National Planning Policy Framework (NPPF) states in paragraph 111, that 'Planning policies and decisions should encourage the effective use of land by re-using land that has been previously developed (brownfield land), provided that it is not of high environmental value. Local planning authorities may continue to consider the case for setting a locally appropriate target for the use of brownfield land.

Within the Core Strategy, Policy HS1 'Housing Supply and Residential Site Selection' details factors that will support residential allocation or will be considered in determining planning applications, and includes previously developed land – our local target continues to be 80% of all residential development on previously developed land, as specified in the Core Strategy's 'Monitoring Framework'.

Table 5-3: H5: Percentage of new and converted homes (gross) on previously developed land

2006/07	2007/08	2008/09	2009/10	2010/11	2011/12	2012/13	2013/14	2014/15
99.66%	100%	100%	100%	97.90%	92.50%	97.00%	91.00%	90.80%

Source: Compiled by Planning Policy, WBC.

N.B. PDL definition amended 9/6/10 to exclude private residential gardens and applied to results from 2010/11. The revised definition is required to be applied to all completions to assist in measuring subsequent results as consistently as possible, even though the data will include completions that were granted under the previous definition, and this obviously affects any comparisons made between results prior to and after this date.

5.6. H6: Net additional pitches (Traveller provision)

Watford Borough Council currently accommodates a 10-pitch public gypsy/traveller site at Tolpits Lane in the south of the town, managed by Hertfordshire County Council. It also contains two privately-owned travelling show people's sites in the north of the town. There are no transit sites in Watford.

The Core Strategy Policy HS4 set a target of 20 pitches by 2021 and has stated that 'a site in the vicinity of the existing Tolpits Lane site will be the preferred location.' The Local Plan Part 2 – Site Allocation document has identified a potential site adjacent to the existing site.

- There have been no additional pitches delivered.

The Department for Communities and Local Government collect and publish data from local authorities who carry out the count of caravans on traveller sites twice a year, in January and July; data recorded in January 2015 was published in June 2015. This showed the last five counts since January 2013 which all recorded:

- No unauthorised encampments.

The council acknowledges a need for 10 transit pitches in south and west Hertfordshire to complement the existing South Mimms site by 2011 and will work with neighbouring authorities to identify the most appropriate location(s) for these pitches. There is not considered to be a need for any additional plots for travelling showpeople in the District. These targets will be kept under review. Any applications for pitches will be assessed on a case by case basis against the policies of the Core Strategy and other relevant guidance.

5.7. H7: Affordable housing completions and housing mix

The Core Strategy, states that 35% affordable housing will be sought on major applications of 10 residential units and above (or sites of more than 0.5 ha), with a mix of 20% social rent, 65% affordable rent and 15% intermediate (e.g. shared ownership) affordable housing.

Table 5-4: H7: Affordable housing completions mix provided

	Social rent		Affordable rent		Intermediate		Total
	Number of units	% of overall total	Number of units	% of overall total	Number of units	% of overall total	Overall units provided
11/12	79	83%	0	0	16	17%	95
12/13	122	66%	31	17%	31	17%	184
13/14	10	12%	34	41%	38	46%	82
14/15	12	15%	48	61%	19	24%	79

Source: Watford Borough Council
N.B. 'Affordable rent' category introduced 2011/12

There were 79 affordable dwelling completions in total during 2014-15, with the mix made up of 12 (15%) social rented dwellings, 48 (61%) affordable rented dwellings and 19 (24%) intermediate (e.g. shared ownership), a mix more in line with our policy aim.

Affordable targets for Watford have been developed through the Core Strategy, informed by the evidence produced by various studies such as the Development Economic Study (DES) and the Strategic Housing Market Assessment (SHMA) 2008 that were commissioned in partnership with neighbouring local authorities. A new Strategic Housing Market Assessment and Functional Area Market Assessment have been recently been commissioned for South West Hertfordshire in order to provide updated evidence.

5.8. H8: Percentage of affordable homes on qualifying sites

At least the minimum requirement of affordable homes has been provided on all applicable sites and more in some cases during 2014/15, complying with our policy and increasing the stock of affordable homes.

The 79 affordable completions in 2014/15 formed part of developments, where the number of affordable homes achieved varied between 30% and 100% of the total residential units on each site. Blackwell House, Aldenham Road site conformed with the policy that applied at the time of approval which was 30% affordable housing (15 affordable units), rather than the 35% affordable housing presently required; this site also provided 7 additional affordable units, representing the 35% affordable housing due on the 'Rounton', Nascot Wood Road site. Two sites completing this year, at 23-25 Upton Road (29 homes) and 24-28 St Albans Road (28 homes), achieved 100% affordable housing.

Table 5-5: H8: Number of affordable homes provided 2014/15 and as % of gross housing completions on qualifying sites

Planning Permission No.	Address	No. of affordable homes per permission and % of permission's total housing units	No. of affordable homes completed 2014/15
11/00707/REM - Reserved matters re. 09/00905/OUTM	Blackwell House, Aldenham Road, adj. 28-34 the Larches	(15 – 30% of total 50 units) - extra 7 affordable homes provided re. Rounton, Nascot Wood Rd (35% of total 20 units), making 22 in total	22
12/01006/FULM	23-25 Upton Road, Watford, WD18 0JL	29 – 100% of total 29 units	29
13/00069/FULM	24-28 St Albans Road	28 – 100% of total 28 units	28
		Total	79 homes

Source: Watford Borough Council

By way of comparison, historical affordable data since 2006/07 is provided, together with totals for overall net housing completions. Please note that we also supply the percentages for 'affordable homes provided as average % of net housing completions' for information but this result is not representative of the effectiveness of our policy, which does not apply on sites with less than 10 units; also, on many large developments, all the affordable homes can be supplied in one particular year although there can be completions of other units in market housing over a number of years, so that lower percentages of affordable housing in some years are often compensated by higher percentages in other years.

Since 2006/07, the start of Watford's Local Plan Part 1 – Core Strategy 2006–31, there has been 1,151 affordable homes completed, an average of 128 affordable homes per annum.

Table 5-6: Affordable homes provided 2006/07 to 2014/15

	Affordable Homes provided	Net Housing Completions (includes market and affordable)	Affordable Homes provided as average % of Net Housing Completions
2006-07	11	246	4.5%
2007-08	72	291	24.7%
2008-09	48	327	14.7%
2009-10	224	516	43.4%
2010-11	356	633	56.2%
2011-12	95	417	22.8%
2012-13	184	541	34.0%
2013-14	82	398	20.6%
2014-15	79	246	32.1%

Source: Watford Borough Council, Planning Policy

N.B. To the year ending 31 March 2007, affordable housing completions monitored in this table are only those identified as a component part of a planning application - these do not include affordable acquisitions, if any. However from the 2008 reporting year, the planning definition for affordable completions was revised to include acquisitions and conversions as well as new-build completions.

5.9. H9: Affordable Housing Commitments

In addition to 422 affordable homes proposed with planning permission there are also currently another 849 affordable homes anticipated to come forward (as at 31 March 2015). The bulk of these (525 units) form part of the identified development scheme at Watford Junction. This makes a current total of 1,271 affordable homes anticipated to come forward over the period 2014/15 to 2030/31, around 28% of the estimated total 4,441 housing commitments outstanding. The total number of affordable homes anticipated is subject to schemes proving viable and funding being identified.

The five year assessment sites listing is available at Appendix 7 in this document and separately on our website to download; the full trajectory listing detailing all housing commitments is available from the Planning Policy team by e-mailing strategy@watford.gov.uk or writing to us at our address on the back page of this document.

5.10. H10: Gross Housing Completions 2006/07 to 2014/15 by size

More dwellings built during 2014/15 were two bedrooms (47.6%) as opposed to one bedroom (38.7%), in contrast to last year.

Less three bedroom properties have been built this year, decreasing to 8.1%, and overall the percentage of larger dwellings with three bedrooms or more has reduced to 13.6%, almost half the proportion of 26.9% of two years ago.

Table 5-7: H10: Gross Housing Completions 2006/07 to 2014/15 by size

	1 bed	2 bed	3 bed	4 bed	5 bed	6 bed+	Unknown	Total Gross Housing Completions

5.11. H11: Gross Housing Completions 2006/07 to 2014/15 by size and type

The proportion of flats that have been built in 2014/15 has increased to 84.1% in 2014/15, the highest it has been since 2010/11 when they represented 91% of total housing completions, the flat building peak for the period 2001/02 to 2014/15.

The proportion of houses built this year is almost half that of two years ago - 29% in 2012/13, having decreased to 15.9%.

The 2011 Census confirmed that there was a significant increase in flatted development in the borough between 2001 and 2011, with the proportion of the housing stock being flats increasing from 26.7% to 34.0%. This increase of 7.3% was entirely purpose-built flats, which increased from 19.7% in 2001 to 27% in 2011, whilst converted flats remained the same percentage of the stock, at 5.5% as did flats in a commercial building, at 1.5%.

As regards houses, the Census showed that the percentage declined by 7.1% overall, from 73.1% in 2001 to 66% in 2011; detached housing decreased from 11.6% to 10.5%, semi-detached housing decreased from 30.7% to 28.1% and terraced housing decreased from 30.8% to 27.4%.

5.12. H12: Housing density

As can be seen from Table 5-9, the average density for 2014/15 has increased to 101 dwellings per hectare (dpha) and is almost double the density of last year (53 dpha); the percentage of dwellings that are at a density greater than 50 dpha has also increased to 84%, reflecting the high percentage of flats completed this year.

Table 5-9: H12: Percentage of new-build dwellings (gross, not including conversions) completed by net density

	New Dwellings (Gross completions, excluding conversions)	Net Dev. Area (ha)	Average density per hectare	% dwellings less than 30 dpha	% dwellings between 30 and 50 dpha	% dwellings greater than 50 dpha
2006/07	226	2.83	80	3	6	92
2007/08	235	2.61	90	5	3	92
2008/09	264	4.79	55	6	26	68
2009/10	480	6.04	80	7	15	78
2010/11	543	3.62	150	1	8	92
2011/12	410	6.65	62	4	21	74
2012/13	521	7.81	67	4	32	64
2013/14	286	5.44	53	2	27	70
2014/15	190	1.87	101	3	14	84

Source: Compiled by Planning Policy, WBC and Information Management Unit, HCC

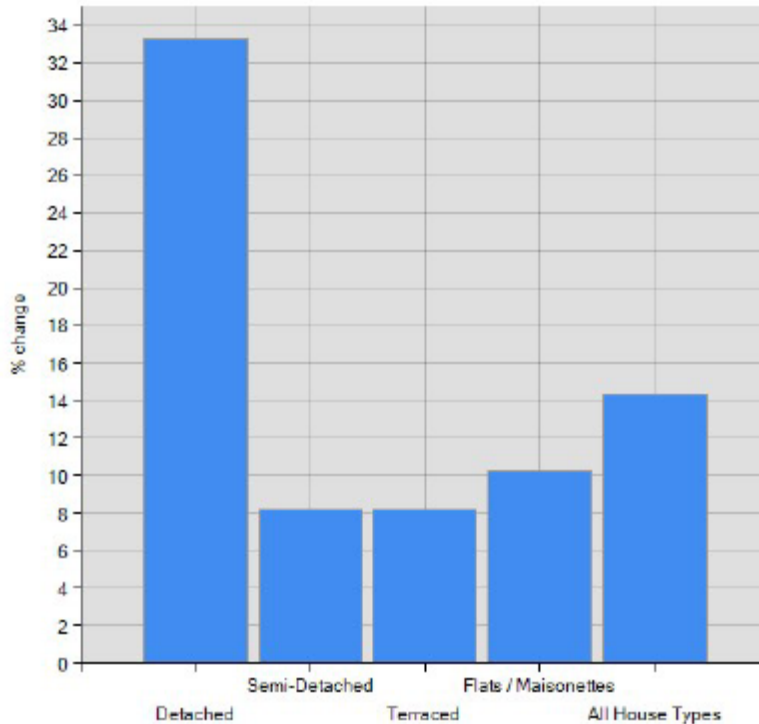

N.B. Please note these figures relate to new-build dwellings completed and exclude conversions for the purposes of density calculations. Percentages may not sum 100% due to rounding. Dpha = dwellings per hectare

The NPPF indicates that it is for local authorities and communities to decide for themselves the best locations and types of development in their areas. Policy HS2 in the Core Strategy deals with housing mix including density. Densities will vary according to the accessibility of locations, with the highest densities around the town centre and key strategic sites. Housing development will be required to make efficient use of land but in all areas the appropriate density for development will be informed by the Residential Design Guide (character area map) and the Watford Character of the Area Study, keeping with the character of the area appraisals and supporting the development of sustainable, balanced communities.

5.13. H13: Average house prices in Watford

The percentage change in house prices over the year to Quarter 1 of 2015 for all house types in Watford was an increase of around 14% (from £278,700 to £318,700), a more substantial increase than the 1% between Q1 of 2013 and Q1 of 2014.

This house price movement, together with that for each house type can be seen in the following diagram; detached properties show a larger 33% increase - please note that prices quoted are the average for the number of sales during a particular quarter and are not necessarily representative of the price one would expect to pay for a particular house in Watford.

Figure 5-3: House price movement in Watford - % change over year to 1st quarter 2015

Source: Office for National Statistics, via www.hertsllis.org

Table 5-10: H13: Average house prices in Watford, quarterly 2009-2015

Source: Land Registry house price data via HCC. Average prices rounded to nearest 100

N.B. Prices quoted are for sales during a particular quarter and are not necessarily representative of the price one would expect to pay for a particular house in Watford; 2014-15 data is provisional.

For comparison, at the 1st quarter 2015, the average price in Hertfordshire in respect of all house types was £376,000, more than Watford although Hertfordshire’s annual percentage increase was less at 10.3%. The average prices for all types of property were higher in Hertfordshire than Watford e.g. the average price of a detached property in Hertfordshire was 687,000, a semi-detached property was £416,200 and a flat, £215,800.

 N.B. Prices quoted are for sales during a particular quarter and are not necessarily representative of the price one would expect to pay for a particular house in Watford; 2014-15 data is provisional.

5.14. H14: House purchase affordability

The ratio of lower quartile house prices to lower quartile earnings for Watford during the period since 2006 was at its highest in 2007, decreasing over the next few years in the recession along with house prices, in a similar pattern to a lot of the country. The ratio is on the increase again, showing that purchasers in Watford need almost nine times their annual salary in order to buy a home, with a ratio of 8.8. Watford is more affordable than its surrounding neighbours and the Hertfordshire average of 9.4 (but higher than the national average of 6.5).

Figure 5-5: H14: House purchase affordability – ratio of lower quartile house prices to lower quartile earnings

Source: Base data extracted Oct 2015 from Communities and Local Government.
 N.B. This is the ratio of the lowest (25th) percentile of house prices in the area to the lowest (25th) percentile of earnings in the area. The 25th percentile is the value quarter of the way through the range when ordered from lowest to highest. The lower the ratio, the more affordable the housing relative to earnings.

It has been suggested that there has been more housing activity generally in the UK since the Government introduced the Help to Buy scheme in 2013 which enables people to buy a home priced up to £600,000 with a deposit of as little as 5%; the government states that the two elements of Help to Buy have supported 83,000 people across the UK buy their own home (March 2015).

In the period between 1 April 2013 and 30 June 2015 there were 71 purchases made in Watford using the Help to Buy Equity Loan scheme, of which 63 were first-time buyers – the government lends up to 20% of the value of a new build home.

Figures released for the period October 2013 to March 2015 in respect of the Mortgage Guarantee part of the Help to Buy scheme (which will run until 2016 and enables lenders to offer homebuyers 80% to 95% mortgages for both new build and existing housing) show there have been 58 loans completed in Watford.

A new product to help people saving for their first home, the Help to Buy ISA is due to be released in the autumn of 2015 (see www.gov.uk, for more details).

Within Watford, the 2011 census showed that the private rented sector increased from 9.8% of households in 2001 to 20.1%, an increase of 10.3%, at the expense of households in owner – occupied accommodation, which decreased from 72.2% in 2001 to 61.6% in 2011, either owned outright (26.1% decreased to 24.4%) or with a mortgage/loan (46.1% to 37.2%), an overall decrease of 10.6%.

The proportion of households living in social rented accommodation is unchanged at 16.3%, although rather than being largely rented from the council as in 2001, the majority are renting from Registered Social Landlords, such as the Watford Community Housing Trust (WCHT).

6. Business Development and Employment

The following indicators include employment data on newly built floorspace as well as information concerning changes of land use to and from employment.

Employment type is defined by planning Use Class Orders:

B1 – Business, encompassing:

- B1 (a) - Offices (other than those permitted in class A2 – Financial and Professional Services)
- B1 (b) - Research and development
- B1 (c) - Light industry
- B2 - General Industrial – carrying out an industrial process other than within class B1
- B8 - Storage or Distribution
- B0 - a mix of 'B' Uses.

Core Strategy policies EMP 1, EMP 2 and saved policies E1, E2 and E5 in the Watford District Plan 2000 deal with safeguarding employment provision.

Please note that if demolitions are involved, these can often take place in one year and the replacement premises are not completed until the following year (or years in the case of larger sites), which can sometimes be the cause of an apparent net loss.

Totals for each year since 2006/07 with respect to indicators BD1 – BD4 are provided in Appendix 8. The data in Appendix 8 shows that there has been a net loss of 66,412 sq.m. of 'employment' floorspace in Watford since 2006, with the largest loss of over 26,000 sq.m. to office floorspace. Further changes to employment floorspace are planned, as shown by indicator BD3. It is worth noting that in practice the B use class land uses are not the only ones which provide employment, with shops, schools, leisure uses and some types of office, for example, falling outside of the 'employment' land use class. Thus a loss of 'employment' floorspace does not necessarily correlate to a loss of employment opportunity.

The Core Strategy (adopted January 2013) identifies strategic site locations as Special Policy Areas, some of which are for major regeneration schemes: SPA2 Watford Junction (Watford Junction was Key Development Site no. RA6 in the WDP 2000), SPA3 Health Campus and SPA6 Western Gateway. Specific boundaries in respect of the SPAs will be allocated by the Site Allocations process, part of the Local Plan Part 2, including a revised Town Centre boundary in respect of SPA1 Town Centre. Any reference to employment areas in this report refers to those contained in the WDP 2000. The second consultation on Local Plan Part 2 ended on 4th February 2015; additional evidence is required to support the plan before submission for examination and further consultation will take place before the formal publication stage.

Economic growth is being encouraged and supported by the council. There is a new economic development strategy which will cover the period between 2015 and 2020; work started in November 2015 on a £150 million transformation of Charter Place, by Intu, to create extra retail and leisure space and a new IMAX cinema; preliminary works on the Croxley Rail link extending the Metropolitan line to Watford Junction Station have started and Watford Business Park is being regenerated. General

Watford Borough Council Monitoring Report 2015
updates on the progress of SPA2, SPA3 and SPA6 are provided under Local Indicator LT7 Development progress on major schemes.

At the end of October 2015, businesses voted to say yes to setting up a Business Improvement District (BID). A BID is a business-led partnership which enables coordinated investment in the management and marketing of a commercial area. It will be funded by a 1.25% levy charged to those businesses in the area covered by the BID that have a rateable value of over £10,000 and will deliver activities and initiatives that will enhance the look and feel of the town, to secure it's future, maintaining and improving the footfall, through increased marketing, promotion and events - especially while the Charter Place redevelopment works are underway.

Over the next few months, the Town Centre Partnership Board will be busy putting in place staff and the new company structure to ensure that everything is in readiness for 1 April 2016 to start to deliver against the Business Plan. It is set to deliver around £3 million of investment in a range of exciting town centre projects over the next five years and provide a coordinating voice to unite its businesses and communities.

6.1. BD1: Amount of employment floorspace completed in Watford and employment areas

BD1 (i): Total amount of additional employment floorspace in Watford LA

Table 6-1 illustrates changes to employment floorspace (gross internal floorspace) completed within the borough during 2014/15.

Table 6-1: BD1 (i): Amount of employment floorspace completed in LA

BD1 (i)	B0	B1	B1a	B1b	B1c	B2	B8	Total
Gross gain sq.m.	0	0	596	0	0	0	715	1311
Loss sq.m.	0	38	10276	0	439	823	355	11931
Net sq.m.	0	-38	-9680	0	-439	-823	360	-10620

Data Source: Planning Policy, WBC and HCC via CDPSmart monitoring system

Any negative value is a loss.

N.B. Category B1a is also captured under BD4 where the same figure is quoted.

There were minimal gains to employment floorspace in the B use classes during 2014/15. A net loss of 10,620 sq.m. of employment floorspace has occurred during the past year, with over 91% of the reduction in office space. The three largest losses to office floorspace were in employment areas and are detailed below under BD1 (ii); the remaining loss of office space was over a dozen smaller sites, primarily changing to residential use, which will result in some 74 homes; this includes a mixed use development at 36 Clarendon Road, (also in an employment area) where demolition has taken place; the proposals include 2,220 sq.m of brand new office floorspace on the frontage with 34 flats behind. The planning permission states that the office element will result in an increase in the quantity and quality of office floorspace on the site and will contribute towards providing new employment within the Borough. Although the residential element is not strictly in accordance with the land allocation, the scheme remains employment led and is considered to accord with the overall objectives of the Core Strategy.

Most of the office redevelopment overall had planning permission rather than taking place under the prior approvals procedure associated with permitted development rights, which only accounted for around 450 sq.m. loss of office floorspace.

However, a larger impact of the revised permitted development rights is expected in later years from the prior approvals not yet implemented (see BD3).

BD1 (ii) Amount of additional employment floorspace completed in emp. areas

Employment Areas are where the council seeks to protect the land for employment use; these areas have been reviewed and changes to allocations or boundaries will be made within the Local Plan Part 2 process.

Current data is based on employment areas identified within the Watford District Plan 2000 where the council seeks to protect the land for employment use (saved policy E1) and Table 6-2 shows the amount of floorspace developed in those areas.

86.5% of net employment floorspace lost in Watford occurred in the employment areas, most of which was comprised of the three largest losses of office floorspace during 2014/15, as detailed below:

- 5,820 sq.m. of office floorspace lost was due to the change of use to a hotel at 65-67 Clarendon Road, which was considered justifiable in this central location, close to Watford Junction Station, as hotels play an important role in supporting business uses by providing accommodation for visiting staff and customers, and conference facilities
- 1,309 sq.m. at Imperial Way was a change of use to a gym (D2), where the offices had been vacant for over a year and a half and efforts to market it as offices had been unsuccessful
- a change of use to a centre for exercise therapy and rehabilitation services (for those with neurological conditions such as are caused by spinal or brain injuries) for 700 sq.m. of office space at Rhodes Way was permitted, as it provided a valuable health facility on a site which is believed to have stood empty for six years.

These exceptions to our policies designed to protect employment have been made where other material considerations outweigh the harm that may be caused by loss of employment floorspace; each application is considered on its merits.

In response to the higher employment projections and the preparation of up to date evidence on the need for employment space in future, we expect to seek additional office space to replace such losses and provide for expected increases in the demand for office space. This need is a material consideration in determining planning applications now, and is being addressed through policies and allocations in Local Plan Part 2.

Table 6-2: BD1 (ii): Amount of employment floorspace completed in employment areas in year, as % of total net sq.m completed in year in Watford

BD1 (ii)	B0	B1	B1a	B1b	B1c	B2	B8	Total
Total net sq.m. in LA	0	-38	-9680	0	-439	-823	360	-10620
Net sq.m. in emp.areas	0	-38	-8366	0	0	-823	40	-9187
% of Watford's net sq.m. in emp.areas	N/A	100.0%	86.4%	N/A	0.0%	100.0%	11.1%	86.5%

Data Source: Planning Policy, WBC and HCC via CDPSmart monitoring system

N.B. Any negative value is a net loss

6.2. BD2: Total amount of employment floorspace on PDL

Previously developed land (PDL) often referred to as brownfield land, is that which is or was occupied by a permanent structure, excluding agricultural or forestry buildings; also excluding land in built-up areas such as private residential gardens, parks, recreation grounds and allotments (the full definition is contained within the NPPF).

Table 6-3: BD2: Total amount and % of employment floorspace on PDL

BD2	B0	B1	B1a	B1b	B1c	B2	B8	Total
Gross gain sq.m.in L.A.	0	0	596	0	0	0	715	1311
Gross gain sq.m. on PDL in L.A.	0	0	596	0	0	0	715	1311
% on PDL	N/A	N/A	100%	N/A	N/A	N/A	100%	100%

Data Source: Planning Policy, WBC and HCC via CDPSmart monitoring system

It is shown that 100% of employment development within Watford took place on previously developed land, exceeding the Core Strategy target of 90%. It can be seen from Appendix 8 that no greenfield land has been used for any employment development during the Local Plan period monitored since 2006/07.

6.3. BD3: Employment land available by type

BD3: Employment land available by type in Watford (sites for which planning permission has been granted, but not implemented)

Outstanding planning permissions and prior approvals which have not yet been implemented could result in a small net loss of about 1,100 sq.m. of B use class employment floorspace.

The proposed gross gain to employment floorspace for which planning permission has been granted, totals nearly 33,100 sq.m. Almost 70% of the total involves extensions to employment floorspace or brand new construction, a minority of which are replacement buildings, with the remaining 30% involving changes of use between the B classes.

Watford Health Campus includes approximately 12,200 sq.m. of mixed B use class floorspace, representing around 37% of the current proposed gross gain. The planning permission incorporating both outline and detailed elements for the mixed-use Watford Health Campus was issued by the council on the 6 January 2015, following completion of a S106 planning obligation. Also included is over 7,300 sq.m. of other employment generating floorspace.

Table 6-4: BD3: Employment floorspace available in Watford - with planning permission, not yet implemented

BD3	B0	B1	B1a	B1b	B1c	B2	B8	Total
Proposed gross gain sq.m.	0	2898	7019	2139	3677	4225	13125	33083
Proposed gross loss sq.m.	0	4105	17488	0	1650	1945	8998	34186
Proposed net gain or loss sq.m.	0	-1207	-10469	2139	2027	2280	4127	-1103

Data Source: Planning Policy, WBC and HCC via CDPSmart monitoring system

N.B. Any negative value is a net loss. Area figure of proposed gain to employment land in hectares is shown annually for the period 2006/07 to 2014/15 in Appendix 8. This does not necessarily equate to floorspace sq.m, which can be over a number of floors.

Just over half of the total proposed gross loss of almost 34,200 sq.m. is to office floorspace, nearly 17,500 sq.m. The majority of the proposed gross loss to office floorspace, 55% is due to the revised permitted development rights which came into effect in May 2013, termed as prior approvals, most of which are changes of use to residential.

With regard to the overall gross proposed loss to employment floorspace:

- 34% could result in almost 400 new dwellings. The sites providing the most residential units (none of which are in employment areas) are at Rembrandt House, Whippendell Road providing 107 homes (37 of which are affordable); 62 flats at 110 The Parade High Street (under a prior approval), and 56 flats at 52a-56 High Street, 45 of which are affordable.
- 43% of the gross proposed loss is due to changes within the B use classes, rather than an actual loss of employment floorspace.
- 13% is for the proposed Watford University Technical College.
- The remaining 10% is made up of changes of use to Use classes other than 'B' or demolition where the proposed use is not yet known.

6.4. BD4: Total amount of floorspace for 'town centre uses'

'Town centre uses' encompasses the completed amount of floorspace in respect of retail (A1), financial and professional services (A2), office (B1a), and leisure (D2) development, which ideally should be concentrated in the town centre as opposed to less central and less accessible locations. Business Development data in this report uses the existing town centre boundary as per the Watford District Plan 2000, although this is being reviewed as part of the ongoing Site Allocations process within the Local Plan Part 2.

Table 6-5: BD4: Total amount of completed retail, financial and professional services, office and leisure development: within the local authority area (LA) and town centres (TC)

BD4 - total gain in LA	A1	A2	B1a	D2	Totals
Gross gain sq.m. in LA	890	217	596	2863	4566
Loss sq.m. in LA	3191	919	10276	3260	17646
Net change sq.m. in LA	-2301	-702	-9680	-397	-13080
BD4 - gain in TC	A1	A2	B1a	D2	Totals
Gross gain sq.m. in TC	645	0	0	0	645
Loss sq.m. in TC	1649	0	515	0	2164
Net change sq.m. in TC	-1004	0	-515	0	-1519
% gained in TC of total gross gain to LA in each use class	72%	0%	0%	0%	14%

Data Source: Planning Policy, WBC and HCC via CDPSmart monitoring system

NB: Floorspace is specified as square metres, not confirmed as gross internal floorspace and any negative value under net change is a net loss.

B1a total in LA is the same data included within Indicator BD1

There has been little new development in the town centre, mainly the relocation of the market to the rear of the ex-Clements/TJ Hughes building and there has been a net loss to retail within the town centre (most of which has changed to A3, restaurants and cafes). This makes up the largest part of the overall net loss to traditional town centre uses in the town centre. The majority of the small amount of office space lost in the town centre was with regard to permitted development for a change of use from office space on the upper floors to residential at 18-24 The Parade. The officer's report, in summary, states that prior approval is not required due to the sustainable location with a range of services and transport facilities close by, with no material change to traffic.

Within the borough as a whole, there were small gains to retail by changes of use e.g. from a car showroom and a tyre shop but an overall net loss; 40% of the total gross A1 loss changed to A3 restaurant uses, 14% has been changes within the above use classes A1/A2/B1a/D2, 25% to other business uses and 20% is changing to residential. There were a number of small gains to A2; the majority (56%) of the loss to A2 was a change of use to office floorspace, with the remainder changing to residential. The changes in office floorspace have already been expanded on under the BD1 (ii) indicator.

A major gain to D2 Assembly and Leisure has been the spectator stand with 2,600 seats erected at Vicarage Road Stadium, together with extra facilities at ground level; the greatest part of the loss to D2 was the demolition of the Bill Everett Centre, which is proposed to be a housing site by the draft Local Plan Part 2.

6.5. BD5: Losses of employment floorspace (completed sites only)

This indicator relates to site areas where the redevelopment to 'non-employment uses' outside of the traditional business B use classes has been completed during this monitoring year and will not necessarily correlate with floorspace figures in BD1 which concern 'B' employment uses only.

i) in employment areas = 7,905 sq.m./0.787 ha

The largest part of this loss (7,829 sq.m.) or 99% was from B1a Offices, as detailed under Indicator BD1 (ii) to a hotel, health and fitness premises and a centre for exercise therapy and rehabilitation; the remaining loss was from a workshop to a weight loss/wellbeing centre.

ii) in Local Authority Area =9,840 sq.m./ 1.08 ha

Almost all the total employment floorspace lost in Watford (9,343 sq.m. or 95%) has been to office space, with the largest developments in the employment areas, as above.

There has been a total of 1,834 sq.m employment floorspace lost to residential development, which is the majority of the remaining employment floorspace lost outside the employment areas resulting in 38 dwellings completed during 2014/15.

6.6. BD6: Total jobs recorded in Watford

Watford's Core Strategy seeks a minimum of 7,000 additional jobs in the district during 2006-2031. The figure for total jobs includes employees, self-employed, government-supported trainees and HM forces.

Table 6-6: BD6: Total jobs recorded in Watford

2006	2007	2008	2009	2010	2011	2012	2013
60,000	59,000	58,000	72,000	73,000	74,000	76,000	82,000

Data Source: Crown Copyright. Office for National Statistics. August 2015.

We have strong reservations about the figures shown for total jobs in data from the Office of National statistics. It should be noted that the data between 2008 and 2009 shows a marked increase of 14,000 jobs but this data should be treated with caution – we believe the density and jobs figure have been overstated due to an anomaly in the reporting process, by an employment agency based in Watford reporting positions both within and outside Watford. However, we can be confident in that the more recent figures show an increasing trend in the number of jobs.

The Core Strategy jobs target was based on employment forecast data provided by the East of England Forecasting Model (EEFM) in 2009/10. In order to exclude the above anomaly, we will be using the total jobs figures, not including employment activities, from the EEFM Forecasting Model, to monitor progress of job growth, as endorsed by Nathaniel Lichfield and Partners, who undertook an Economic Growth & Delivery Assessment on our behalf late 2014.

The latest published data from the EEFM, (dated 8 January 2015) with a 2014 baseline, suggest a scale of job growth in Watford of 10,200 from 2006 to 2015 (job growth has been calculated using the total jobs figure, less those that are designated employment activities, as explained in the previous paragraph); the EEFM projections imply total job growth of 18,100 for the period 2006 to 2031.

6.7. BD7: Job Density

For comparison with other areas, we need to look at job density which is the number of jobs per residents of working age 16-64. High job densities are where there is at least one job for every working-age resident, a ratio of 1.0 and Watford’s total jobs equate to a high job density of 1.32. Historically, Watford has had a higher job density than the county, region and country, despite our reservations explained earlier about the total jobs figures quoted in recent years.

The recession saw Watford’s job density decrease from 1.07 in 2007 to 1.02 jobs per working-age resident in 2008, and has since fluctuated around 1.23 until recent recordings showed 1.25 in 2012 and 1.32 in 2013. This is higher than all the districts in the county; Welwyn Hatfield, at 1.10, is the only other district that has a job density greater than 1. For comparison, Hertfordshire’s job density is 0.86, the region’s is 0.78 and England’s is 0.80, and by these standards, it is indicated that Watford is a relatively healthy economy.

Figure 6-1: BD7: Jobs density 2007-2013 representing the ratio of total jobs to working-age population (includes males and females aged 16-64)

Data Source: Crown Copyright. Office for National Statistics. Aug 2015.

N.B. Watford and England values are labelled on the above chart

The density figures represent the ratio of total jobs to population aged 16-64 (historical density figures have been revised following updated working age population figures). The figure for total jobs includes employees, self-employed, government-supported trainees and HM Forces.

6.8. BD8: Number of Employee Jobs in Watford

The Business Register and Employment Survey (BRES) has supplied data since 2009 on employee jobs (not to be confused with the total jobs/jobs density figures which include employees, self-employed, government-supported trainees and HM forces). Please note that all job numbers are rounded to the nearest 100 in accordance with ONS regulations.

The total for employee jobs in Watford in 2014 is 78,200, an increase of 13,000 jobs (almost 20%) since 2009; 58.1% of all employee jobs are based in Central ward, which is in and around the town centre.

Watford has the largest proportion of part-time employee jobs (38,900) recorded, as opposed to full-time jobs, compared with all the districts in Hertfordshire at 49.8%; for comparison, St. Albans has the next largest proportion that are part-time, with 39.4% and the Hertfordshire average is 34.6%.

The proportion of Watford's full-time employee jobs as compared to part-time jobs has reduced from 57.8% in 2009 to 50.2% in 2014. The largest drop by 4.3% was during 2009/10, declining more slowly during 2010/11 recovering slightly in 2011/12 and decreasing again over the last two years by a total of 3.7%. Business administration and support services is the group most affected by this change; in 2014, there is a much higher amount of part-time employees (22,900 or 87.4%) recorded in Business administration and support services compared with full-time (3,200 or 12.2%), whereas the split was 69% (12,200) part-time/31% (5,400) full-time in 2009. There are also more part-time workers than full-time workers in the groups Accommodation and food services and Education but to a far lesser extent.

Although many people work part-time by choice, as well as some loss of jobs in a recession, it also results in reduced hours and more part-time working which appears to be continuing.

6.9. BD9: Percentage of Employee Jobs by Industry Groups – Watford 2014

Business administration and support services is the largest group recorded with 26,200, 33.5% of all employee jobs, mainly in Central ward (24,300); this group also has grown the most (by 48%) since 2009, from 17,700 to 26,200.

The second largest industry group is Professional, (11,000 or 14.1% of all employee jobs) with the second largest growth (by 46.8%) up from 7,500 or 11.5% of all employee jobs in 2009; this group has also had substantial growth of numbers of full-time positions, by 3,000 (or 51%).

The third largest group is Retail (9,000 or 11.5%) which has slightly increased (by 5.4%) from 8,500 in 2009 but decreased as a proportion of all employee jobs, down from 13% in 2009. Retail is split almost 50/50 between full and part-time. Information and Communication, which although as a group is a relatively small portion of all employees at 4.6%, had the third largest growth proportionally (by 36%), around 1,000 employees.

The group with the highest drop in employee jobs since 2009 is Public Administration (currently 1,100 or 1.4% of all employee jobs) decreasing from 2,000 jobs in 2009 (by 43.7%), followed by Transport and Storage (including postal), which has decreased by about 800 (by 32.3%) to 1,700 or 2.1% of employee jobs.

Figure 6-2: BD9: % of Employee Jobs by Industry Groups – Watford 2014

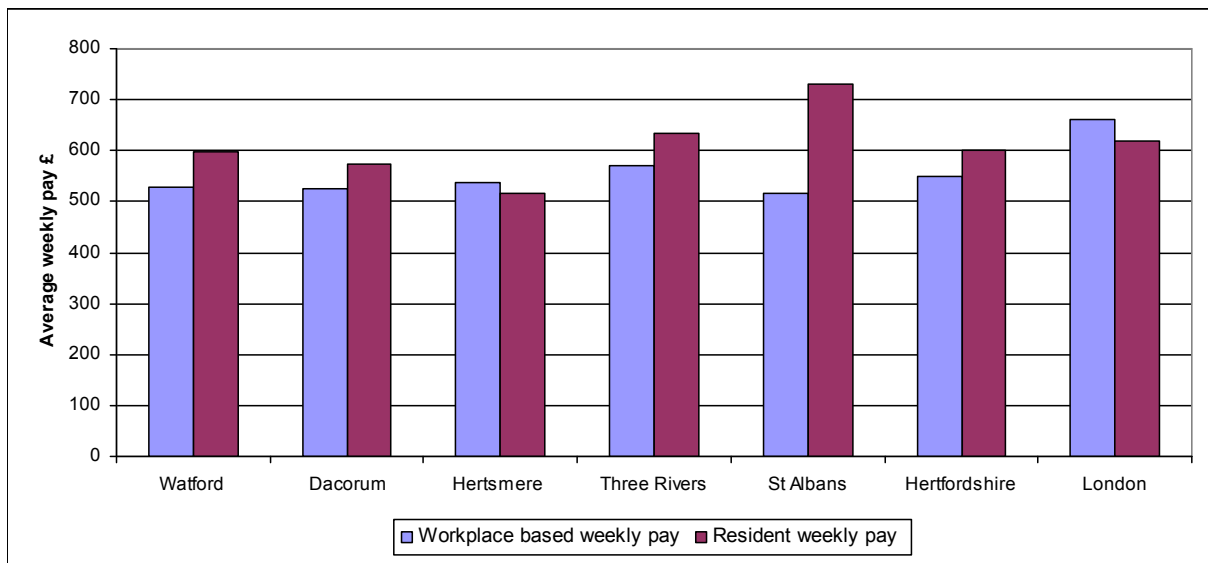

Data Source: Business Register and Employment Survey (2014) – ONS © Crown copyright reserved

Major employers in the district include Haden Young Ltd, Mirror Colour Print Watford Ltd, Asda, Marks and Spencer, Tesco Stores Ltd, Watford Borough Council, J Sainsbury PLC and John Lewis. Watford has an established office market concentrated around Clarendon Road in the town centre, with convenient access via Watford Junction.

6.10. BD10: Earnings by residence - Gross weekly pay – all full time workers

Workplace earnings in Watford (£529.70) are lower than the earnings of Watford residents (£597.80), many of whom commute to higher paid areas such as London. A similar picture can be seen in neighbouring districts, apart from Hertsmere, which is the nearest to London of the districts illustrated and where workplace earnings are higher than those of residents, as in London itself.

Figure 6-3: Workplace based weekly pay/resident based weekly pay analysis

Source: ONS Annual Survey of hours and earnings – workplace/resident analysis, www.nomisweb.co.uk Jul 2015
 N.B. Median earnings in pounds

Average earnings for Watford residents have dropped in 2014, as in Hertfordshire and the Eastern region, although the average for England has increased slightly. The earnings of Watford residents remain higher than the county, regional and national average.

Table 6-7: BD10: Earnings by residence - gross weekly pay - full time workers

	Watford	Herts	East of England	England
2007	568.5	*	479.9	464.0
2008	583.9	569.4	499.0	484.5
2009	571.4	577.5	509.5	495.9

6.11. BD11: Earnings by workplace – Gross weekly pay – all full time workers

Average workplace earnings in Watford have also dropped in 2014 and are now lower than the county average; there have been slight increases in the county, regional and national average.

Table 6-8: BD11: Earnings by workplace - gross weekly pay - full time workers

	Watford	Herts	East of England	England
2007	434.4	-	450.5	463.6
2008	514.6	517.5	469.1	483.9
2009	506.2	517.5	478.6	495.0

6.12. BD12: Count of active enterprises in Watford

The number of active enterprises and business start-ups and closures provide an indicator of the level of entrepreneurship and of the health of the business population.

Table 6-9: BD12: Count of active enterprises in Watford

2007	2008	2009	2010	2011	2012	2013
3,705	3,785	3,860	4,010	3,945	4,035	4,390

Source: ONS: Business demography dataset @ Sep 2015.

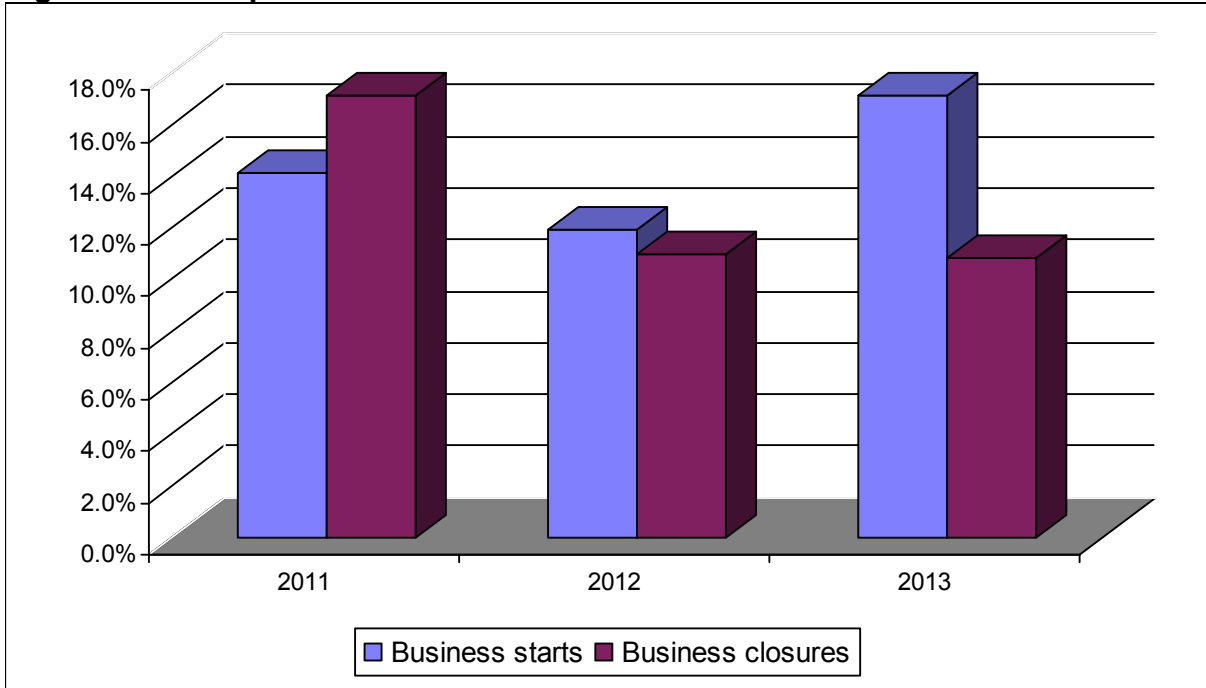

The count of active enterprises in Watford shows a mostly increasing trend, despite a slight drop in 2011, standing at the number of 4,390 in 2013. This equates to 709 active enterprises per 10,000 working age population (mid-2013), higher than the 2012 equivalent of 663 active enterprises per 10,000 working age population (mid-2012).

6.13. BD13: Comparison of percentage of business starts and closures

Business starts in Watford have increased significantly to 17.1% (750) of total active enterprises (4390) recorded (latest 2013 figures released), up from 11.9% the previous year. The number of business closures decreased slightly to 10.8% (475) of active enterprises.

This indicates greater confidence in and a healthier economy, which is reflected in figures for the county, the region and nationally, which all show an increased percentage of more business starts than closures. However, the high percentage of business starts in Watford indicates that business activity is particularly buoyant here; the decline of 2011 has been reversed, especially evident by the graph below.

Figure 6-4: Comparison of Watford's % of business starts and closures

Source: ONS: Source data from Business demography dataset @ Sep 2015 – chart compiled by WBC, Planning Policy.

Table 6-10: BD13: Comparison of % of business starts and closures 2011-13

Area	2011		2012		2013	
	Business starts	Business closures	Business starts	Business closures	Business starts	Business closures
Watford	14.1%	17.1%	11.9%	11.0%	17.1%	10.8%
Hertfordshire	10.8%	12.6%	11.3%	10.7%	14.1%	10.0%
East	9.7%	12.0%	10.6%	10.3%	13.3%	9.5%
England	10.4%	13.1%	11.6%	10.8%	14.4%	9.8%

6.14. BD14: Claimant Count Comparison 2008-15

The official unemployment rate is published monthly at a national and regional level (but not at district level) from the Labour Force Survey and the definition of unemployed is those who are without a job and want a job, have actively sought work in the last four weeks and are available to start work in the next two weeks or out of work, have found a job and are waiting to start it in the next two weeks.

Secondly, the 'claimant count' is the number of people claiming Jobseeker's Allowance, and this is a useful indicator of unemployment trends and also is available at a more local level. The Jobseeker's Allowance (JSA) is payable to people under pensionable age who are available for, and actively seeking, work.

The impact of the recession caused numbers of claimants to more than double between July 2008 and 2009, in all Hertfordshire districts.

Table 6-11: BD14: Claimant Count and change

Area	July 2009		July 2010		July 2011		July 2012		July 2013		July 2014		July 2015		2013/15 % decrease
	number	rate	number	rate	number	rate	number	rate	number	rate	number	rate	number	rate

Welwyn Hatfield	1,951	2.7	1,836	2.5	1,840	2.5	1,755	2.4	1,647	2.2	1,141	1.5	901	1.2	45.3%

Data Source: Crown Copyright. Office for National Statistics via www.nomisweb.co.uk

N.B. Claimants of Universal Credit are not yet included in the Claimant Count.

N.B. Rates are a proportion (%) of resident population of the area aged 16-64.

Unemployment rates across most of the county have been steadily decreasing since 2011, dropping more markedly since 2013. Watford's claimant count has decreased by 45.3% between July 2013 and 2015 to 919, a proportion of 1.5%, the lowest it has been since pre-recession in 2008. However, Watford's claimant count rate of 1.5% is above the Hertfordshire average of 1.1% and only Stevenage's 1.8% is higher within the county.

Figure 6-5: BD14: Claimant Count Comparison 2008-2015

Data Source: Crown Copyright. ONS. N.B. % is a proportion of resident working age population.

There is a less obvious downward trend in totals of long term claimants (claimants for more than one year). During June 2015, 23% of Hertfordshire claimants had been claiming for 12 months or more. Three Rivers had the least proportion of long term

claimants, at 18%, with Watford second at 19%, whilst Stevenage had the highest proportion at 32%.

Generally in Hertfordshire, claimants aged 55 and over are the most likely to be long term claimants (35% of the age group were long term claimants), while claimants aged 18 to 24 were least likely (11% of the age group were long term claimants). In Watford, long term claimants had decreased to a total of 170, less than half that of July 2013 (405) and down from 270 in July 2014; the proportion of these that were aged 55 and over was 29%, second to Three Rivers' 27%, with just 3% aged 18 to 24, the lowest in the county.

6.15. BD15: GCSE results, percentage of pupils achieving 5+ A* - C

At the time of the 2011 Census, 8% of the resident population in Watford were school pupils or full-time students aged 16-74 years, up from 6% ten years ago. A skilled workforce supports the economic development and employment objectives in the Core Strategy.

2013/14 results are not comparable to earlier years due to changes in methodology. In the academic year 2013/14, 73.8% of pupils in Watford achieved 5 or more GCSEs graded A* to C, compared to the national average of 65.8%, and the regional average of 65.5%.

Table 6-12: BD15: GCSE and equivalent results at end of stage 4 by school location - percentage of pupils achieving 5+ A* - C for 2013/14 (revised)

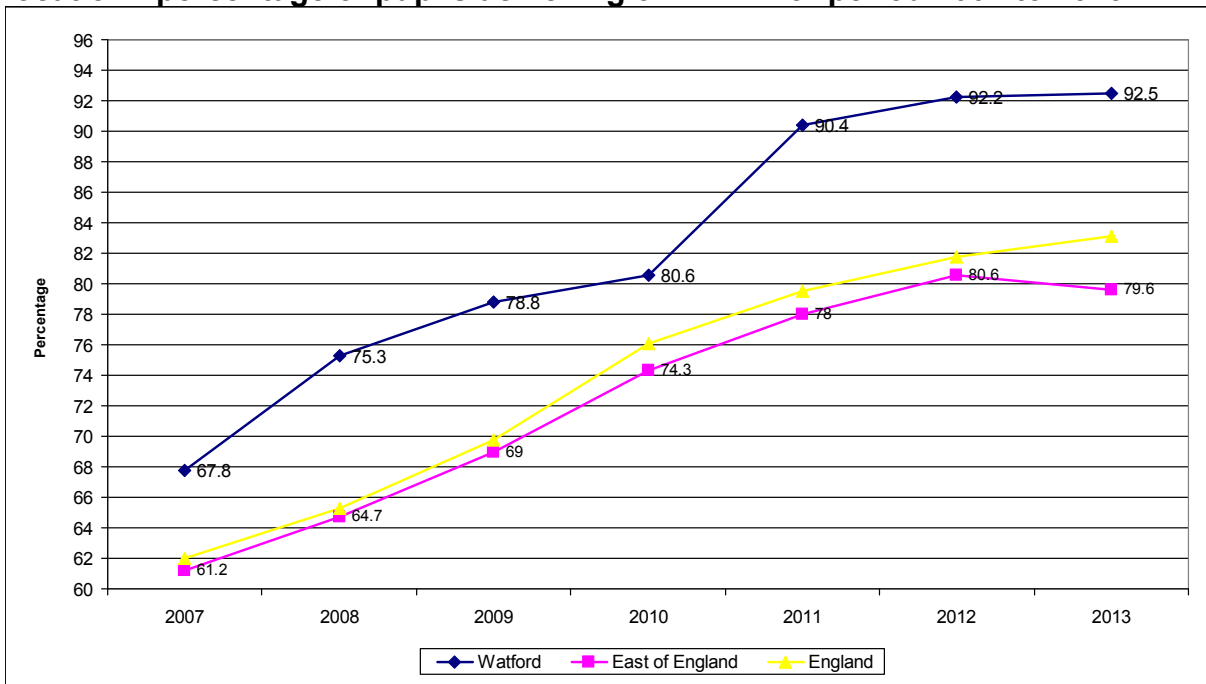

Local Authority	Number of pupils	5+ A*-C grades	5+ A*-C grades inc. English and mathematics GCSEs
Broxbourne	1,158	67.9	59.8
Dacorum	1,601	65.6	58.0
East Hertfordshire	1,961	80.9	73.3
Hertsmere	1,290	73.6	67.3
North Hertfordshire	1,136	75.7	68.5
St Albans	2,006	80.1	73.0
Stevenage	1,178	56.5	51.0
Three Rivers	998	84.1	79.9
Watford	790	73.8	69.1
Welwyn Hatfield	898	66.9	59.7
East	63,701	65.5	57.2
England	556,002	65.8	56.8

Data Source: Department for Education via www.gov.uk (published 2015).

N.B. This data covers pupils at the end of key stage 4 in the 2013/14 academic year in state-funded schools only. New methodology applied to 2013/14 data, which is not comparable to earlier years.

Below are the previous annual results, which show that there have been increasing trends generally across the country in GCSE attainment, with a higher percentage of pupils based in Watford schools achieving 5 or more GCSEs at grade A* to C, increasing by nearly 25 percentage points between 2007 and 2013.

Figure 6-6: BD15: GCSE and equivalent results at end of stage 4 by school location - percentage of pupils achieving 5+ A* - C for period 2007 to 2013

Data Source: Department for Education via www.education.gov.uk Sep 2014

N.B. The results printed in this dataset are not comparable with previous years due to a shift from age-based reporting to stage-based reporting in 2006-07.

6.16. BD16: Qualifications of working age population

There has been a mostly increasing trend in Watford over the last few years in qualifications held although there have been slight decreases during 2013 and 2014. Overall, since 2007, the percentages of Watford's working age resident population with qualifications held in NVQ 1 to 4 have risen between 7% and 10.5%, the greatest increase being in degree level qualifications (NVQ4+). There is a small proportion of 5.9% with no qualifications.

However, over the past year, the percentage of Watford residents with degree level qualifications has decreased by nearly 6% from 48.1% to 42.2%, and is now less than the Hertfordshire average of 43.5% and neighbouring local authorities of Dacorum (44.8%), Three Rivers (48.8%) and St Albans (58.8%); Hertsmere is lower at 37.9%.

Table 6-13: BD16: Qualifications of working age resident population (age 16-64)

Watford	Jan-Dec 2007	Jan-Dec 2008	Jan-Dec 2009	Jan-Dec 2010	Jan-Dec 2011	Jan-Dec 2012	Jan-Dec 2013	Jan-Dec 2014	% change 2007-14
% with NVQ4+	31.7	25.9	29.7	31.5	35.8	43.7	48.1	42.2	10.5
% with NVQ3+	53.4	44.9	49.6	48.1	50.4	63.5	59.8	60.9	7.5
% with NVQ2+	68.8	58.7	66.0	66.9	71.9	81.0	77.4	75.8	7.0
% with NVQ1+	79.1	70.5	77.7	76.7	85.2	93.0	88.2	88.5	9.4
% with other qualifications	11.3	17.6	15.6	15.3	6.4	4.2	7.3	5.5	-5.8
% with no qualifications	9.7	11.9	6.8	8.1	8.4	2.8	4.5	5.9	-3.8

Source: ONS Annual Population Surveys (Jan 2007-Dec 2014).

N.B. Data was reweighted March 2015 in line with the latest ONS estimates.

Definitions of qualification levels:

NVQ4 and above: e.g. HND, Degree and Higher Degree level qualifications or equivalent

NVQ3 and above: e.g. 2 or more 'a' levels, advanced GNVQ, NVQ3 or equivalent

NVQ2 and above: e.g. 5 or more GCSEs at grades A-C, intermediate GNVQ, NVQ2 or equivalent

NVQ1 and above: e.g. fewer than 5 GCSEs at grades A-C, foundation GNVQ, NVQ1 or equivalent

Other Qualifications: includes foreign qualifications and some professional qualifications

No qualifications: no formal qualifications held (the sample size for Watford is too small to be considered reliable)

7. Sustainable Development

7.1. S1: Number of planning permissions granted contrary to the advice of the Environment Agency on flooding and water quality grounds

The National Planning Policy Framework is clear about the need to avoid inappropriate development in the highest areas of flooding and there is National Planning Practice Guidance providing advice on flood risk. The Surface Water Management Plan prepared and kept under review by Hertfordshire County Council, identifies areas which may be at risk of flooding from local sources.

There is a proposed policy, SD9 Managing Flood Risk, in the Local Plan Part 2, to ensure that development is designed to minimise the risk of flooding and steered towards sites and areas with lower flood risk (whilst not increasing flooding elsewhere) which will replace the saved Watford District Plan policy, SE27 Flood Prevention.

The council also consults the Environment Agency (EA) on certain types of planning applications received, such as all large sites over one hectare and any major planning applications in flood risk areas. The EA produces annual reports of objections made on flood risk ground and water quality grounds; please note that the EA report lists all objections, including those subsequently resolved.

- During 2014/15, the EA did not object to any planning applications in Watford on the grounds of water quality.
- There was one objection received on the grounds of flood risk relating to the application 14/00327/FULM, a restoration project in Cassiobury Park, where an unsatisfactory Flood Risk Assessment was initially submitted. The scheme was subsequently amended and received positive comments from the Environment Agency at a later stage.

The council is guided in granting planning permission through the advice of the Environment Agency, and in accordance with the Core Strategy objectives. These include avoiding development on areas at risk of flooding unless appropriate mitigation measures are put in place (Policy SS1) and also aim to minimise water consumption, surface water run-off and non-fluvial flooding whilst protecting water quality (Policy SD2).

7.2. S2: Average household water use (litres per head per day)

During 2014/15, the figure provided by the Environment Agency (EA) for household water use in England was 139 l/h/d average per capita consumption (PPC). Wales does not come under the remit of the EA since 2013/14.

The Environment Agency has advised us that the water companies subdivided their resource zones two years ago and these cannot be matched with the local authority districts and in some cases cover a much wider area. The EA no longer routinely collects address point data and as such the figures provided are a best estimate of average PPC for each administrative area.

Also, Affinity Water (who covers most of Hertfordshire) is still working to improve its data collection and analysis for its new water resource zones and the company

Watford Borough Council Monitoring Report 2015 reports that there is a margin of error (approx 10%) on the current data. This can give rise to fluctuation in the reported PCC data on an annual basis. As such any comparisons between years should recognise the margin of error in the data.

Taking this into account, the data provided by the Environment Agency still shows a mostly reducing trend since 2001 has been recorded for Watford and Hertfordshire.

However, Hertfordshire's Quality of Life Report states that, for Affinity Water's Central region, the unmetered per capita consumption has seen an increase since 2012, with a year on year (2013 to 2014) change of 3.8%.

Affinity Water supplies water to the majority of Hertfordshire's population and published their Water Resources Management Plan in 2014; this sets out how they will manage the balance between future supply and demand for water for the next 25 years, until 2040. The key outcomes of the plan are to manage the demand for water through schemes that help to reduce consumption by reducing leakage and actively promoting water efficiency, whilst installing domestic water meters, as well as increasing the amount of water available for supply, where licensing and the environment allows.

Table 7-1: S2: Average household water use (litres per head per day – l/h/d)

	2000/01	2008/09	2009/10	2010/11	2011/12	2012/13		2013/14	2014/15
Watford	175.2	174.5	170.5	166.3	166.7	155.2	Watford	Not.avail	143.4
Herts	173.3	163.4	165.9	163.2	160.5	148.0	Herts	148.0	148.3
England and Wales	149.0	145.6	146.0	146.6	144.7	142.0	England	141.0	139.0

Source: Contains Environment Agency information © Environment Agency and database right
 N.B. The data provided at district or county level is calculated and based upon data for each water company water resource zone. It is therefore an estimate of household water use. Figures are provided since 2008/09 with 2000/01 for historic comparison. Affinity Water reports that there is a margin of error (approx 10%) on the current data 2014/15.

There is a specific policy, SD11 Water Consumption, proposed in the Local Plan Part 2, that any development should be designed to protect water resources e.g. rain water harvesting, harvesting and recycling of grey water, using water efficient appliances, green roofs and walls, water efficient landscaping/irrigation and drought proof planting. The council will continue to work with HCC and other local authorities, the Environment Agency, water companies and developers in order to reduce water consumption.

7.3. S3: Renewable Energy

Policy SD3 within the Core Strategy supports and encourages the use of renewable energy sources.

Not all renewable energy installations require planning permission; small scale domestic installations may be considered permitted development. Contributed capacities are often not supplied in planning applications where renewable energy is included, but they are provided in the following tables where available.

S3 (i) Renewable energy developments granted in 2014-15

Policy SD3 Climate Change in the Core Strategy states that all new developments must maximise the use of energy efficiency and energy conservation measures, incorporating renewable energy to reduce the overall energy demand and CO2 emissions. Water saving measures, such as SuDS and green roof systems should also be incorporated. New development will also be required to include a commitment to climate change adaptation and mitigation from design stage.

As well as individual householders buying in to the concept of renewable energy by having solar panels fitted to their existing properties there is evidence that various forms of renewable energy are increasingly being incorporated into the designs for new residential development and other developments for community use, such as schools.

Table 7-2: S3 (i): Renewable Energy Developments granted in 2014-15

 N.B. Unknown capacities are shown as -

S3 (ii) Renewable energy developments completed in 2014-15

There does appear to have been a slightly increasing trend over a period of years in the number of applications identified as including renewable energy sources; as previously mentioned, we cannot positively identify all renewable energy developments as capacities have not been consistently available, and smaller scale domestic renewable energy installations are often permitted development.

Table 7-3: S3 (ii): Renewable energy/sustainable homes developments completed 2014-15

Permission Reference	Completed Date	Address	Renewable Power Source	Capacity (kW) if known	Code for Sustainable Homes Rating (if applicable)
11/00707/REM	24/06/2014	Blackwell House, Aldenham Road, Watford		-	4.68 to 83 points
12/01006/FULM	09/09/2014	23-25 Upton Road, Watford, WD18 0JL		-	4.68 to 83 points

Data Source: WBC, Planning Policy and HCC
N.B. Unknown capacities are shown as –

The adopted Core Strategy requires all new development to comply with updated national standards on sustainable development. There are also proposed policies in the Local Plan Part 2 in support which include Policy SD5 Sustainable Design Standards, Policy SD6 Sustainability Statement, Policy SD7 Renewable Energy Technology, supporting renewable energy technology where feasible and viable and Policy SD8 Decentralised Energy, supporting decentralised energy networks.

7.4. S4: Per capita Carbon Dioxide (CO₂) emissions

The Core Strategy policy, SD3 Climate Change, includes a target of reducing Carbon Dioxide (CO₂) emissions; estimates of CO₂ emissions from the Department of Energy and Climate Change can be used to measure local contributions to climate change.

As can be seen from the accompanying table, emissions reduced in 2013 and there has been a mostly reducing trend in emissions in Watford since 2006, in line with policy objectives. There was an increase in emissions in 2012 but this was the same in 92% of local authorities across the country; the main drivers of the increase in UK emissions in 2012 were an increase in residential gas use due to 2012 being a colder year than 2011, and increased coal for electricity generation.

Table 7-4: S4: Watford per capita CO2 emissions 2005-13

Year	Industry and Commercial	Domestic	Road Transport	Total
2005	2.7	2.4	1.3	6.5
2006	2.7	2.4	1.4	6.5
2007	2.6	2.3	1.3	6.3
2008	2.8	2.3	1.2	6.3
2009	2.5	2.0	1.1	5.7
2010	2.6	2.1	1.1	5.8
2011	2.1	1.8	1.0	5.0
2012	2.5	2.0	1.0	5.5
2013	2.3	1.9	1.0	5.2

Source: Extracted from Local Authority CO2 dataset published 25/6/15 by Dept. of Energy & Climate Change (DECC) <http://www.decc.gov.uk> Figures are quoted in tonnes (t) CO2.

Watford Borough Council has been championing the climate change agenda with its own Carbon Management Strategy. This set out a five year plan to reduce greenhouse gas emissions (GHG) from our own operations by 30%, against a 2009/10 baseline to 2015. An overall reduction of 29% has been achieved and the last Carbon Emissions Report of the 5 year plan is due to be published late 2015. It is important to note that one of the factors in the reduction is the outsourcing of services such as street cleansing and waste and recycling to Veolia; apart from no longer including externally managed buildings, the set of properties used for the calculations are as consistent as possible in order to make the Carbon emissions reports comparable year on year. For more information please see <http://www.watford.gov.uk/greenhousegasemissions>

7.5. S5: Air Quality Management Areas and Air Quality monitoring

The council monitors air quality at several locations across the borough; six Air Quality Management Areas (AQMAs) were designated in 2006 as a result of exceeding the annual mean objective for nitrogen dioxide (a traffic related pollutant) in some parts of the borough. The air quality problem in Watford is predominantly a result of emissions from road vehicles, as is the case elsewhere in the UK.

In 2009, a Further Assessment of air quality concluded that the six AQMAs be redesignated to four revised areas. The revised AQMAs are currently:

- Watford AQMA 1: St Albans Road
- Watford AQMA 2: Vicarage Road
- Watford AQMA 3A: Aldenham Road and Chalk Hill
- Watford AQMA 5: A405/Horseshoe

In addition, the council produced an Air Quality Action Plan, designed to improve air quality in the revised AQMAs and an updated report was written following public consultation in 2012. The full Air Quality Action Plan, as well as a summary leaflet can be accessed on our website www.watford.gov.uk/airquality

On Rickmansworth Road close to the Town Hall, continuous ‘real-time’ monitoring of nitrogen dioxide and PM₁₀ particulates is undertaken. The monitoring of PM_{2.5} particles will commence in 2016. Whilst there is no air quality objective for PM_{2.5} particles, concentrations of this pollutant are a useful health indicator. The monitoring has been funded by the county council’s public health team, who have also funded monitoring in the other Hertfordshire Authorities, which will allow a pollutant baseline to be established across the county.

The council also monitors nitrogen dioxide concentrations at 17 sites around the borough, using diffusion tubes. These are low-tech devices that allow long term trends, patterns and baselines to be identified.

Current and historical monitoring results, as well as other useful air quality information is available from Herts & Beds Air Pollution monitoring Network website www.hertsbedsair.net

A summary of the annual data for 2009-2014 at the Town Hall site is provided in the following table.

Table 7-5: Air Quality Data for Town Hall site

Town Hall site	2009	2010	2011	2012	2013	2014
Nitrogen Dioxide: Annual mean concentration µg/m ³ - (annual mean objective is 40 µg/m ³)	39	39	39	38	39	40
Nitrogen Dioxide: Number of Exceedences of hourly mean objective (200 µg/m ³)	0	1	0	1	0	0
PM10 Particles: Annual Mean Concentration µg/m ³ (annual mean objective is 40 µg/m ³)	22	24	25	22	24	21
PM10 Particles: number of exceedences of 24-hour Mean (24-hour mean objective is 50 µg/m ³) *	0	7	20	13	7	6

Source: Environmental Health & Licensing Section, WBC; originally downloaded from www.hertsbedsair.org.uk/hertsbeds/asp/AdvStats.asp

- It can be seen that NO₂ concentrations have remained fairly constant and that the annual mean objective of 40 µg/m³ has not been exceeded during this time at the Town Hall monitoring station (although the 2014 figure was close).
- There was one hour during 2010 and again in 2012 where the hourly average of NO₂ was above 200 µg/m³. This is well below the limit of 18 hours allowed as per the NO₂ hourly mean objective of 200 µg/m³.
- The annual mean PM10 concentration recorded at Watford Town Hall has been between 21 and 25 µg/m³, well below the objective of 40 µg/m³.

- The number of PM10 exceedences of the 24-hour mean objective of 50 µg/m³ is well within the permitted 35 exceedences per year.

In addition concentrations across the nitrogen dioxide diffusion tube network have decreased in recent years and there are now only four sites where results suggest that the National Air Quality Objective level could be exceeded.

The council therefore needs to carry out a 'Detailed Assessment' of air quality across the borough, with a view to checking whether the current boundaries of the Air Quality Management Areas need to be amended.

8. Green Infrastructure, Sport and Recreation

8.1. G1: Change in areas of biodiversity importance

Priority habitats are local nature reserves, wildlife sites, 'Sites of Special Scientific Interest' (SSSIs) and 'Regionally Important Geological Sites' (RIGS).

The site boundaries and records for Wildlife Sites and Regionally Important Geological Sites (RIGS) are maintained by Herts Environmental Records Centre (previously HBRC) hosted by the Herts and Middlesex Wildlife Trust.

The February 2015 report shows that there has been four new sites ratified (two in East Herts and two in Dacorum) and three sites de-ratified (two in East Herts and one in Hertsmere). No change is recorded in the number of wildlife sites for Watford; there has been a nominal change in total area recorded from 247.2 hectares to 246.93 hectares. Herts Environmental Records Centre checked and updated the boundaries of around 800 Local Wildlife Sites across the county in 2014. The boundaries are updated to Master Map quality; areas of building or hard road are removed and boundaries are made more consistent with survey documentation where appropriate. This is reflected in small changes in area of many sites, and large proportional change in area of a few sites within the county.

There are no Regionally Important Geological Sites (RIGS) or Sites of Special Scientific Interest (SSSI) situated within Watford. There is a site with SSSI designation that is owned and managed by Watford Borough Council, which is Whippendell Wood – it is adjacent to the borough boundary but geographically within Three Rivers. Natural England lists the whole of Whippendell Wood as ancient wood i.e. it is believed to have been continuously wooded for at least 400 years. Of particular importance is the semi-natural vegetation, the rich variety of fungi in the wood and the invertebrate fauna. Whippendell Wood has a management plan which takes into consideration all the requirements of maintaining a SSSI.

Five of the wildlife sites in Watford are also designated Local Nature Reserves – Albans Wood, Harebreaks Wood, Lairage Land, Cassiobury Park and Garston Park – and these offer a variety of accessible habitats, birds and wildlife.

The council, in partnership with local 'Friends of' groups, made up of local residents, regularly organises events such as river clearance, scrub removal and tree planting to encourage and support our wildlife.

HERC, as ecological advisors to most planning authorities in the county manages a protected species GIS layer and will pick up any planning application affecting an important species.

Table 8-1: G1: Change in areas of biodiversity importance in Watford

	2010 no.	2010 area (ha)	2011 no.	2011 area (ha)	2012 no.	2012 area (ha)	2013 no.	2013 area (ha)	2014 no.	2014 area (ha)	2015 no.	2015 area (ha)	Difference 2014 to 2015
LNRs	5	94.67	5	94.67	5	94.67	5	94.67	5	94.67	5	94.67	0
Wildlife sites	34	260.17	34	260.51	33	256.05	27	247.8	27	247.2	27	246.93	Nominal change recorded in area
SSSIs	0	0	0	0	0	0	0	0	0	0	0	0	N/A
RIGS	0	0	0	0	0	0	0	0	0	0	0	0	N/A

Source: HERC and WBC, compiled by Planning Policy, WBC

N.B. LNRs = Local Nature Reserves; SSSIs = Sites of Special Scientific Interest;

RIGS – Regionally Important Geological Sites.

Wildlife sites:

- The decrease between 2011 and 2012 was due to a boundary revision - a site having originally been designated as being along the boundary between Watford and Three Rivers, but since found to be solely within Three Rivers.
- the decrease between 2012 and 2013 was due to de-selection of 6 sites not for any reason of deterioration but rather the review of existing data held at the Records Centre on some of the species wildlife sites, mainly the reptile and amphibian sites during this period; it was found that they did not actually meet the selection criteria when strictly applied although this did not mean that the species were no longer present. Across the county, there were a total of 96 sites de-selected, most for similar reasons, with only about 5 sites de-selected due to deterioration.

The areas may continue to vary from year to year with the addition and de-selection of sites, as well as major boundary amendments (particularly to Wildlife Sites). Throughout the year, there are also numerous minor changes to boundaries as new information becomes available (e.g. the removal of areas with no ecological value). Re-digitising is also necessary when Ordnance Survey baseline mapping data is updated.

8.2. G2: Change in priority habitats and species

Watford Borough Council is actively looking at how it can improve the wildlife value of all the sites it manages. Although Watford is a highly urban borough, it maintains conditions for a great deal of wildlife, including rare species, to thrive.

However, it is impractical for districts to attempt to calculate specific numbers of particular species and any loss to development, due to a lack of resources including time, money and expertise. Data is periodically published where available, including changes in bird populations and changes in butterfly numbers and species, although data is generally only available at county level, rather than district level. It should be noted that the surveys to obtain the data on birds and butterflies are mostly carried out by volunteers and enthusiasts in their own time.

Birds

'The `State of the UK's Birds 2012' report presents updated and wide ranging information on surveys over many decades. Particular headlines of relevance to Hertfordshire include:

- Despite long term declines since 1970, woodland and wetland bird trends have shown slight improvements since 2009
- Farmland birds continue to decline and are now at their lowest, half of their 1970 level

- Numbers of 'all' native species of wintering wildfowl and waders rose steadily from the mid 1970s to the late 1990s, and then stabilised before entering a shallow decline
- A number of priority species have shown recovery largely due to BAP conservation focus, including bitterns

Butterflies

The UK Butterfly Monitoring Scheme <http://www.ukbms.org/> reported that 'Washout 2012' was the worst year for UK butterflies on record with 52 out of the 56 species monitored suffering declines. The relentless rain and cold of 2012 created disastrous conditions for summer-species in particular as they struggled to find food, shelter and mating opportunities; butterfly abundance plummeted to a record low as a result and 13 species suffered their worst year on record.

2013 was overall a better one for butterflies in Hertfordshire, with the warm dry summer balancing out the cold, wet spring. Comparing 2013 with a baseline calculated using 2005-2009 data, of the 35 species, 14 have decreased in numbers and 21 have increased in numbers or remained static. Based on distribution, 18 have increased their range and 8 have decreased, with the others unchanged. Long term trends emerging from the data suggest there may be a 5-6 year cyclical pattern of increasing and decreasing population overall, although this masks changes at the species level and does not attempt to show the historic decline in numbers known to have occurred.

For more information, please see the Wildlife and Habitats section of Hertfordshire's Quality of Life Report <http://www.hertsliis.org/env/qualityoflife/qolreport/> (N.B. no change in 2015 to information provided in 2014).

Core Strategy Policy GI3 and saved WDP 2000 policies SE36, SE37 and SE 39 are designed to protect natural habitats important for priority species or rare species and conserve and enhance biodiversity, including the appropriate management and expansion of wildlife corridors.

8.3. G3: Amount of open space managed to Green Flag Award standard

- **Our target to maintain the amount of open space managed to Green Flag Award standard has been exceeded in 2015, with the addition of Callowland Recreation Ground. This brings the amount of open space managed to Green flag Award standard to 115.67 hectares, which represents 37% of Watford's total open space managed (311.31 hectares) as at 31 March 2015.**

Watford now has six award-winning parks, with Green Flags awarded in 2015 to St. Mary's Churchyard and Callowland Recreation Ground for the first time, following on from the addition of Oxhey Park in 2014. It is the seventh consecutive year that Woodside Playing Fields and Cheslyn Gardens have been awarded the Green Flag and the ninth year for Cassiobury Park. Cassiobury Park has also been named the 10th top park out of over 1500 in the 'Keep Britain Tidy People's Choice awards.

Maintaining the amount of open space managed to Green Flag Award standard is paramount; seeking further Green Flags for Watford was one of the aims of the action plan in 'A Green Spaces Strategy for Watford 2013-2023' adopted in November 2013.

The Green Flag is awarded as a means of recognising and rewarding the best green spaces in the U.K. and is a sign of the highest environmental standards in recreational green areas. Restoration of nationally listed tombs, enabled by WBC application for funding from the Heritage Lottery fund, was also an important factor in St. Mary's Churchyard. Watford Borough Council staff along with park rangers and ground maintenance staff from our partners, Veolia, together with great volunteers, have worked hard to make this achievement possible.

Table 8-2: G3: Amount (hectares) of eligible open spaces managed to Green Flag award standard

	2008/09	2009/10	2010/11	2011/12	2012/13	2013/14	2014/15
Alban Woods	3.31	3.80	N/A	N/A	N/A	N/A	N/A
Lairage Land	5.26	4.40	N/A	N/A	N/A	N/A	N/A
Harebreaks Woods	5.61	5.23	N/A	N/A	N/A	N/A	N/A
Cassiobury Park	75.77	74.88	74.88	74.88	74.88	74.88	74.88
Garston Park Nature Reserve	6.00	6.36	N/A	N/A	N/A	N/A	N/A
Cheslyn Gardens	1.11	1.12	1.12	1.12	1.12	1.12	1.12
Woodside Playing Fields (exc. Alban Wood)	22.21	21.56	21.56	21.56	21.56	21.56	21.56
Goodwood Recreation	3.83	3.72	N/A	N/A	N/A	N/A	N/A
St.Mary's Churchyard	0.40	0.41	0.41	0.41	0.41	0.41	0.41
Oxhey Park	N/A	N/A	N/A	N/A	N/A	14.00	14.00
Callowland Rec.	N/A	N/A	N/A	N/A	N/A	N/A	3.70
Total	123.50	121.48	97.97	97.97	97.97	111.97	115.67

Data Source: Environmental Services/Planning Policy, WBC. Figures have been rounded to two decimal points. N.B. See www.greenflagaward.org.uk for criteria of the Green Flag Award
The difference between 2008/09 and 2009/10 measurements was due to implementation of GIS and a resulting improvement in accuracy.

The reduction between 2009/10 and 2010/11 was due to cost cutting and service prioritisation.

8.4. G4: Change in total open space managed by WBC

- There has been no change during 2014/15 in the total amount of open space managed by WBC, recorded as 311.31 hectares.

Table 8-3: G4: Change in total hectares of open space managed by WBC

2008/09	2009/10	2010/11	2011/12	2012/13	2013/14	2014/15	Change in hectares between 2013/14 & 2014/15
339.94	311.31	311.31	311.31	311.31	311.31	311.31	0.00

Data Source: Planning Policy, WBC. Figures have been rounded to two decimal points.

N.B. The change between 2008/09 and 2009/10 measurements was due to implementation of GIS and a resulting improvement in accuracy.

The council successfully bid for external funding from the Heritage Lottery Funding/BIG Lottery funding for Cassiobury Park; grants totalling £5million have

been received, alongside WBC funding of up to £2 million, using monies collected from S106 planning agreements. Works are taking place at the park and completion is estimated spring 2017. Plans include:

- a revamped pools facility
- a new sustainable park hub building, which will include catering facilities, park management office, changing facilities, toilets, visitor centre and education/community room.
- improving the Cha café tea pavilion
- reintroducing the historic and Grade II listed bandstand from its rather forlorn situation near the Town Hall, so it can be brought back into more use for arts, music and events in the park
- restoration of the historic 18th century Lime Avenue
- providing an on site park manger, community park ranger and education officer

More details of the proposals can be found at <http://www.watford.gov.uk/ccm/content/leisure-and-community/cassiobury-park-heritage-lottery-fund-restoration.en>

This follows site works and improvements to Callowland Rec., Oxhey Park, King George V Playing Fields, Waterfields Rec, Watford Heath, Riverside Rec. and the council's two cemeteries, completed in 2014, equating to an investment of £1.8 million.

Watford Borough Council commissioned work to assess playing pitch and changing facilities and the Parks Department has developed a Sports Facilities Strategy 2015-2025 (available on our website) which examines the issues and will inform future direction for sports provision in the Borough.

The importance of open space in Watford's urban environment is recognised and protected by Core Strategy Policy GI1: Green Infrastructure and GI2: Green Belt, and also addressed by the saved planning policies from the Watford District Plan 2000, L8: Open Space Provision in Housing Development and L9: Children's Play Space.

8.5. G5: Maintain the general extent of the Green Belt

The predominantly urban nature of Watford means that the protection of its surrounding Green Belt land is of particular importance. The adopted Local Plan Part 1, Core Strategy, Policy GI2, sets out the broad approach of retaining the existing Green Belt boundary while dealing with any boundary inconsistencies that have emerged since the Watford District Plan 2000 was prepared. In line with this, emerging Local Plan 2 Policy GI9 sets out the minor changes to the Green Belt to correct existing anomalies and create defensible Green Belt boundaries in the Local Plan.

Table 8-4: G5: Maintain the general extent of the Green Belt in Watford

2012	407 ha
2013	407 ha
2014	407 ha

Source: Watford Borough Council

N.B. Please note that whilst the official 'Local Planning Authority Green Belt Statistics' England 2014/15 quote a figure of 410 hectares for Watford as all figures within this publication are quoted to the nearest 10 hectares.

Electronic mapping of the Green Belt onto our GIS system was undertaken in June 2012 and the resulting measurement of 407 hectares equates to 19% of Watford's total area. This base figure of 407 ha is a result of more accurate measuring and does not show any loss in Watford's Green Belt – in 2003, Watford's Green belt was measured as 406 hectares.

There will be a general presumption against inappropriate development in the Green Belt. Exceptions to this are defined in paragraphs 89-91 of the NPPF.

From the evidence available, it seems that our policies are serving to protect our biodiversity, along with the council co-ordinating with a broad partnership of local organisations and actively improving the wildlife value of all the sites it manages.

9. Urban Design and Built Heritage

Urban design is the process of shaping the physical setting for life in cities, towns and villages. It is the art of making places. It involves the design of buildings, groups of buildings, spaces and landscapes, and establishing the processes that make successful development possible.

Watford Borough Council expects developers to follow current best practice when designing new buildings and delivering new development, to be in accordance with Core Strategy Policy UD1 'Delivering High Quality Design' and has also produced a number of guides to assist:

9.1. Design Guides

- The **Shopfront Design Guide** was adopted by the council as a Supplementary Planning Document in February 2013. It is intended to provide helpful guidance for designing new shopfronts or making alterations to existing ones. The document sets out a range of design principles for works to shopfronts and is an important material consideration in the determination of related planning applications received by the council.
- The aim of the **Watford Streetscape Guide 2013**, adopted by the council in July 2013, is to assist and provide guidance for those involved in the design and implementation of public realm works in Watford's town centre, to ensure that a high quality, consistent and coordinated public realm is implemented in Watford's town centre.
- The **Residential Design Guide (RDG)** for Watford provides detail on designing new residential development in the Borough, both in relation to extensions to existing buildings and larger scale development of new residential units. A revised version of the Residential Design Guide was adopted by the council on the 23rd July 2014, replacing the previous 2008 version.

9.2. U1: Housing Quality – Building for Life Assessments

It is Watford Borough Council's aim to improve the quality of design build, and Building for Life assessments were started in 2010; subsequently, the format of Building for Life assessments was revised nationally in 2012.

The revised format is based on the National Planning Policy Framework and the Government's commitment to build more homes, better homes and involve local communities in planning. The process involves trained officers making assessments following a number of set questions, which has been reduced from 20 to 12. The applicable developments (where there are 10 units or more) have been scored using the traffic light system proposed, but numerically, with green for the highest scoring = 1; amber = 0.5; red = 0; so the overall highest score available is 12.

Figure 9-1: Former Fire & Ambulance Station development, Whippendell Road

Table 9-1: U1: Building for Life Assessments - 2013/14 completions

Permission ref.	Development or Site Name	Proposed units	Net comps 2013-14	Score out of 12
08/01378/FULM & 11/00300/FULM	Cassio College, Langley Road (Assessed in 2012/13)	223 + 3	36	10
08/00440/REM	Former Fire & Ambulance Station, 562-572 Whippendell Rd	90	18	10.5
09/00835/FUL	Former West Herts College, Leggatts Campus	217	111	6
10/01236/FULM	132-136a High Street, 3-9 King Street & 13 Smith Street	24	24	9.5
11/00057/FULM	Elm Cot, North Orbital Road	11	10	8.5
11/00272/FULM	Gammons Farm Close	14	14	8
11/00428/FULM	Land Adjacent to Woodside Leisure Park, North Orbital Road	12	12	9
11/00756/REM	756,758 & 758a St Albans Road	14	14	8
11/01248/FULM	Croxley View (Garage Compounds)	16	16	10

Compiled by Planning Policy, WBC.

N.B. Completions prior to 2013/14 are not included in the above table.

The scores for the sites assessed for 2013/14 average at 9, slightly less than the previous year's 9.5, but an improvement on the average of the scores seen in 2011/12 which was 8.8.

The findings of these assessments are shared with colleagues in order to see how future schemes can achieve better quality design. Unfortunately, the council has been unable to carry out the assessments for 2014/15 due to a lack of resources.

As a new format was introduced in 2012, results are not directly comparable with earlier years. It is hoped the current version 'Building for Life 12', will have a lifespan of 7 to 10 years. Details of the BFL 12 assessment criteria can be viewed at the following link:

<http://www.designcouncil.org.uk/our-work/CABE/Our-big-projects/Building-for-Life/>

Figure 9-2: Former garage compounds, Croxley View

The preservation and enhancement of our cultural heritage is important to allow the community and future generations to experience and enjoy it and forms part of making Watford a better place to live in, a key objective in the Corporate Plan 2013-17.

A partnership project resulted in the restoration of the Christ Church War Memorial in the summer of 2014, in time for the World War One centenary commemorations. The Coal Duty Obelisk in Waterfields Recreation Ground, the War Memorial on High Road, Leavesden and the Horse Trough on Leavesden Road were also renovated in 2014.

Major improvement works were carried out to the town centre and completed in the summer of 2014. These included new street furniture, lighting, trees and paving, with enhancements to the pond and a new events space, which has succeeded in hosting all kinds of events such as the Imagine festivals, the Big Skate – the outdoor ice rink, the Big Beach and the Big Screen.

As part of the Cassiobury Park restoration works, the Grade II listed bandstand currently situated near the Town Hall, will be reintroduced to the park, restoring some of the historical character.

The council aims to conserve and enhance the built environment of the town through careful control of development and design, and protection of historic assets as outlined in Core Strategy policies UD1 'Delivering High Quality Design' and UD2

'Built Heritage Conservation'; supplied is the current status of indicators which were introduced in the Core Strategy in order to monitor our progress.

9.3. U2: Conservation Character Area Appraisals

The conservation areas in Watford are:

- Civic Core Conservation Area
- Estcourt Conservation Area
- Grove Mill Lane Conservation Area
- High Street/King Street Conservation Area
- Macdonnell Gardens Conservation Area
- Nascot Conservation Area
- St Mary's Conservation Area
- The Square Conservation Area
- Watford Heath Conservation Area
- Oxhey Conservation Area

Conservation area character appraisals were completed for the first nine conservation areas before our target of 31 March 2012. Oxhey was designated a new conservation area in the spring of 2013 and the final character appraisal document was adopted by the council in July 2014. A complete map of conservation areas in Watford is available on our website www.watford.gov.uk together with all the character appraisals and the Conservation Areas Management Plan.

The council has committed to updating the Character Appraisals for the conservation areas every five years and four draft revised Character Appraisals on the Civic Core, Estcourt, Nascot and St Mary's Conservation Areas have been produced. A four week consultation was undertaken from 6 November until 4 December 2015.

9.4. U3: Conservation Area Management Plan

Following consultation, the Conservation Areas Management Plan was subsequently adopted by Watford Borough Council Cabinet on 8 July 2013. The document contains various indicators which will help to monitor change when it is reviewed and updated, together with the character appraisals; the aim is to carry out a review every five years.

Locally listed buildings have been designated as such because of their local architectural and/or historic value, and any development adversely affecting these buildings will be resisted. On the 13 December 2010, Watford Borough Council Cabinet approved the revised register of Locally Listed Buildings in Watford, at that time numbering 240 locally listed buildings. Since that date, the road bridge over the River Gade, Grove Mill Lane was added to the register of Locally Listed Buildings on 30 January 2012, while Sugden House, 2 Farm Field was upgraded from locally listed to statutory listed status. 36 Clarendon Road has been demolished as part of planning permission 14/00531/FULM – although there will be harm to the town's historic environment through the loss of this building, the building itself was not considered to be of significant merit and its potential use was very limited. The decision was made that the loss would be outweighed by achieving a high quality

office building to meet the employment needs of the town - see www.ukplanning.com for further details.

Nationally listed buildings are buildings or structures that have been judged to be of national historical or architectural interest. Listing ensures that the architectural and historic interest of the building is carefully considered before any alterations, either internally or externally, are agreed.

These are included on a register known as the statutory list, drawn up by the Department of Culture, Media and Sport (DCMS) under the Planning (Listed Buildings and Conservation Areas) Act 1990, and assisted by English Heritage (EH). This was reviewed and there are now 92 statutory list entries for listed buildings in Watford. The changes made to the previous 94 list entries include three de-listings:

- Original Salter's Hall gates, which were moved in 1989 to Salter's Hall, 4 Fore Street, London, EC2Y 5DE
- Nicholl tomb and Deacon/Kent tomb, St. Mary's Churchyard

There was also one addition:

- Sugden House, 2 Farm Field was upgraded from locally listed and designated as a Grade II Listed Building on the 2 July 2012.

9.5. U4: Buildings on listed buildings at risk register

The majority of listed buildings are well maintained; however, a small but significant number have been neglected and are under threat. In 2011, the council produced a survey of the listed buildings at risk in Watford (available online through the link provided). This survey is being used as our baseline, with the intention to update this survey every five years; listings of the affected structures at that time are provided below:

Table 9-2: U4 (i): Buildings in risk category 1 - 3 ('at risk') 2011

ADDRESS	BUILDING TYPE	GRADE	CONSERVATION AREA	CONDITION	OCCUPANCY	RISK
Clutterbuck Tomb, St Mary's Churchyard.	Chest Tomb (LB ref 10/74 C)	Grade II	Yes (St Mary's)	Poor	0	3
Dalton/Clest Tomb, St Mary's Churchyard.	Chest Tomb (10/74D)	Grade II	Yes (St Mary's)	Very Bad	0	1
Dundas Tomb, St Mary's Churchyard.	Chest Tomb (10/74G)	Grade II	Yes (St Mary's)	Poor	0	3
Deacon Stacey Tomb, St Mary's Churchyard.	Chest Tomb (10/74H)	Grade II	Yes (St Mary's)	Poor	0	3
Fawcett Tomb, St Mary's Churchyard.	Chest Tomb (10/74 I)	Grade II	Yes (St Mary's)	Poor	0	3
Tomb 5m East, St Mary's Churchyard.	Chest Tomb (10/74K)	Grade II	Yes (St Mary's)	Poor	0	3
Five Arches Viaduct, Water Lane.	Railway Viaduct (4/25)	Grade II	No	Poor	0	3
Bridge 163, Grove Wharf, Grand Union Canal.	Canal Bridge (274/20)	Grade II	No	Poor	0	3
Little Cassiobury, Hempstead Road.	House (4/23)	Grade II*	Yes (Civic Core)	Poor	Vacant	3
Frogmore House, Lower High Street.	House (4/26)	Grade II*	No	Poor	Vacant	3

Table 9-3: U4 (i): Buildings in risk category 4 ('vulnerable') 2011

ADDRESS	BUILDING TYPE	GRADE	CONSERVATION AREA	CONDITION	OCCUPANCY	RISK
97 High Street.	Shop and upper floors (LB ref 10/51)	Grade II	No	Fair	In Use	4
Bushey Arches.	Railway bridge (4/27)	Grade II	No	Fair	0	4
Morison Tomb, St Mary's Churchyard.	Chest Tomb (10/74 E)	Grade II	Yes (St Mary's)	Fair	0	4
Tomb 10m South of chancel of St Mary's, St Mary's Churchyard.	Chest Tomb (10/74 F)	Grade II	Yes (St Mary's)	Fair	0	4
Gates to Salter's Almshouses, Church Road.+	Gateway (4/17 A)	Grade II	Yes (Nascot)	Fair	0	4
Old Station House, 147A St Albans Road.	Former Station house/office (4/19)	Grade II	Yes (Nascot)	Poor	In Use	4
Watford Tunnel archway.	Tunnel Entrance (3/12)	Grade II	No	Unclear	0	4

+ Original gates were moved in 1989 to Salter's Hall, 4 Fore Street, London, EC2Y 5DE.

However, following restoration work, the following structures are no longer considered to be 'at risk':

- Clutterbuck Tomb, Dalton/Guest Tomb, Dundas Tomb, Deacon/Stacey Tomb, Fawcett Tomb, Morrison Tomb, Tomb 5m East, Tomb 10m South of chancel of St Mary's, St Mary's Churchyard.
- Gates to Salter's Almshouses, Church Road.
- Bridge 163, Grove Wharf, Grand Union Canal.
- Bushey Arches.
- Old Station House, 147A St Albans Road.

Watford Borough Council has achieved the decreasing trend desired and aims to further reduce the number of listed buildings at risk of decay.

9.6. U5: Listed buildings – any demolitions

We can confirm that no listed buildings have been demolished in Watford during this monitoring year.

However, we note that demolition of 36 Clarendon Road, a locally listed building, did take place. This was a Victorian villa and previously the Registrar's Office. However, its potential use was very limited and consequently the likelihood of it being brought back into use was very low. Although it was considered that there would be harm to the town's historic environment, it was decided that the building itself did not merit significant historical and architectural significance, and it was considered that the harm would be outweighed by achieving a high quality, modern office building that contributes to the employment needs of the town in accordance with the Core Strategy; the proposals also include 34 flats behind the office frontage.

The council will continue to actively conserve and protect historic buildings in the district.

10. Transport and Projects

The evidence base for the Local Plan indicates that transport is one of Watford's most important local issues, together with affordable housing and looking after the environment.

Hertfordshire County Council has overarching responsibility for transport and Hertfordshire's Local Transport Plan (LTP3) sets out the overall transport strategy for Hertfordshire, the goals and challenges to be met, and outlines a programme of transport schemes and initiatives. The LTP3 plans for the period 2011 to 2031, covering all modes of transport, including cycling and walking, and provides a joined-up approach to ensuring active travel modes are planned together to help reduce congestion, improve health and reduce pollutant emissions.

Further information on the LTP3 and transport planning is available on <http://www.hertsdirect.org/services/transtreets/>

10.1. T1: Amount and % of completed non-residential development within UCOs A, B and D complying with car-parking standards set out in the WDP 2000

Policy T22 and Appendix 2: 'Car and Cycle Parking Standards' in the adopted Watford District Plan 2000 set out Watford's car parking standards, which are based on maximum demand-based parking.

Car parking standards are in place to ensure that appropriate provision is made for car parking in relation to new development or in land use conversions. They are intended to restrict over provision, over capacity and to encourage the use of alternative transport modes. The council is revising its car parking strategy as part of the new Local Plan Part 2 document, which was consulted on between 17 December 2014 to 4 February 2015. The proposed new car parking standards are under review to bring them in line with national guidelines.

There have been 32 applicable developments, which have been completed over the monitoring period of 1 April 2014 to 31 March 2015 and there was no change to the existing car parking spaces in most of the developments, with a reduction in car parking spaces in two developments. Car parking spaces were approved within planning permissions for a new retail development, an extension to a B8 Storage and Distribution unit, new schools and school extensions as well as an extension to a place of worship - all complied with the WDP 2000 maximum car parking standards.

There were also 80 additional cycling spaces provided at new schools.

Table 10-1: T1: Amount and % of completed non-residential development within UCOs A, B and D, complying with car-parking standards in WDP 2000

Use Class Order (UCO)	No. of development sites in each UCO	Total no. and % of developments complying with maximum car parking standards
A1	4	4
A2	1	1
A3	5	5
A5	2	2
B1a	2	2
B8	3	3
D1	13	13
D2	4	4
Total	34	34 (100%)

N.B. Where a Use Class within A, B and D has not been listed, no developments have completed in that category during 2014/15.

10.2. T2: Accessibility - Percentage of new residential development within 30 minutes public transport time of key services and 400 metres of a bus stop where a frequent bus service operates i.e. where there are 5 or more journeys each way per day Mon-Sat

Accessibility planning is essential to effective spatial planning in order to identify whether people can get to jobs, education, health and other key activities. In order to monitor accessibility, Hertfordshire County Council (HCC), as the highway authority has the main responsibility for transport issues in the county. HCC runs a software modelling program on behalf of the districts which is able to identify all aspects of travel time using digital road networks and public transport timetable data, and enables specific locations to be mapped and analysed.

The following table shows the results on net residential development for the period 2006/07 to 2014/15, based on the percentage of new residential development within 30 minutes public transport time of a GP, hospital, primary and secondary school, employment and a major health centre, which was the local plan policy in existence prior to the Core Strategy being adopted in January 2013.

Table 10-2: T2: Percentage of new residential development (net completions) within 30 minutes public transport time of services/key activities

Service/key activity	2006/07	2007/08	2008/09	2009/10	2010/11	2011/12	2012/13	2013/14	2014/15
GPs	100%	100%	100%	100%	100%	100%	100%	100%	100%
Hospitals	100%	100%	78%	89%	75%	68%	79%	62%	90%
Primary schools	100%	100%	100%	100%	100%	100%	100%	100%	100%
Secondary schools	100%	100%	100%	100%	100%	100%	100%	100%	100%
Employment	100%	100%	100%	100%	100%	100%	100%	100%	100%
Retail centre	100%	100%	100%	100%	100%	100%	100%	100%	100%

Data Source: Hertfordshire County Council/Watford Borough Council via Accession software
N.B. Results can be affected because of the particular parameters set and bus/train timetables and routes can change.

The model output showed that Watford is an extremely accessible location although hospitals figure as a less accessible key service, when travelling from the North Watford area, including Meriden, Garston and Woodside.

In January 2013, new Core Strategy policies were adopted and Policy T2: Location of New Development and Policy T3: Improving Accessibility outline Watford’s accessibility requirements. Criteria is included that, to be accessible by bus services, sites should be within 400m of a bus stop where a frequent bus service operates i.e. served by 5 or more bus journeys each way per day Mon-Sat.

The result for 2014/15 was that 83% of net residential development was within 400m of a bus stop. The majority of the 17% of housing completions which were less accessible to bus stops were in Garston, North Watford, which is also further away from rail and underground stations. Some developments in Oxhey and a few in Nascot and Central Watford, were also more than 400m away from the main bus routes. This highlights that even the centre of an urban conurbation such as Watford can be affected by accessibility issues.

10.3. T3: % Change in Total Vehicle Kilometreage on HCC roads in Watford

Hertfordshire County Council (HCC) is the highway authority for all public roads in the county except the motorway and trunk road network, which is the responsibility of ‘Highways England’, although many HCC roads interact with these.

A large element of the motorway and trunk road network is of a long-distance nature so a comparison of traffic on just HCC controlled roads provides a measure of locally generated traffic change.

Watford’s traffic levels showed a decrease (-1.2%) in 2013/14, following an increase (+1.5%) in 2012/13 and more significant decreases the previous two years (of -2.8% and -4.86%). Between 2013 and 2014 traffic flows have decreased in six districts but increased in four districts in Hertfordshire; the only substantial changes in flows (excluding Motorway and trunk roads) were in Stevenage (-5.2%), Hertsmere (+3.4%) and North Herts (2.2%).

Table 10-3: T3: % Change in Total Vehicle Kilometreage on HCC roads in Watford

2003/ 04	2004/ 05	2005/ 06	2006/ 07	2007/ 08	2008/ 09	2009/ 10	2010/ 11	2011/ 12	2012/ 13	2013/ 14
+0.5	-0.6	+1.04	-2.9	-1.35	+1.77	+2.58	-4.86	-2.80	+1.5	-1.2

Source: Hertfordshire’s Traffic and Transport Data Reports 2004-2015

N.B. HCC roads – Hertfordshire County Council controlled roads, which excludes motorway and trunk roads; + denotes an increase and – denotes a decrease in traffic flow levels.

After a period of decline between 2008 to 2012, traffic flows in Hertfordshire overall have increased but at a relatively slow rate (0.8% increase between 2013 and 2014) and remain below pre-recession levels. The main increase has occurred on motorway, trunk and A roads, particularly on rural roads. This increase in traffic reflects economic growth (measured as GVA) in Hertfordshire during this period.

Traffic growth and road congestion are closely associated. In terms of road congestion, HCC also monitor journey time data during the morning peak (07:00 – 10:00) in the major towns of Hemel Hempstead, St. Albans, Stevenage, Watford, Welwyn Garden City and Hatfield (Bishop's Stortford is also included due to its proximity to Stansted Airport). TrafficMaster GPS data indicates an average journey time of 2 minutes and 49 seconds per mile on key inbound routes into Hertfordshire's main urban centres (7-10am) in 2013/14. Hemel Hempstead experienced the greatest increase in journey times (+4.6%) and there were also increases in Welwyn Garden City (+1.9%); elsewhere journey times remained stable or decreased - Watford's change from 2013/13 was +0.3%. However, average morning peak speeds are also monitored and there are slow speeds on inbound routes into St Albans and Watford in particular.

According to traffic forecasts to 2031, the highest traffic growth on Hertfordshire's roads will occur on trunk roads and motorways.

It is essential that new development does not worsen existing traffic conditions and Core Strategy Policy T4: Transport Assessments and Policy T5: Providing New Infrastructure, seek to mitigate any impact on the borough's transport network and improve the network with regard to sustainable modes of transport. Proposals must be accompanied by a transport assessment or statement in accordance with the most recent DfT guidance and in consultation with Hertfordshire Highways and the Highways England, and financial contributions or physical works will be required.

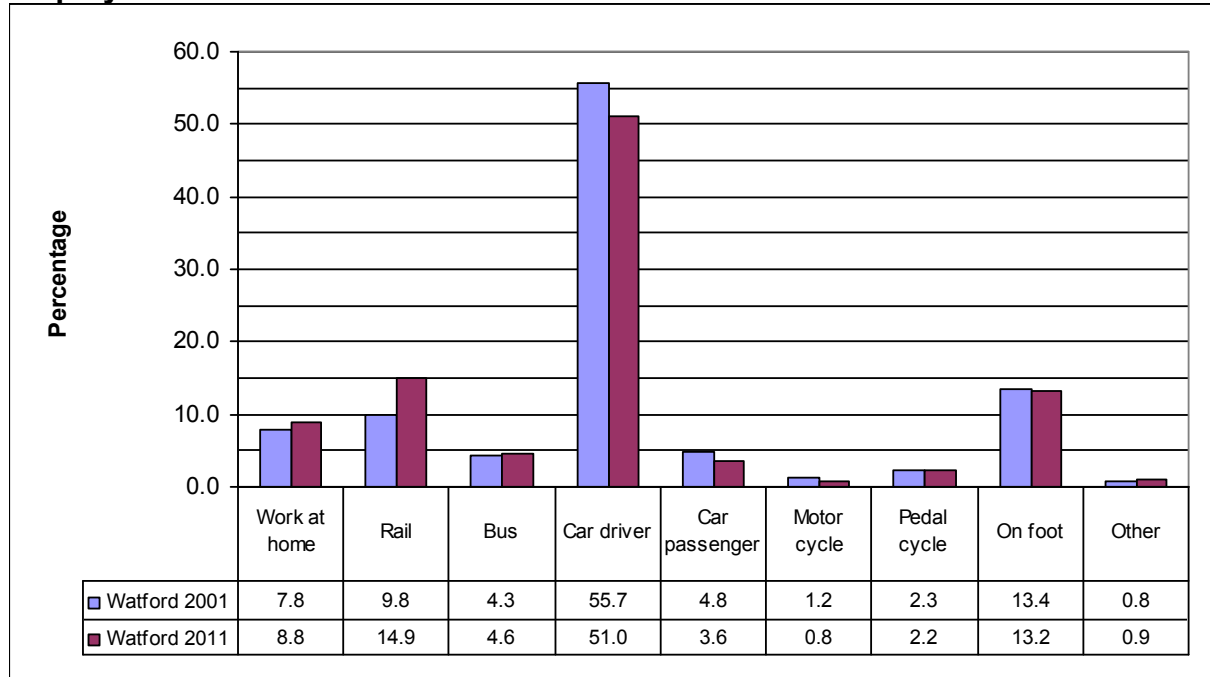

10.4. T4: Travel to Work Mode Shares

The highest levels of car ownership in Hertfordshire are found in East Herts, Three Rivers and St Albans (only 13% of households in East Herts and 14% in Three Rivers and St Albans have no car). This is a likely reflection of the larger proportion of households with two or more cars available. Stevenage and Watford, both densely populated urban areas, have the lowest levels of car ownership (23% and 22% of households respectively, have no car).

- Fewer Watford residents in employment travel to work in 2011 by car at 54.6%, than the 60.5% in 2001, a decrease of 5.9% (51% as driver and 3.6% as passenger). Overall in Hertfordshire, the proportion travelling to work by car has decreased by 3.9%, from 64.4% in 2001 to 60.5% in 2011.
- 19.5% of residents in Watford travel to work by public transport in 2011, as opposed to 14.1% in 2001, which is an increase of 5.4% (most of the increase coming from train or underground, rather than bus). The Hertfordshire average for residents travelling to work by public transport is lower at 16.5%, although this has also increased from 13.7% in 2001.
- The proportion of Watford residents who work at home more than doubled between 1991 and 2001 to 7.8% and this increased to 8.8% in 2011, with 11.4% being the Hertfordshire average.
- Watford has a much higher proportion (13.2%) of residents walking to work than any other district in Hertfordshire (average 8.5%); also, a higher usage of travelling to work by bicycle at 2.2%, as compared to the county average (1.6%). The Hertfordshire average for both modes of travel to work has decreased slightly since 2001, less so in Watford.

The Census and Hertfordshire County Travel Surveys have identified a generally downward trend, since 1999, of households without access to a car. This trend occurred until 2009, when the economic recession caused levels to revert back to those in 2001. Conversely, using the car to travel to work is also trending downwards whilst rail use and home working seem to be on the increase.

Figure 10-1: T4: Travel to Work Mode Share by Watford residents in employment – 2011 and 2001 Census

Source: Chart compiled by WBC, Planning policy - data from 2011 & 2001 Census
 N.B. The above table relates to how Watford residents in employment travel to work, some of whom commute to other areas – it does not represent all employees working in Watford.

However, TravelWise surveys from 2012 -2014 indicate that 81% of people entering urban areas travel by car, a high proportion, followed by 11% by bus. Each settlement has a cordon of count sites around the town centre and the method of travel for every person along main routes from 7am to 10 am is noted. The TravelWise urban monitoring programme provides data on mode share during the peak morning hours into 23 major urban centres in Hertfordshire – each urban area is monitored once every three years on a rolling programme.

Bus usage in Hertfordshire decreased in 2014 by 2.6% from the previous year, reflecting national trends. Rail station use in Hertfordshire, however, increased by 4.4% between 2013 and 2014; the busiest three stations in Hertfordshire are St Albans City (7.2 million pa), Watford Junction (6.4 million pa) and Stevenage (4.4 million pa).

Distance travelled to work

The average distance commuted to work by Watford’s employed residents has increased from 11.4km in 2001 to 13.1km in 2011. Although Watford’s 15.5% change between 2001 and 2011 is the highest in Hertfordshire, the average distance travelled is still the lowest of all the Hertfordshire districts.

The Hertfordshire average distance commuted changed from 14.7km to 16.1km; in England and Wales, the average distance increased by 12%, from 13.4km in 2001 to 15km in 2011. On average, workers resident in the East of England (17km) had the

longest commutes while working residents in London had the shortest commutes (11km).

The accompanying chart shows that driving a car is the favoured mode for most distances, apart from those less than 2 km, where walking is the predominant mode and those journeys between 20 km to 30km, where the train is the highest proportion of transport (probably reflecting for the greater part, those that commute to London).

Figure 10-2: T4: Travel to Work Mode Share by distance - Watford

Data source: ONS Crown Copyright. 2011 census table DC7701EW1a - Method of travel to work (2001 specification) by distance travelled to work. Chart compiled by WBC, Planning Policy

Commuting data derived from the 2011 Census was released in 2014, and shows that Watford is still an important employment centre although larger numbers of residents than previously are travelling out of Watford to work. The number of people commuting into Watford is 28,814, very similar to that in 2001 (28,636) but the number of Watford residents commuting out of Watford has increased by about 4,000 people, to 24,903. This results in net in-commuting of around 3,900 people in Watford (a decrease by almost 50% from the 7,700 plus recorded in the 2001 Census).

Fifty-six per cent of Watford’s total workplace population of 51,469 comes from outside the borough, similar to the 58% recorded in 2001. However, the number of people that both live and work in Watford is 14,428, which is a decrease of 30% from the 20,700 living and working in Watford in 2001.

47% (11,676) of those commuting out of Watford travel into the London area; 41% travel to other districts in Hertfordshire, including the local authority where the highest number of Watford residents commute to, which is Three Rivers (3,483, about 14%). Overall in Hertfordshire, 36% of trips to work are outside of Hertfordshire, including 28% into Greater London.

50% of in-commuters to Watford (not including those 14,428 that live and work in Watford) travel from other districts in Hertfordshire – again, the local authority with the highest number of commuters to Watford is Three Rivers, (5,747, about 20%). Around 7,880 people commute into Watford from the London area (27% of the in-commuting total).

10.5. T5: Watford’s cycle route usage – average number of cyclists per day

Hertfordshire County’s Local Transport Plan (LTP3) set an increasing target for the level of all trips under 3 miles made by cycling, with a baseline figure from the 2009 County Travel Survey, where it was 2.7%. It is intended that the target will be tracked every 3 years through future HCC travel surveys, the first target being 3% by 2015/16. In 2012 (the most recent survey year) the level of cycling trips under 3 miles in Hertfordshire was 2.7%, which is the same as it was in 2009. The 2012 County Travel Survey (HCTS Table 5.16) also revealed some inter district variation in cycling levels. Residents from Welwyn & Hatfield (3.9%), St Albans (2.7%) and Watford (2.5%) had the highest mode share per district.

In 2014, cycling generally dropped from 2013 levels in Hertfordshire; however, the 2014 flows were still the second highest since the Hertfordshire cycling monitoring programme began in 2004.

Four sites in Watford have been continuously monitored with automatic counters. It can be seen from the following chart that usage in Watford has remained consistent during 2014/15, with little change since 2013/14, when usage significantly increased above previous levels. The 2013/14 increase was seen across the county, reversing the decline of 2012, which was likely to be attributable to 2012 being confirmed as the second wettest year on record.

Figure 10-3: T5: Cycle route usage – average number of cyclists per weekday

Data Source: Hertfordshire’s Traffic and Transport Data Reports 2008 – 2015.
 N.B. Number of cyclists is recorded on weekdays between 6:00-22:00. Data not available pre. 2010/11 on Radlett Road and Dalton Way sites. Chart compiled by WBC, Planning Policy.

10.6. T6: Annual output for cycle routes in Watford

Cycling as a mode of transport is cheap, healthy and sustainable and Watford Borough Council has been strongly committed to encouraging cycling by developing a safe network of useable routes and improved storage facilities in Watford. Watford's cycle path runs through the middle of the town centre shopping area, including the Parade, which underwent a major improvement programme during 2013/14.

Table 10-4: T6: Annual output in km for cycle routes in Watford

2003/ 04	2004/ 05	2005/ 06	2006/ 07	2007/ 08	2008/ 09	2009/ 10	2010/ 11	2011/ 12	2012/ 13	2013/ 14	2014/ 15
4.30	6.10	1.30	0.50	0.00	1.90	0.00	0.50	0.80	0.00	0.26	4.70

Source: Watford Borough Council and Hertfordshire County Council

During 2014/15, 4.7km of new cycle route was established, including:

- A412 cycle route Phases 1 & 2 (Stratford Way to Station Road)
- A412 cycle route Phase 4 (Dome Roundabout)
- Cassiobridge Station Links Phase 1
- Queens Avenue cycle route

Since 2003/04, 20.4 km of new cycle route has been delivered in total providing cyclists with easier, more direct and safer journeys around the town.

Additional cycle route is planned for 2015/16, including A412 cycle route Phase 3 St Albans Road/Dome Roundabout.

Watford Borough Council has a Green Travel Plan in place which sets out a programme of initiatives to encourage staff to choose green travel, including interest free loans for public transport season tickets and cycle purchase, staff car parking fees and car sharing (www.hertsliftshare.org). Car sharing and more sustainable travel mode use has increased at Watford Borough Council, reducing our carbon footprint and contributing to local and national targets.

Further initiatives to lessen congestion and improve sustainable transport in Watford include:

- The E-car club launched in Watford in November 2014. The scheme enables staff to use the vehicles during office hours, and members of the public during evenings and weekends. Over the first three months of operation:
 - 31 members of staff, and 15 members of the public have signed up for the scheme
 - 73 bookings, across 127 hours, covering 675 miles have been made; and
 - The average booking is for a period of 2 hours covering around 10 miles
- The installation of a new electric car re-charge point at Watford Business Park, car park at Greenhill Crescent, adding to those installed in previous years. In May 2015, the first taxi electric charging point was installed in Service Road Q near the junction of Beechen Grove.

- Hertfordshire's first shared use zebra crossing for pedestrians and cyclists was completed in March 2015. Known in some parts of the country as *tiger crossings* the example in Water Lane is a key improvement to the national cycle network route towards Rickmansworth in the west along the Ebury Way. The crossing will also become part of the Abbey Way cycle route to St Albans, which is also undergoing infrastructure improvements.
- There have also been two new puffin crossings on Hempstead Road/Stratford Way – they improve linkages to Lanchester School, off Hempstead Road; one new toucan crossing at Rickmansworth Road near Gade Avenue and four crossings upgraded to toucan crossings around the Dome Roundabout.
- Real Time bus information screens have been installed in a number of the town centre bus shelters.
- 23 new cycle parking hoops added at various locations around the Town Centre, including community centres and local shopping precincts.

10.7. T7: Development progress on major schemes

There are some major developments anticipated including the Watford Health Campus, Metropolitan Line Extension (MLX) formerly known as the Croxley Rail Link, Charter Place, Ascot Road (Western Gateway), and Watford Junction.

Special Policy Areas are identified in the Core Strategy as broad locations; the precise boundaries will be set within the Local Plan Part 2; the second consultation took place from 17th December 2014 to 4th February 2015 – please see www.watford.gov.uk/ldf for current news on the Local plan.

The Watford Health Campus (Special Policy Area 3)

Watford Health Campus is a major regeneration project to improve the area surrounding Watford Hospital and to provide an opportunity for hospital improvements on the site. Over the next 15-20 years about 750 homes and 1,000 new jobs will be provided, along with local retail, leisure and play facilities and public open space.

The planning permission incorporating both outline and detailed elements for the mixed-use Watford Health Campus was issued by the council on the 6 January 2015. The approved S106 planning agreement will provide monies for education provision, new and better bus services, local traffic calming, road improvement and junction works; it also requires 35% affordable housing on site. Three architects are coming up with proposals for the residential units at the Riverside Zone as part of a mini competition and tenders are expected during November 2015.

Work has started on the building of the new road to improve access to Watford Hospital and the surrounding areas. Volker Fitzpatrick, the company building the road, are working with the Health Campus partners, (the council, West Hertfordshire Hospital NHS Trust and Kier Property) to ensure employment opportunities, including traineeships and apprenticeships, are taken up by local people where possible. Communications with local residents and businesses is a priority throughout the

road's construction, including regular updates on progress, on site notices and a dedicated contact telephone and email address for reporting issues. Volker Fitzpatrick can be contacted on: 07471 140879 (24 hour emergency number) or on watfordhealthcampus@volkerfitzpatrick.co.uk

For more information, please visit the website: www.watfordhealthcampus.org

The Metropolitan Line Extension from Croxley will provide a new station 'Watford Vicarage Road' within a short walking distance of the Health Campus.

The Metropolitan Line Extension, formerly known as the Croxley Rail Link (part of Special Policy Area 6: Western Gateway)

Final funding approval was agreed by the Government in March 2015. Preliminary works on the scheme will continue and it's expected that construction work will start during 2016.

This a scheme to extend the London Underground Metropolitan line from Croxley to Watford Junction, via two new stations, Cassiobridge and Watford-Vicarage Road, and then linking to Watford High Street and Watford Junction.

Watford Borough Council, Hertfordshire County Council, London Underground, Transport for London, Network Rail and Three Rivers District Council have all worked hard to bring this scheme to fruition.

Cassiobridge station, off Ascot Road, where it is planned to have park and ride facilities, will serve the local community and provide a valuable new transport link for businesses in the area. Watford-Vicarage Road station will serve the existing Watford Hospital, the football ground and the proposed Health Campus project. The new stations will supply an east-west public transport link for Watford and also provide better transport links to Croxley Business Park and Watford Business Park, increasing employment opportunities.

For more information, please see <https://tfl.gov.uk/travel-information/improvements-and-projects/metropolitan-line-extension>

Charter Place

The project to transform Charter Place in Watford town centre began in November 2015; the process of demolishing part of the shopping centre will last for up to four months.

The Intu Watford extension project is the largest of its kind to have happened since Charter Place was built in 1976 and Intu was built in 1992. It will be funded by Intu – who acquired the site from Watford Borough Council; planning permission was granted on the 5 February 2014. The project will create a 1.4 million sq.ft. single retail and leisure destination.

Around 16 shops, 10 restaurants, a nine-screen IMAX cinema and leisure offer will be created. Part of the scheme includes a public square that will host a diverse

events programme, such as street art and music shows. It is considered that the project will create about 1,900 jobs.

There will be hoarding going up in the town centre, but for the most part it will be business as usual. Despite the scale of work, disturbance to local business will be kept to an absolute minimum.

Ascot Road (part of Special Policy Area 6: Western Gateway)

SPA6 has been identified in the Core Strategy as an area where there is potential for major regeneration, physical and transport improvements through the redevelopment of key sites in the area and opportunities for restructuring.

Ascot Road Community Free School - a new two-form entry primary school opened in September 2014 in the Lanchester Building, Hempstead Road and moved into the new purpose built site in Ascot Road in June 2015. This follows the opening of Morrisons supermarket at Ascot Road in November 2013.

Part of the site is needed for the Metropolitan Line Extension and Cassiobridge Station. The council will continue to work with landowners and developers of the Ascot Road site in order to deliver further employment opportunities and other aspirations of Policy SPA 6.

Watford Junction (Special Policy Area 2)

This area has been identified in the Core Strategy (SPA2) for a major mixed use regeneration scheme that will improve the railway station, road and transport facilities together with new residential, employment, retail and commercial leisure space with associated new physical, social and green infrastructure.

Discussions are continuing between the key parties involved in an attempt to resolve the many complex issues and find a viable scheme for the site, whilst additional potential sources of funding that could be pooled together to deliver the redevelopment have been identified. The Metropolitan Line Extension however increases the importance of Watford Junction and this should improve the long term regeneration potential.

Network Rail has been undertaking an £81 million investment program, which includes works to remove the signal box at Watford Junction in preparation for Metropolitan Line services; replacing 12 miles of track, signaling and overhead power lines in the Watford area and 175km of security fencing. There has been a series of weekend closures in order to accomplish these works during 2014/15.

11. Infrastructure Delivery and Planning Obligations

Infrastructure encompasses the entire framework required to support daily life, such as transport, utilities, education, hospitals and open space.

The Infrastructure Delivery Plan (IDP) considers the infrastructure improvements that are needed to support the planned increase in new homes, business premises and other facilities arising from the population and job growth in the borough up to 2031, as outlined in the Core Strategy.

The IDP includes an assessment of the existing provision and an analysis of the future provision required. The IDP is accompanied by an infrastructure delivery schedule which sets out details of the infrastructure schemes that are proposed to take place during the local plan period to 2031.

The main conclusions of the IDP include the need to provide new infrastructure for the following over the plan period:

- schools
- health care facilities
- transportation
- green infrastructure
- additional cemetery capacity

The intention is to update the IDP and infrastructure delivery schedule on a regular basis and the most recent IDP review took place in March 2013 – please see the ‘Infrastructure Delivery Plan March 2013’ document for full details, available on our website www.watford.gov.uk

Some information with regard to health care and transportation is also provided in the Transport and Projects’ section of this document - most of the Special Policy Areas have potential to deliver or support improvement in healthcare facilities, such as SPA3 Health Campus and SPA2 Watford Junction; also, some information in respect of green infrastructure is provided in the relevant section of this document.

11.1. Schools

Primary School provision

Hertfordshire County Council has a duty to plan for and secure sufficient school places for their area in line with their duties under section 14 of the Education Act 1996. In the wider Watford town area, the county council has identified that there is a need for up to 4 additional primary schools (or 10 to 11 form entry classes (FE) over the lifetime of the Core Strategy (to 2031). This is largely a result of the planned housing growth on strategic sites in central and west Watford, and individual sites in other areas. It is also related to recent increases in birth rates. Watford Borough Council has been actively engaging with Hertfordshire County Council (HCC) to ensure this demand is met.

The Core Strategy sets out the education need within Policy INF1 and also the Infrastructure Delivery Plan.

The sites proposed for primary school expansion/provision in the Local Plan Part 2 first consultation of November /December 2013, have all been delivered:

- Lanchester Community Free School, Hempstead Road - an additional two-form entry school, which opened in September 2014.
- Ascot Road Community Free School - a new two-form entry primary school opened in September 2014 in the Lanchester Building, Hempstead Road and moved into the new purpose built site in Ascot Road in June 2015.
- Orchard School - the school has been expanded to a two-form entry primary school; a new 2 storey extension to the school was opened in March 2015.

In the Local Plan Part 2 second consultation of December 2014/February 2015, an additional site was identified at Bedford Street, which could meet the two-form entry need related to planned development at Watford Junction. Also, the boundary of the Health Campus SPA has been extended to include the existing Laurence Haines School, where future expansion may be possible to meet needs relating to the Health Campus development, which is one additional form entry.

This equates to 8 additional primary school forms of entry, the current need identified by the county council. Watford Borough Council will continue to work with the county council over the plan period to ensure that adequate provision is made, should the need for school places change.

Table 11-1: Current and potential capacity in Watford Primary schools

School	Current Capacity	Expansion Capacity	Comments
Alban Wood	1FE	0	No expansion potential
Ascot Road	2FE	0	New school opened September 2014.
Beechfield	2FE	0	Permanently expanded by 1FE to 2FE from Sept 2012
Berrygrove (The Grove Academy)	3FE		Academy located on a large site but already 3FE
Bromet	PAN 40	0	No expansion potential
Bushey & Oxhey Infants	2FE	0	No expansion potential
Cassiobury Infants	3FE	0	Permanently expanded by 1FE to 3FE from Sept 2012 (temporarily expanded by 1FE in 2010 and 2011)
Cassiobury JM	3FE	0	Permanently expanded by 1FE to 3FE Sept 2013
Central	2FE	0	Permanently expanded by 1FE to 2FE in Sept 2014.
Chater Infants	2FE	0	No expansion potential
Chater Junior	2FE	0	No expansion potential
Cherry Tree	2FE	0	Permanently expanded by 1FE to 2FE from Sept 2012.
Coates Way JMI	1FE	0	No expansion potential as majority of site in floodplain
Holy Rood RC	2FE	0	No expansion potential
Holywell	3FE	0	Permanently expanded by 1FE to 3FE from Sept 2012.
Kingsway Infants	2FE	0	Temporary expansion by 1FE to 3FE Sept 2012. No potential to expand permanently.
Kingsway Junior	2FE	0	To have temporary expansion by 1FE to 3FE Sept 2015. No potential to expand permanently.
Knutsford	2FE	0	No expansion potential
Lanchester Building	2FE	0	New school opened September 2014.
Laurance Haines	2FE	0	No expansion potential without additional land
Leavesden Green	1FE	+1FE	Needed for potential growth at Abbots Langley and the primary planning areas in the north of Watford

School	Current Capacity	Expansion Capacity	Comments
Nascot Wood Infant & Nursery	2FE	0	Temporarily expanded in 2013 by 1FE to 3FE. No permanent expansion potential
Nascot Wood Junior	2FE	0	To have temporary expansion by 1FE to 3FE Sept 2016. No permanent expansion potential
Orchard	1FE	+1FE	Permanently expanded by 1FE to 2FE in Sept 2014. Additional land acquired from Watford BC to enable future expansion to 3FE when required.
Parkgate Infants	2FE	0	No expansion potential
Parkgate Junior	2FE	0	No expansion potential
St Anthony's RC	2FE	0	Permanently expanded by 1FE to 2FE from Sept 2013. (temporarily expanded by 1fe in 2012)
St Catherine of Sienna Academy	1FE	0	Temporarily expanded in 2013 by 1FE to 2FE. Will be temporarily expanded again in 2014.
Watford Field Infant	2FE	0	Temporary expansion by 1FE to 3FE Sept 2012. No potential to expand permanently.
Watford Field Junior	2FE	0	To have temporary expansion by 1FE to 3FE Sept 2015. No potential to expand permanently.

Data source: HCC, Property and Technology

Secondary school provision

Based on current pupil forecasts, the county council recommends that two sites should be allocated and reserved for secondary education in SW Herts across the plan period. Given the geographic spread of existing schools, the secondary school requirement will be provided in the Three Rivers District.

Two sites for secondary schools were allocated in the Three Rivers Site Allocations Document which was adopted by Three Rivers District Council on 25 November 2014. These sites are:

- Mill End/Maple Cross – Land east of the A405/north of A412
- Croxley Green – Land north-east of Baldwins Lane

Further details can be found in the document on www.threerivers.gov.uk

11.2. Additional cemetery capacity

In our Core Strategy, policy INF1 states that, 'Infrastructure provision in Watford will reflect the council's priorities for infrastructure set out in the infrastructure delivery plan.' This lists new cemetery capacity as one of these priorities. The borough currently has 2 cemeteries, at Vicarage Road and North Watford; limited capacity is available and additional cemetery space will be required to serve the borough.

At the end of 2013, we consulted on a potential cemetery site on council owned land at Paddock Road in Hertsmere (which would need to be allocated in their Local Plan rather than our own). This raised concerns, primarily relating to access through existing allotments and as a result has been removed from allocation within the Local Plan 2.

Two additional sites were then identified within Watford Borough and all three potential sites were presented as options in the Local Plan Part 2 consultation December 2014/February 2015. Due to issues with the source protection zones and proximity to the water table the two sites to the north will not be taken forward.

The council is preparing a 10 year Cemetery Strategy, which will give further consideration to new cemetery provision.

Whilst some infrastructure is funded directly by both public and private organisations, much is only needed as a result of the impact of new development. To ensure that the burden of providing the additional infrastructure that is needed does not fall on existing communities, planning authorities are able to seek appropriate funding for this infrastructure from developers via planning obligations, which are legal agreements negotiated as part of the planning application process.

An Infrastructure Funding Gap Assessment (IFGA) report was produced in March 2013, which estimates the cost of infrastructure, predicts the funding sources that may be available and demonstrates that a financial gap exists in the funding of the infrastructure required – and therefore the need for a Community Infrastructure Levy (CIL) in Watford.

11.3. Community Infrastructure Levy and S106 planning obligations

After being found sound by an independent Examiner, the council adopted the Watford Community Infrastructure Levy (CIL) Charging Schedule on the 19 November 2014, for implementation from the 1 April 2015. Planning applications determined on or after the 1 April 2015 may therefore be subject to CIL.

The Community Infrastructure Levy (CIL) is a levy that local authorities can choose to charge on new developments for funding infrastructure needed to support the growth of the borough in general. Charges are based on the size, type and location of the new development and are set out in a charging schedule. Please see the Watford CIL Charging Schedule on our website for details www.watford.gov.uk/cil CIL charges received for 2015/16 will be reported on in the next AMR.

S106 agreements will continue but are specific to the site proposed for development. The principal uses for S106 agreements are in the delivery of affordable housing (which is expressly omitted from the definition of infrastructure in the CIL Regulations) and the mitigation of the direct effects of proposed development.

Please note that Hertfordshire County Council is also responsible for negotiating and setting standard charges for planning obligations in areas including transport, education, libraries, youth and childcare facilities, fire and rescue services, adult care facilities and health facilities (responsibility for administering any monies from planning obligations for health facilities was transferred from the NHS Primary Care Trust to HCC under the Public Health Team in April 2013).

11.4. IN1: Infrastructure provided - Section 106 funded schemes 2014/15

Watford Borough Council currently negotiates developers' contributions towards site specific infrastructure including affordable housing, open space and children's play space (affordable housing details are provided in the Housing section of this report).

- In 2014/15, the amount of Section 106 contributions administered by Watford Borough Council that was used to fund schemes was £1,321,572.

Table 11-2: IN1: Section 106 funded schemes 2014/15

Himalayan Way Play Area	Colne River Project
Jellicoe Road Play Area Improvements	Radlet Road MUGA
Goodwood Rec Play Area Improvements	Knutsford Road
East Drive Play Area	Local Park Improvements
Waterfields Rec Play Area	Cherry Tree Allotments
Southwold Road Play Area	Local Nature Reserves
Ridgehurst Avenue Play Area	Colne Valley Improvements
Riverside Recreation Ground	Cassiobury Park HLF Project
Oxhey Park	Cultural Quarter Ph 1
King George V Playing Field	

Data Source: WBC

Refurbishment and improvement to a number of recreation grounds, parks, play areas and open space have taken place during the last financial year, as shown in the accompanying table.

11.5. IN2: Section 106 monies received 2014/15

- The amount of S106 contributions received by Watford Borough Council for public open space and children's play space in 2014/15 was £589,904.

There is a programme of works using S106 funds covering the 2011/12 to 2014/15 period, where a large number of projects have been allocated funding across the town, including play areas, parks and open spaces, a major investment in the Colne River Park, allotments, cemeteries, playing pitches and changing rooms.

12. Appendix 1. Glossary of Terms

Accessibility

The ability of everybody to go conveniently where they need, including elderly people, people with disabilities and those with children, particularly in relation to services and facilities.

Affordable housing

Affordable housing includes social rented and intermediate housing, provided to specific eligible households whose needs are not met by the market (see National Planning Policy Framework for full definition). This includes not only newly built affordable housing delivered through planning policy, but also acquisitions and conversions but it does not include 'low cost market' housing.

AMR – Authority's Monitoring Report

A report by local planning authorities assessing Local Plan production progress and policy effectiveness.

CIL – Community Infrastructure Levy

A levy on new developments to support infrastructure delivery, introduced by the Planning Act 2008, coming into force on 6 April 2010 through the Community Infrastructure Levy Regulations 2010.

COI – Core Output Indicators

Originally a mandatory standardised set of indicators introduced in 2005 by the government in order to monitor the effectiveness of policies and enable national comparison. In March 2011 the Department for Communities and Local Government (CLG) withdrew published guidance on local plan monitoring leaving it to local councils to decide which indicators to include. Although the NPPF includes guidance for Authorities' Monitoring Reports, it is less prescriptive with regard to indicators. However, most of the district councils in Hertfordshire intend to continue to monitor the Core Output Indicators, although they may not be labelled as such, in order to provide consistency and enable some element of comparison to be maintained.

Core Strategy

The Core Strategy is the central part of Watford's Local Plan and sets out the key elements of the council's planning vision and spatial strategy for the Borough. It establishes the direction for other documents that will set out our planning strategy and policies in more details. All other Local Plan documents must be consistent with the Core Strategy.

DCLG – Department for Communities and Local Government

The Department for CLG was created on 5 May 2006, with a powerful remit to promote community cohesion and equality, as well as responsibility for housing, urban regeneration, planning and local government.

EELGA – East of England Local Government Association

From 1 April 2010, some of EERA's work was taken forward by a new organisation called the East of England LGA – www.eelga.gov.uk, which is the association of the 52 local authorities of the East of England.

EERA – East of England Regional Assembly

EERA was the Regional Planning Body for the East of England, providing regional planning guidance for the East of England in the form of a 'Regional Spatial Strategy' until it was dissolved on the 31 March 2010. It no longer functions as an organisation.

G.I.S – Geographic Information System

Computerised mapping system.

HBRC - Hertfordshire Biological Records Centre

Conducts biological recording and manages an extensive database with information on habitats, species and sites across the county. Also provides an ecological advisory service.

HCC

Hertfordshire County Council

Hectare

10,000 square metres (about 2.5 acres)

IMD – Index of Multiple Deprivation

The Government publishes the Indices of Multiple Deprivation (IMD), combining 37 separate indicators, within seven domains (three of which contain sub-domains); the domains are Income; Employment; Health and Disability; Education, Skills and Training; Crime; Barriers to Housing and Services; and Living Environment. In addition to the domains and their sub-domains there are two supplementary income deprivation Indices: Income Deprivation Affecting Children Index (IDACI) and Income Deprivation Affecting Older People Index (IDAOPI). These are grouped together to provide an overall Index of Multiple Deprivation, the most recent being the 2015 IMD. A ranking of '1' for neighbourhoods or LSOAs equates to the most deprived and '32,844' equates to the least deprived in England.

LDS – Local Development Scheme

A document setting out a timetable for the preparation of the different documents which make up the Local Plan.

LEP – Local Enterprise Partnership

Local enterprise partnerships are partnerships between local authorities and businesses. They play a central role in determining local economic priorities and undertaking activities to drive economic growth and the creation of local jobs. Watford is part of the Hertfordshire LEP which covers the whole of Hertfordshire.

Local Plan

The plan for the future development of the local area, drawn up by the local planning authority in consultation with the community.

LSOAs – Lower Super Output Areas

LSOAs are small areas or neighbourhoods of relatively even size (around 1,500 people); there are 32,844 LSOAs in England; 53 of these are in Watford.

LSP – Local Strategic Partnership

A partnership that brings together organisations from the public, private, community and voluntary sector within a local authority area, with the objective of improving people’s quality of life. Watford’s LSP is called One Watford and is responsible for producing the Sustainable Community Strategy.

NPPF – National Planning Policy Framework

The NPPF sets out the Government’s planning policies for England. It provides a framework within which local councils can produce their own distinctive local plans which reflect the needs and priorities of their communities.

ONS - Office for National Statistics

The Office for National Statistics (ONS) is the UK’s largest independent producer of official statistics and is the recognized national statistical institute for the UK. It is responsible for collecting and publishing statistics related to the economy, population and society at national, regional and local levels. It also conducts the census in England and Wales every ten years.

PDL – Previously Developed Land

Previously developed land (also known as brownfield land) is land that is or has been occupied by a permanent structure excluding agricultural or forestry buildings; also excluding land in built-up areas such as private residential gardens, parks, recreation grounds and allotments – see the NPPF for a full definition.

PPS – Planning Policy Statement

These were Government statements of national planning policy guidance. They were phased in to replace PPGs (Planning Policy Guidance) and have since been superseded by the National Planning Policy Framework.

RSS – Regional Spatial Strategy

The East of England Plan, which was revoked in January 2013, was the Regional Strategy applying to Watford and previously formed part of Watford’s development plan.

SA – Sustainability Appraisal

An assessment of the social, economic and environmental impacts of the policies and proposals contained within the Local Plan.

SCI – Statement of Community Involvement

A document that sets out how the council will engage with the community in preparing and reviewing the Local Plan, and also in major planning application decisions. In effect it is the council’s planning policy on consultation. A statement demonstrating how the local planning authority has complied with the Statement of Community Involvement is required for all Local Plan documents.

SEA – Strategic Environmental Assessment

The European ‘SEA Directive’ (2001/42/EC) requires a formal ‘environmental assessment’ of certain plans and programmes, including those involving planning and land use. The assessment will examine the potential impacts of policies and proposals on the environment, and includes proposals for the mitigation of these impacts.

Section 106 Planning Agreement

Section 106 (S106) of the Town and Country Planning Act 1990 allows a local planning authority to enter into a legal agreement or planning obligation with a landowner in association with the granting of planning permission. They tend to apply to major development schemes and are often made in order to secure contributions towards community infrastructure to meet the needs of residents in new developments and/or to mitigate the impact of new developments upon existing community facilities.

SP – Structure Plan

The Hertfordshire Structure Plan, produced by the county council, was revoked by government in January 2013. Hertfordshire County Council has produced the Minerals Local Plan 2002-16 and the Waste Core Strategy and Development Management Policies 2011-2026 which now form part of the development plan.

Spatial Planning

Spatial planning goes beyond traditional land use planning to bring together and integrate policies for the development and use of land with other policies and programmes which influence the nature of places and how they function.

This will include policies which can impact on land use by influencing the demands on, or needs for, development, but which are not capable of being delivered solely or mainly through the granting or refusal of planning permission and which may be implemented by other means.

SPD – Supplementary Planning Document

These documents provide additional guidance to policies contained in Local Plan documents.

WDP 2000 – Watford District Plan 2000

The Watford District Plan was adopted in December 2003. Following adoption of the Core Strategy in January 2013, some policies remain in existence from the Watford District Plan 2000, as listed in Appendix 4, and form part of the development plan until replaced by the Local Plan Part 2. For more information, please see <http://www.watford.gov.uk/ccm/content/planning-and-development/planning---local-plans-information.en>

Windfalls

Sites which have not been specifically allocated or identified for development in the Local Plan process. They normally comprise previously-developed sites that have unexpectedly become available during the lifetime of a plan.

Table compiled by WBC, Planning Policy

Data source: The English Indices of Deprivation 2015 <https://www.gov.uk/government/statistics/english-indices-of-deprivation-2015>

N.B. Lower Layer Super Output Areas (LSOAs) now number 32,844 in England (32,482 in IMD 2010), of which the LSOA with a rank of 1 is the most deprived and 32,844 the least deprived. There are now 690 LSOAs in Hertfordshire (683 in IMD 2010) and 53 LSOAs remain in Watford. LSOAs are small areas or neighbourhoods of relatively even size (around 1,500 people).

LEGEND	
	Watford LSOAs that fall within the 10% (first decile) most deprived in the specified area
	Watford LSOAs that fall within the 20% (first quintile) most deprived in the specified area

Five Year Housing Land Supply Assessment as at 31 March 2015

The National Planning Policy Framework (NPPF) was published on 27 March 2012 and came into force with immediate effect, superseding previous guidance such as Planning Policy Statement 3. There remains a requirement to assess and demonstrate a five year housing supply.

The method used for assessing when deliverability of each permission or site is likely to come forward is based on the criteria contained in Paragraph 47 of the NPPF, taking into account such factors as whether the development has started, whether planning permissions are full or outline and when they will expire, discussions with Development Management or developers on progress or when/if likely to proceed. Monitoring data also shows that, historically, non-implementation rates, known as slippage, of planning permissions has been very low. As Watford does not have a record of persistent under-delivery of housing (the average delivered over the nine years (2006-2015) of the plan period is 402 p.a. - see housing trajectory Figure 5-1/Table 5-1), there is a requirement for a buffer of 5% rather than 20%. Additionally, Watford has a high incidence of windfall delivery (see Table 5-2) but no windfall allowance has been included within the five year assessment to avoid any possibility of double-counting (a conservative allowance has been made within the housing trajectory from year 6 onwards of 66 units per annum).

The first year of the trajectory period, looking forward is 2015/16 which is the current year during which the AMR 2015 is compiled, and the expected number of dwellings likely to be completed has been identified as 267, the majority of the developments under construction.

The current year is not included as part of the five year assessment, which covers the following five years between 1 April 2016 to 31 March 2021. Sites included in the five year assessment are a combination of sites with planning permission that are under construction; sites with unimplemented planning permissions; allocated housing sites that are expected to come forward and other sites identified for housing.

The five year housing assessment has been calculated against the target contained in our **Core Strategy** (adopted in January 2013) as follows:

- The **Core Strategy** covers the period 2006-07 to 2030-31, where we are seeking a minimum 6,500 dwellings over 25 years.
- Taking into account the total completions of 3,615 units between 2006/07 and 2014/15 already delivered, this equates to 2,885 units remaining to be achieved and a residual annual requirement of 180 dwellings for the remaining period ($6,500 - 3,615 = 2,885 / 16 = 180$). This corresponds to a five year housing requirement of 900 (y) dwellings ($180 * 5 = 900$).
- The number of projected completions between 2016/17-2020/21 has been identified as 1,791 (x).
- **The five year land supply is calculated as (x/y) *100. Watford's 5 year housing land supply is $(1,791/900)*100=199.0\%$** which is above the National Planning Policy Framework requirement of 105%.

We also have a sufficient supply to cover the annual average target of 260 homes ($260 * 5 = 1300$) for more than five years.

In the five year sites assessment listing above, the larger sites (10 units and over) are detailed individually, and summary totals are provided for the smaller sites (under 10 units). A site specific list detailing all housing commitments contained within the full housing trajectory listing is available from the Planning Policy team by e-mailing strategy@watford.gov.uk

Additional sites may come forward – sites have been assessed and published for consultation as part of the Site Specific Allocations DPD process within the proposed Local Plan Part 2 – for more details, see www.watford.gov.uk/ldf
 Planning applications will be considered and determined having regard to the NPPF, Development Plan policies and other material considerations.

Employment Land Supply	BD3 (i)	Sites allocated for employment in WDP 2000.	<p>The Core Strategy (adopted January 2013) allocates Special Policy Areas for major mixed use regeneration schemes: SPA2 Watford Junction, SPA3 Health Campus, SPA6 Western Gateway. Strategic site locations have been identified by the Core Strategy but specific boundaries will be allocated by the Site Allocations process, including a revised Town Centre boundary in respect of SPA1 Town Centre in the Core Strategy. Business Development data in this report uses the existing town centre boundary as per the Watford District Plan 2000. General updates on the progress of SPA2, SPA3 and SPA6 are provided under Local Indicator LT7 Development progress on major schemes.</p> <p>N.B. Area of land in hectares does not necessarily equate to floorspace sq.m, which can be over a number of floors.</p>
