

**Report to:** Audit Committee

**Date of meeting:** 14 March 2016

**Report of:** Head of Finance (Shared Services)

**Title:** Changes to Accounting Policies  
2015/16 Annual Statement of Accounts

## 1.0 **SUMMARY**

- 1.1 It is recommended practice that this committee is informed of any significant changes to the council's accounting policies that are followed when compiling the annual statement of accounts. This report informs them of any changes.

## 2.0 **RECOMMENDATIONS**

- 2.1 That members note the changes to the council's accounting policies.

### **Contact Officer:**

For further information on this report please contact: -

Bob Watson, Head of Finance (Shared Services)

telephone extension: 7188

email: [bob.watson@threerivers.gov.uk](mailto:bob.watson@threerivers.gov.uk)

**Report approved by:** Joanne Wagstaffe, Director of Finance

### **3.0 DETAILS**

- 3.1 Attached at Appendix 1 is the draft note to the Statement of Accounts on accounting policies for the financial year ending 31 March 2016.
- 3.2 There are no statutory accounting policy changes to be implemented in the 2015/16 accounts with regard to the Council's accounts. Officers have therefore taken the opportunity to review the previous policies used and make minor amendments to reflect best practice and to provide clearer information to the any reader of the annual accounts. Significant changes are shown in blue and italics; other minor changes have been made to make the note read more clearly.

### **4.0 IMPLICATIONS**

#### **4.1 Financial**

4.1.1 None Specific.

#### **4.2 Legal Issues (Monitoring Officer)**

4.2.1 None Specific.

#### **4.3 Equalities**

None Specific.

#### **4.4 Potential Risks**

There are no risks associated with the decisions members are being asked to make.

## **APPENDICES**

Appendix 1      Draft note to the 2015/16 Statement of accounts on accounting policies

**Draft note to the 2015/16 Statement of accounts on accounting policies**

**1 Accounting Policies - Single Entity and Group Accounts**

**1.01 General Principles**

The Statement of Accounts summarises the Council's transactions for the 2015/16 financial year and its position at the year end of 31 March 2016. The Council is required to prepare an annual Statement of Accounts by The Accounts and Audit (England) Regulations 2015, which require these to be prepared in accordance with proper accounting practices. These practices primarily comprise the Code of Practice on Local Authority Accounting in the United Kingdom 2015/16 and the CIPFA Service Reporting Code of Practice 2015/16 (SERCOP), supported by International Financial Reporting Standards (IFRS) [and statutory guidance issued under section 12 of the 2003 Act]. The accounting convention adopted in the Statement of Accounts is principally historical cost, modified by the revaluation of certain categories of non current assets and financial instruments.

**1.02 Turnover (for Group Accounts)**

Turnover in respect of property development is recognised on unconditional exchange of contracts on disposals of finished developments.

Where construction of pre-sold developments is under-taken, the revenue and profits are recognised in accordance with IFRIC 15. Revenue is determined by independently certified milestones.

**1.03 Accruals of Income and Expenditure**

Activity is accounted for in the year that it takes place, not simply when cash payments are made or received. In particular:-

- revenue from the sale of goods is recognised when the Council transfers the significant risks and rewards of ownership to the purchaser and it is probable that economic benefits or service potential associated with the transaction will flow to the Council
- revenue from the provision of services is recognised when the Council can measure reliably the percentage of completion of the transaction and it is probable that economic benefits or service potential associated with the transaction will flow to the Council
- supplies are recorded as expenditure when they are consumed — where there is a gap between the date supplies are received and their consumption, they are carried as inventories on the Balance Sheet
- expenses in relation to services received (including services provided by employees) are recorded as expenditure when the services are received

- rather than when payments are made
- interest receivable on investments and payable on borrowings is accounted for respectively as income and expenditure on the basis of the effective interest rate for the relevant financial instrument, rather than the cash flows fixed or determined by the contract
  - where revenue and expenditure have been recognised, but cash has not been received or paid, a debtor or creditor for the relevant amount is recorded in the Balance Sheet. Where debts may not be settled, the balance of debtors is written down and a charge made to revenue for the income that might not be collected

#### **1.04 Cash and Cash Equivalents**

Cash is represented by cash in hand and deposits with financial institutions repayable without penalty on notice of not more than 24 hours. Cash equivalents are investments that mature in three months or less from the date of acquisition and that are readily convertible to known amounts of cash with insignificant risk of change in value.

In the Cash Flow Statement, cash and cash equivalents are shown net of bank overdrafts that are repayable on demand and form an integral part of the Council's cash management. The Council has no overdraft facility.

#### **1.05 Exceptional Items**

When items of income and expense are material, their nature and amount is disclosed separately, either on the face of the Comprehensive Income and Expenditure Statement or in the notes to the accounts, depending on how significant the items are to an understanding of the Council's financial performance.

#### **1.06 Prior Period Adjustments, Changes in Accounting Policies and Estimates and Errors**

Prior period adjustments may arise as a result of a change in accounting policies or to correct a material error. Changes in accounting estimates are accounted for prospectively, i.e. in the current and future years affected by the change and do not give rise to a prior period adjustment.

Changes in accounting policies are only made when required by proper accounting practices or the change provides more reliable or relevant information about the effect of transactions, other events and conditions on the Council's financial position or financial performance. Where a change is made, it is applied retrospectively (unless stated otherwise) by adjusting opening balances and comparative amounts for the prior period, as if the new policy had always been applied.

Material errors discovered in prior period figures are corrected retrospectively by amending opening balances and comparative amounts for the prior period. See Note 4 for an outline of PPA's within this set of accounts.

## **1.07 Charges to Revenue for Long Term Assets**

Services, support services and trading accounts are debited with the following amounts to record the cost of holding fixed assets during the year:-

- depreciation attributable to the assets used by the relevant service
- revaluation and impairment losses on assets used by the service where there are no accumulated gains in the Revaluation Reserve against which the losses can be written off
- amortisation of intangible fixed assets attributable to the service

The Council is not required to raise council tax to fund depreciation, revaluation and impairment losses or amortisations. These entries are adjusted through the Movement in Reserves Statement.

## **1.08 Employee Benefits**

### **Benefits Payable During Employment**

Short-term employee benefits are those due to be settled within 12 months of the year-end. They include such benefits as wages and salaries, paid annual leave and paid sick leave, bonuses and non-monetary benefits (e.g. cars) for current employees and are recognised as an expense for services in the year in which employees render service to the Council. An accrual is made for the cost of holiday entitlements (or any form of leave, eg time off in lieu) earned by employees but not taken before the year-end which employees can carry forward into the next financial year. The accrual is made at the salary rates applicable in the following accounting year, being the period in which the employee takes the benefit. The accrual is charged to Surplus or Deficit on the Provision of Services, but then reversed out through the Movement in Reserves Statement so that holiday benefits are charged to revenue in the financial year in which the holiday absence occurs.

### **Termination Benefits**

Termination benefits are amounts payable as a result of a decision by the Council to terminate an officer's employment before the normal retirement date or an officer's decision to accept voluntary redundancy and are charged on an accruals basis to the Non-Distributed Costs line in the Comprehensive Income and Expenditure Statement when the Council is demonstrably committed to the termination of the employment of an officer, or group of officers, or making an offer to encourage voluntary redundancy.

Where termination benefits involve the enhancement of pensions, statutory provisions require the General Fund Balance to be charged with the amount payable by the Council to the pension fund or pensioner in the year, not the amount calculated according to the relevant accounting standards. In the Movement in Reserves Statement, appropriations are required to and from the Pensions Reserve to remove the notional debits and credits for pension enhancement termination benefits and replace them with debits for the cash paid to the pension fund and pensioners and any such amounts payable but unpaid at the year-end.

### **Post Employment Benefits**

Employees of the Council are members of the Local Government Pension Scheme, administered by Hertfordshire County Council. The scheme provided defined benefits to members (retirement lump sums and pensions), earned as employees who worked for the Council. The schemes arrangements are summarised as follows:-

### The Local Government Pension Scheme

- the Local Government Scheme is accounted for as a defined benefits scheme
- the liabilities of Hertfordshire County Council Pension Fund attributable to the Council are included in the Balance Sheet on an actuarial basis using the projected unit method — i.e. an assessment of the future payments that will be made in relation to retirement benefits earned to date by employees, based on assumptions about mortality rates, employee turnover rates, etc, and projections of projected earnings for current employees
- *liabilities are discounted to their value at current prices, using a discount rate of TBC% (based on the indicative rate of return on high quality corporate bonds)*
- *the assets of Hertfordshire County Council (HCC) Pension Fund attributable to the Council are included in the Balance Sheet at their bid value as required by International Accounting Standard (IAS)19. Full details of the assets held by the Fund are disclosed as part of the Pension scheme disclosure.*

The change in the net pensions liability is analysed into seven components:

- current service cost — the increase in liabilities as a result of years of service earned this year — allocated in the Comprehensive Income and Expenditure Statement to the services for which the employees worked
- past service cost — the increase in liabilities arising from current year decisions which relate to years of service earned in earlier years — debited to the Surplus or Deficit on the Provision of Services in the Comprehensive Income and Expenditure Statement as part of Non-Distributed Costs
- interest cost — the expected increase in the present value of liabilities during the year as they move one year closer to being paid — debited to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement
- expected return on assets — the annual investment return on the fund assets attributable to the Council, based on an average of the expected long-term return credited to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement
- *gains or losses on settlements and curtailments — the result of actions to relieve the Council of liabilities or events that reduce the expected future service or accrual of benefits of employees — debited or credited to the Surplus or Deficit on the Provision of Services in the Comprehensive Income and Expenditure Statement as part of Non-Distributed Costs*
- *actuarial gains and losses — changes in the net pensions liability that arise because events have not coincided with assumptions made at the last actuarial valuation or because the actuaries have updated their assumptions — credited to the Comprehensive income and expenditure - Other Comprehensive Income and Expenditure line and reversed through the Movement in Reserves to the Pensions Reserve;*
- *contributions paid to the HCC pension fund — cash paid as employer's contributions to the pension fund in settlement of liabilities; not accounted for*

*as an expense in the Comprehensive Income and Expenditure Statement.*

In relation to retirement benefits, statutory provisions require the General Fund Balance to be charged with the amount payable by the Council to the pension fund or directly to pensioners in the year, not the amount calculated according to the relevant accounting standards. In the Movement in Reserves Statement, this means that there are appropriations to and from the Pensions Reserve to remove the notional debits and credits for retirement benefits and replace them with debits for the cash paid to the pension fund and pensioners and any such amounts payable but unpaid at the year-end. The negative balance that arises on the Pensions Reserve thereby measures the beneficial impact to the General Fund of being required to account for retirement benefits on the basis of cash flows, rather than as benefits earned by employees.

### **Discretionary Benefits**

The Council also has restricted powers to make discretionary awards of retirement benefits in the event of early retirements. Any liabilities estimated to arise as a result of an award to any member of staff are accrued in the year of the decision to make the award and accounted for using the same policies as are applied to the Local Government Pension Scheme.

## **1.09 Events After the Balance Sheet Date**

Events after the Balance Sheet date are those events, both favourable and unfavourable, that occur between the end of the reporting period and the date when the Statement of Accounts is authorised for issue. Two types of events can be identified:

- those that provide evidence of conditions that existed at the end of the reporting period — the Statement of Accounts is adjusted to reflect such events
- those that are indicative of conditions that arose after the reporting period — the Statement of Accounts is not adjusted to reflect such events, but where a category of events would have a material effect, disclosure is made in the notes of the nature of the events and their estimated financial effect

Events taking place after the date of authorisation for issue are not reflected in the Statement of Accounts.

## **1.10 Financial Instruments**

### **Financial Liabilities**

Financial liabilities are recognised on the Balance Sheet when the Council becomes a party to the contractual provisions of a financial instrument and are initially measured at fair value and are carried at their amortised cost. The Council currently has no long-term external debt.

### **Financial Assets - Loans and Receivables**

Loans and receivables are assets that have fixed or determinable payments but are not quoted in an active market.

They are recognised on the Balance Sheet when the Council becomes a party to the contractual provisions of a financial instrument and are initially measured at fair value. They are subsequently measured at their amortised cost. Annual credits to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement for interest receivable are based on the carrying amount of the asset multiplied by the effective rate of interest for the instrument. For most of the loans that the Council has made, this means that the amount presented in the Balance Sheet is the outstanding principal receivable (plus accrued interest) and interest credited to the Comprehensive Income and Expenditure Statement is the amount receivable for the year in the loan agreement.

However, the Council has made a few loans to voluntary organisations at less than market rates (soft loans). When soft loans are made, a loss is recorded in the Comprehensive Income and Expenditure Statement (debited to the appropriate service) for the present value of the interest that will be foregone over the life of the instrument, resulting in a lower amortised cost than the outstanding principal. Interest is credited to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement at a marginally higher effective rate of interest than the rate receivable from the voluntary organisations, with the difference serving to increase the amortised cost of the loan in the Balance Sheet.

Statutory provisions require that the impact of soft loans on the General Fund Balance is the interest receivable for the financial year — the reconciliation of amounts debited and credited to the Comprehensive Income and Expenditure Statement to the net gain required against the General Fund Balance is managed by a transfer to, or from, the Financial Instruments Adjustment Account in the Movement in Reserves Statement.

Where assets are identified as impaired because of a likelihood arising from a past event that payments due under the contract will not be made, the asset is written down and a charge made to the relevant service (for receivables specific to that service) or the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement. The impairment loss is measured as the difference between the carrying amount and the present value of the revised future cash flows discounted at the asset's original effective interest rate.

Any gains and losses that arise on the derecognition of an asset are credited or debited to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement.

## **1.11 Government Grants and Contributions**

Whether paid on account, by instalments or in arrears, government grants and third party contributions and donations are recognised as due to the Council when there is reasonable assurance that:-

- the Council will comply with the conditions of the payment

- the grants or contributions will be received.

Amounts recognised as due to the Council are not credited to the Comprehensive Income and Expenditure Statement until conditions attached to the grant or contribution have been satisfied. Conditions are stipulations that specify that the future economic benefits or service potential embodied in the asset acquired using the grant or contribution are required to be consumed by the recipient as specified, or future economic benefits or service potential must be returned to the transferor.

Monies advanced as grants and contributions for which conditions have not been satisfied are carried in the Balance Sheet as creditors. When conditions are satisfied, the grant or contribution is credited to the relevant service line (attributable revenue grants and contributions) or Taxation and Non-Specific Grant Income (non-ringfenced revenue grants and all capital grants) in the Comprehensive Income and Expenditure Statement.

Where capital grants are credited to the Comprehensive Income and Expenditure Statement, they are reversed out of the General Fund Balance in the Movement in Reserves Statement. Where the grant has yet to be used to finance capital expenditure, it is posted to the Capital Grants Unapplied reserve. Where it has been applied, it is posted to the Capital Adjustment Account. Amounts in the Capital Grants Unapplied Reserve are transferred to the Capital Adjustment Account once they have been applied to fund capital expenditure.

## **1.12 Intangible Assets**

Expenditure on non-monetary assets that do not have physical substance but are controlled by the Council as a result of past events (e.g. software licences) is capitalised when it is expected that future economic benefits or service potential will flow from the intangible asset to the Council.

Internally generated assets are capitalised where it is demonstrable that the project is technically feasible and is intended to be completed (with adequate resources being available) and the Council will be able to generate future economic benefits or deliver service potential by being able to sell or use the asset. Expenditure is capitalised where it can be measured reliably as attributable to the asset and is restricted to that incurred during the development phase (research expenditure cannot be capitalised).

Expenditure on the development of websites is not capitalised if the website is solely or primarily intended to promote or advertise the Council's goods or services.

Intangible assets are measured initially at cost. Amounts are only revalued where the fair value of the assets held by the Council can be determined by reference to an active market. In practice, no intangible asset held by the Council meets this criterion, and they are therefore carried at amortised cost. The depreciable amount of an intangible asset is amortised over its useful life to the relevant service line(s) in the Comprehensive Income and Expenditure Statement. An asset is tested for impairment whenever there is an indication that the asset might be impaired — any losses recognised are posted to the relevant service line(s) in the Comprehensive Income and Expenditure Statement. Any gain or loss arising on the disposal or abandonment of an intangible asset is posted to the Other Operating Expenditure

line in the Comprehensive Income and Expenditure Statement.

Where expenditure on intangible assets qualifies as capital expenditure for statutory purposes, amortisation, impairment losses and disposal gains and losses are not permitted to have an impact on the General Fund Balance. The gains and losses are therefore reversed out of the General Fund Balance in the Movement in Reserves Statement and posted to the Capital Adjustment Account and (for any sale proceeds greater than £10,000) the Capital Receipts Reserve.

Where there is intangible asset expenditure of an immaterial nature, the Council's policy is that these be capitalised and then written off in-year.

### **1.13 Inventories and Long Term Contracts**

Inventories are included in the Balance Sheet at the lower of cost or net realisable value.

Long term contracts are accounted for on the basis of charging the Surplus or Deficit on the Provision of Services with the value of works and services received under the contract during the financial year.

### **1.14 Investment Property**

Investment properties are those that are used solely to earn rentals and/or for capital appreciation. The definition is not met if the property is used in any way to facilitate the delivery of services or production of goods or is held for sale.

Investment properties are measured initially at cost and subsequently at fair value, based on the amount at which the asset could be exchanged between knowledgeable parties at arm's-length. Properties are not depreciated but are revalued annually according to market conditions at the year-end. Gains and losses on revaluation are posted to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement. The same treatment is applied to gains and losses on disposal.

Rentals received in relation to investment properties are credited to the Financing and Investment Income line and result in a gain for the General Fund Balance. However, revaluation and disposal gains and losses are not permitted by statutory arrangements to have an impact on the General Fund Balance. The gains and losses are therefore reversed out of the General Fund Balance in the Movement in Reserves Statement and posted to the Capital Adjustment Account and the Capital Receipts Reserve.

### **1.15 Leases**

Leases are classified as finance leases where the terms of the lease transfer substantially all the risks and rewards incidental to ownership of the property, plant or equipment from the lessor to the lessee. All other leases are classified as operating leases.

Where a lease covers both land and buildings, the land and buildings elements are

considered separately for classification.

Arrangements that do not have the legal status of a lease but convey a right to use an asset in return for payment are accounted for under this policy where fulfilment of the arrangement is dependent on the use of specific assets.

### ***The Council as Lessee***

#### **Finance Leases**

Property, plant and equipment held under finance leases is recognised on the Balance Sheet at the commencement of the lease at its fair value measured at the lease's inception (or the present value of the minimum lease payments, if lower). The asset recognised is matched by a liability for the obligation to pay the lessor. Initial direct costs of the Council are added to the carrying amount of the asset. Premiums paid on entry into a lease are applied to writing down the lease liability. Contingent rents are charged as expenses in the periods in which they are incurred.

Lease payments are apportioned between:-

- a charge for the acquisition of the interest in the property, plant or equipment — applied to write down the lease liability; and
- a finance charge (debited to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement).

Property, Plant and Equipment recognised under finance leases is accounted for using the policies applied generally to such assets, subject to depreciation being charged over the lease term if this is shorter than the asset's estimated useful life (where ownership of the asset does not transfer to the Council at the end of the lease period).

The Council is not required to raise council tax to cover depreciation or revaluation and impairment losses arising on leased assets. Instead, a prudent annual contribution is made from revenue funds towards the deemed capital investment in accordance with statutory requirements. Depreciation and revaluation and impairment losses are therefore substituted by a revenue contribution in the General Fund Balance, by way of an adjusting transaction with the Capital Adjustment Account in the Movement in Reserves Statement.

#### **Operating Leases**

Rentals paid under operating leases are charged to the Comprehensive Income and Expenditure Statement as an expense of the services benefiting from use of the leased property, plant or equipment. Charges are made on a straight-line basis over the life of the lease, even if this does not match the pattern of payments (e.g. there is a rent-free period at the commencement of the lease).

### ***The Council as Lessor***

#### **Finance Leases**

Where the Council grants a finance lease over a property or an item of plant or equipment, the relevant asset is written out of the Balance Sheet as a disposal. At the commencement of the lease, the carrying amount of the asset in the Balance Sheet (whether Property, Plant and Equipment or Assets Held for Sale) is written off to the Other Operating Expenditure line in the Comprehensive Income and Expenditure Statement as part of the gain or loss on disposal. A gain, representing the Council's net investment in the lease, is credited to the same line in the Comprehensive Income and Expenditure Statement also as part of the gain or loss on disposal (i.e. netted off against the carrying value of the asset at the time of disposal), matched by a lease (long-term debtor) asset in the Balance Sheet.

Lease rentals receivable are apportioned between:

- a charge for the acquisition of the interest in the property — applied to write down the lease debtor (together with any premiums received); and
- finance income (credited to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement).

The gain credited to the Comprehensive Income and Expenditure Statement on disposal is not permitted by statute to increase the General Fund Balance and is required to be treated as a capital receipt. Where a premium has been received, this is posted out of the General Fund Balance to the Capital Receipts Reserve in the Movement in Reserves Statement. Where the amount due in relation to the lease asset is to be settled by the payment of rentals in future financial years, this is posted out of the General Fund Balance to the Deferred Capital Receipts Reserve in the Movement in Reserves Statement. When the future rentals are received, the element for the capital receipt for the disposal of the asset is used to write down the lease debtor. At this point, the deferred capital receipts are transferred to the Capital Receipts Reserve.

The written-off value of disposals is not a charge against council tax, as the cost of fixed assets is fully provided for under separate arrangements for capital financing. Amounts are therefore appropriated to the Capital Adjustment Account from the General Fund Balance in the Movement in Reserves Statement.

## **Operating Leases**

Where the Council grants an operating lease over a property or an item of plant or equipment, the asset is retained in the Balance Sheet. Rental income is credited to the Other Operating Expenditure line in the Comprehensive Income and Expenditure Statement. Credits are made on a straight-line basis over the life of the lease, even if this does not match the pattern of payments (e.g. there is a premium paid at the commencement of the lease). Initial direct costs incurred in negotiating and arranging the lease are added to the carrying amount of the relevant asset and charged as an expense over the lease term on the same basis as rental income.

## **1.16 Overheads and Support Services**

The costs of overheads and support services are charged to those that benefit from the supply or service in accordance with the costing principles of the CIPFA Service Reporting Code of Practice 2014/15 (SERCOP). The total absorption costing principle is used — the full cost of overheads and support services are shared

between users in proportion to the benefits received, with the exception of:-

- Corporate and Democratic Core — costs relating to the Council's status as a multi-functional, democratic organisation
- Non-Distributed Costs — the cost of discretionary benefits awarded to employees retiring early and impairment losses chargeable on Assets Held for Sale.

These two cost categories are defined in SERCOP and accounted for as separate headings in the Comprehensive Income and Expenditure Statement, as part of Net Expenditure on Continuing Services.

## **1.17 Property, Plant and Equipment**

Assets that have physical substance and are held for use in the production or supply of goods or services, for rental to others, or for administrative purposes and that are expected to be used during more than one financial year are classified as Property, Plant and Equipment.

### **Recognition**

Expenditure on the acquisition, creation or enhancement of Property, Plant and Equipment is capitalised on an accruals basis, provided that it is probable that the future economic benefits or service potential associated with the item will flow to the Council and the cost of the item can be measured reliably. Expenditure that maintains but does not add to an asset's potential to deliver future economic benefits or service potential (i.e. repairs and maintenance) is charged as an expense when it is incurred.

### **Measurement**

Assets are initially measured at cost, comprising:

- the purchase price
- any costs attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management.

The Council does not capitalise borrowing costs incurred whilst assets are under construction.

The cost of assets acquired other than by purchase is deemed to be its fair value, unless the acquisition does not have commercial substance (i.e. it will not lead to a variation in the cash flows of the Council). In the latter case, where an asset is acquired via an exchange, the cost of the acquisition is the carrying amount of the asset given up by the Council.

Donated assets are measured initially at fair value. The difference between fair value and any consideration paid is credited to the Taxation and Non-Specific Grant Income line of the Comprehensive Income and Expenditure Statement, unless the donation has been made conditionally. Until conditions are satisfied, the gain is held in the Donated Assets Account. Where gains are credited to the Comprehensive Income and Expenditure Statement, they are reversed out of the

General Fund Balance to the Capital Adjustment Account in the Movement in Reserves Statement.

It should be noted that at present the Council has no donated assets.

Assets are then carried in the Balance Sheet using the following measurement bases:

- Infrastructure, community assets and assets under construction — depreciated historical cost
- All other assets — fair value, determined as the amount that would be paid for the asset in its existing use (Existing Use Value — EUV).

Where there is no market-based evidence of fair value because of the specialist nature of an asset, depreciated replacement cost (DRC) is used as an estimate of fair value.

Where non-property assets that have short useful lives or low values (or both), depreciated historical cost basis is used as a proxy for fair value.

Assets included in the Balance Sheet at fair value are revalued sufficiently regularly to ensure that their carrying amount is not materially different from their fair value at the year-end, but as a minimum every five years. In addition, should current valuations of a similar class of asset suggest material differences in valuations, the entire class to which the asset belongs would be revalued. The current valuers have undertaken a market review of individual asset types within the Council's portfolio at year end to identify any material changes to the fair value of assets. Increases in valuations are matched by credits to the Revaluation Reserve to recognise unrealised gains. Exceptionally, gains might be credited to the Comprehensive Income and Expenditure Statement where they arise from the reversal of a loss previously charged to a service.

When decreases in value are identified:

- where there is a balance of revaluation gains for the asset in the Revaluation Reserve, the carrying amount of the asset is written down against that balance (up to the amount of the accumulated gains)
- where there is no balance in the Revaluation Reserve or an insufficient balance, the carrying amount of the asset is written down against the relevant service line(s) in the Comprehensive Income and Expenditure Statement.

The Revaluation Reserve contains revaluation gains recognised since 1 April 2007 only, the date of its formal implementation. Gains arising before that date have been consolidated into the Capital Adjustment Account.

## **Impairment**

Assets are assessed at each year-end as to whether there is any indication that an asset may be impaired. Where indications exist and any possible differences are estimated to be material, the recoverable amount of the asset is estimated and, where this is less than the carrying amount of the asset, an impairment loss is recognised for the shortfall.

When impairment losses are identified:

- where there is a balance of revaluation gains for the asset in the Revaluation Reserve, the carrying amount of the asset is written down against that balance (up to the amount of the accumulated gains)
- where there is no balance in the Revaluation Reserve or an insufficient balance, the carrying amount of the asset is written down against the relevant service line(s) in the Comprehensive Income and Expenditure Statement

Where an impairment loss is reversed subsequently, the reversal is credited to the relevant service line(s) in the Comprehensive Income and Expenditure Statement, up to the amount of the original loss, adjusted for depreciation that would have been charged if the loss had not been recognised.

## **Depreciation**

Depreciation is provided for on all Property, Plant and Equipment assets by the systematic allocation of their depreciable amounts over their useful lives. An exception is made for assets without a determinable finite useful life (i.e. freehold land and certain Community Assets) and assets that are not yet available for use (i.e. assets under construction).

*Depreciation is calculated on the following bases:-*

- *Buildings — straight-line allocation over the useful life of the asset as estimated by the valuer - up to 70 years*
- *Vehicles — straight-line over the estimated life of the asset - up to 20 years*
- *Plant, furniture and equipment — straight-line over the estimated life of the asset - up to 20 years*
- *Infrastructure — straight-line over the estimated life of the asset - up to 25 years*
- *Finance leases — straight-line over the term of the lease*

Depreciation commences in the year following acquisition.

Where an item of Property, Plant and Equipment asset has major components whose cost is significant in relation to the total cost of the item, the components are depreciated separately, in order to ensure the depreciation charge is realistic.

Revaluation gains are also depreciated, with an amount equal to the difference between current value depreciation charged on assets and the depreciation that would have been chargeable based on their historical cost being transferred each year from the Revaluation Reserve to the Capital Adjustment Account.

## **Disposals and Non-current Assets Held for Sale**

When it becomes probable that the carrying amount of an asset will be recovered principally through a sale transaction rather than through its continuing use, it is reclassified as an Asset Held for Sale. The asset is revalued immediately before reclassification and then carried at the lower of this amount and fair value less costs to sell. Where there is a subsequent decrease to fair value less costs to sell, the loss is posted to the Other Operating Expenditure line in the Comprehensive Income and Expenditure Statement. Gains in fair value are recognised only up to the amount of any previous losses recognised in the Surplus or Deficit on Provision of Services. Depreciation is not charged on Assets Held for Sale.

If assets no longer meet the criteria to be classified as Assets Held for Sale, they are reclassified back to non-current assets and valued at the lower of their carrying amount before they were classified as held for sale; adjusted for depreciation, amortisation or revaluations that would have been recognised had they not been classified as Held for Sale, and their recoverable amount at the date of the decision not to sell.

Assets that are to be abandoned or scrapped are not reclassified as Assets Held for Sale.

When an asset is disposed of or decommissioned, the carrying amount of the asset in the Balance Sheet (whether Property, Plant and Equipment or Assets Held for Sale) is written off to the Other Operating Expenditure line in the Comprehensive Income and Expenditure Statement as part of the gain or loss on disposal. Receipts from disposals (if any) are credited to the same line in the Comprehensive Income and Expenditure Statement also as part of the gain or loss on disposal (i.e. netted off against the carrying value of the asset at the time of disposal). Any revaluation gains accumulated for the asset in the Revaluation Reserve are transferred to the Capital Adjustment Account.

Amounts received for a disposal in excess of £10,000 are categorised as capital receipts.

The written-off value of disposals is not a charge against council tax, as the cost of fixed assets is fully provided for under separate arrangements for capital financing. Amounts are appropriated to the Capital Adjustment Account from the General Fund Balance in the Movement in Reserves Statement.

### **Construction Contracts (for Group Accounts)**

Where the outcome of a construction contract can be estimated reliably, revenue and costs are recognised by reference to the stage of completion of the contract activity at the balance sheet date. This is normally measured by the proportion that contract costs incurred for work performed to date bear to the estimated total contract costs, except where this would not be representative of the stage of completion. Variations in contract work, claims and incentive payments are included to the extent that the amount can be measured reliably and its receipt is considered probable.

Where the outcome of a construction contract cannot be estimated reliably, contract revenue is recognised to the extent of contract costs incurred where it is probable they will be recoverable. Contract costs are recognised as expenses in the period in which they are incurred. When it is probable that total contract costs will exceed total contract revenue, the expected loss is recognised as an expense immediately.

### **1.18 Heritage Assets**

Heritage Assets are held with the objective of increasing knowledge, understanding and the appreciation of the Council's history and local area. Heritage Assets are recognised and measured (including the treatment of revaluation gains and losses)

in accordance with the Council's accounting policies on property, plant and equipment. However, some of the measurement rules have been simplified in relation to heritage assets as detailed below.

The Heritage Assets are relatively static and acquisitions, donations and disposals are rare. Where acquisitions do occur, they are initially recognised at cost and donations are recognised at valuation ascertained by insurance officers, museum curators or external valuers. Proceeds from the disposal of Heritage Assets are accounted for in accordance with the Council's general policies relating to the disposals of property, plant and equipment. The Council has a rolling programme of major repair and restoration of its heritage assets and therefore the assets are deemed to have indefinite lives and the Council does not consider it necessary to charge depreciation.

The Council's collection of Heritage Assets, which includes works of art, musical equipment, sculptures, statues, war memorials and civic regalia, are reported at insurance valuations, which are based on market values, internal or external valuations. These insurance valuations are reviewed and updated on an annual basis. The carrying amounts of heritage assets are reviewed where there is evidence of impairment or where an item has suffered physical deterioration or breakage. Any impairment is recognised and measured in accordance with the Council's general policy on impairment.

## **1.19 Provisions, Contingent Liabilities and Contingent Assets**

### **Provisions**

Provisions are made where an event has taken place that gives the Council a legal or constructive obligation that probably requires settlement by a transfer of economic benefits or service potential, and a reliable estimate can be made of the amount of the obligation. For instance, the Council may be involved in a court case that could eventually result in the making of a settlement or the payment of compensation.

Provisions are charged as an expense to the appropriate service line in the Comprehensive Income and Expenditure Statement in the year that the Council becomes aware of the obligation, and are measured at the best estimate at the balance sheet date of the expenditure required to settle the obligation, taking into account relevant risks and uncertainties.

When payments are eventually made, they are charged to the provision carried in the Balance Sheet. Estimated settlements are reviewed at the end of each financial year — where it becomes less than probable that a transfer of economic benefits will now be required (or a lower settlement than anticipated is made), the provision is reversed and credited back to the relevant service.

Where some or all of the payment required to settle a provision is expected to be recovered from another party (e.g. from an insurance claim), this is only recognised as income for the relevant service if it is virtually certain that reimbursement will be received if the Council settles the obligation.

The levels of provisions are reviewed annually by the Council.

### **Contingent Liabilities**

A contingent liability arises where an event has taken place that gives the Council a possible obligation whose existence will only be confirmed by the occurrence or otherwise of uncertain future events not wholly within the control of the Council. Contingent liabilities also arise in circumstances where a provision would otherwise be made but either it is not probable that an outflow of resources will be required or the amount of the obligation cannot be measured reliably.

Contingent liabilities are not recognised in the Balance Sheet but disclosed in a note to the accounts.

### **Contingent Assets**

A contingent asset arises where an event has taken place that gives the Council a possible asset whose existence will only be confirmed by the occurrence or otherwise of uncertain future events not wholly within the control of the Council.

Contingent assets are not recognised in the Balance Sheet but disclosed in a note to the accounts where it is probable that there will be an inflow of economic benefits or service potential.

## **1.20 Reserves**

The Council sets aside specific amounts as reserves for future policy purposes or to cover contingencies. Reserves are created by appropriating amounts out of the General Fund Balance in the Movement in Reserves Statement. When expenditure to be financed from a reserve is incurred, it is charged to the appropriate service in that year to score against the Surplus or Deficit on the Provision of Services in the Comprehensive Income and Expenditure Statement. The reserve is then appropriated back into the General Fund Balance in the Movement in Reserves Statement so that there is no net charge against council tax for the expenditure.

Certain reserves are kept to manage the accounting processes for non-current assets, financial instruments, retirement and employee benefits and do not represent usable resources for the Council — these reserves are explained in the relevant policies.

## **1.21 Revenue Expenditure Funded from Capital under Statute**

Expenditure incurred during the year that may be capitalised under statutory provisions but that does not result in the creation of a non-current asset has been charged as expenditure to the relevant service in the Comprehensive Income and Expenditure Statement in the year. Where the Council has determined to meet the cost of this expenditure from existing capital resources or by borrowing, a transfer in the Movement in Reserves Statement from the General Fund Balance to the Capital Adjustment Account then reverses out the amounts charged so that there is no impact on the level of council tax.

## **1.22 Value Added Tax (VAT)**

VAT payable is included as an expense only to the extent that it is not recoverable from Her Majesty's Revenue and Customs. VAT receivable is excluded from income.

## **1.23 Jointly Controlled Operations and Jointly Controlled Assets**

Jointly controlled operations are activities undertaken by the Council in conjunction with other organisations, that involve the use of assets and resources of the Council and organisations without the establishment of a separate legal entity.

The Council recognises the assets and liabilities it controls on the Council's balance sheet. Expenditure incurred by the Council and income it earns from the operation is included in the Council's CI&E.

Jointly controlled assets are items of property, plant or equipment that are jointly controlled by the Council and other organisations. The assets being used to obtain benefit to the Council and organisations. The arrangement does not involve the formation of a legal entity.

The Council accounts for only its share of jointly controlled assets, liabilities and expenses incurred in respect of its interest in the arrangement.

An agreement exists between Dacorum Borough Council, Hertsmere Borough Council, St Albans City & District Council, Three Rivers District Council and Watford Borough Council to constitute a West Herts Crematorium Joint Committee under the Local Government Act 2000.

The Joint Committee has one member from each of the constituent Councils. Councillor Ian Brown represents the Council on the Joint Committee. The Council's Managing Director is the Clerk to the Joint Committee. Three Rivers District Council provide the Treasurer.

## **1.24 Single Entity Financial Statements**

The financial statements presented by a parent, an investor in an associate or a venturer in a joint venture (jointly controlled entity) in which the investments are accounted for on the basis of the direct equity interest (i.e. at cost) rather than on the basis of the reported results and net assets of the investees. In the context of the Code, an Authority's single entity financial statements are deemed to be separate financial statements.

## **1.25 Group Accounts - Recognition of Group Entities and Basis of Consolidation**

Group Accounts are the financial statements of an entity together with:-

- its subsidiary undertakings,
- its investments in associates, and

- its interests in joint ventures (jointly controlled entities); presented as a single economic entity.

Subsidiary undertakings are accounted for in accordance with the implementation of IAS27 (International Accounting Standard 27) in the 2015/16 Code. The 2014/15 Code requires consolidation of subsidiaries. Consolidation is a method of accounting whereby an entity combines the financial statements of the parent and its subsidiaries line by line by adding together like items of assets, liabilities, reserves, income and expenses. In order that the consolidated financial statements present financial information about the group as that of a single economic entity, the following steps are then taken:-

- the carrying amount of the parent's investment in each subsidiary and the parent's portion of reserves of each subsidiary are eliminated;
- any non controlling interest is identified and separately disclosed;
- intragroup balances and transactions, including income, expenses and dividends, are eliminated in full.

Investments in associates are accounted for in accordance with the implementation of IAS28 in the 2015/16 Code. The 2015/16 Code requires the consolidation of an entity's interest in associates. Joint ventures are accounted for in accordance with the implementation of IAS31 in the 2015/16 Code. The 2015/16 Code requires use of the "equity method" of accounting whereby the investment is initially recognised at cost and adjusted thereafter for the post acquisition change in the investor's share of the net assets of the investee. The profit or loss of the investor includes the investor's share of the profit or loss of the investee.

## **1.26 Taxation (for Group Accounts)**

Taxation on all profits is solely the personal liability of individual members. Consequently neither taxation nor related deferred taxation arising in respect of Watford Health Campus Partnership LLP are accounted for in these financial statements.

## **1.27 Subscription and repayment of members' capital (for Group Accounts)**

The capital requirements of the LLP are reviewed from time to time by the Board and further capital contributions may be made at the discretion of the members. No interest is charged on capital except pursuant to a dissolution, no capital can be withdrawn by a member unless agreed by all members.

## **1.28 Allocation of profits and drawings (for Group Accounts)**

The allocation of profits to those who were members during the financial period occurs following the finalisation of the annual financial statements.

The allocation of profits between members is determined by entitlements outlined in the Members' Agreement and is dependent on certain profit criteria being achieved. In accordance with the SORP as a consequence of the LLPs profits being automatically divided in line with the entitlements outlined in the Members' Agreement these profits are treated as an expense in the profit and loss account.

## **1.29 Work in progress (for Group Accounts)**

Development land and work in progress is included at cost less any losses foreseen in completing and disposing of the development less any amounts received or receivable as progress payments or part disposals. Where a property is being developed, cost includes cost of acquisition and development to date, including directly attributable fees, expenses and finance charges net of rental or other income attributable to the development. Where development property is not being actively developed, net rental income and finance costs are taken to the profit and loss account.
